

Incorporating ASQ-3 Developmental Screening in County Health Department Clinics

Produced by the Alabama Department of Public Health
Video Communications and Distance Learning Division

Faculty

Dianne Sims, BSN, RN
Director
Children's Health Division

Wendy Dale, LGSW
Director of Case Management Training

Bureau of Family Health Services
Alabama Department of Public Health

What Do You Need to Implement ASQ-3 in Your Clinic?

- ASQ-3 Starter Kits
- ASQ-3 Materials Kit
- Forms - Questionnaires and Activity Sheets
- Clinic Protocol for Developmental Screening
- Child Health Assessment Record, CHR-12

ASQ-3 Components

- Each county health department received:
 - One Starter Kit in English
 - Activity sheets (on ASQ-3 CD-ROM)
 - One Starter Kit in Spanish
 - Activity sheets (on ASQ-3 CD-ROM)

ASQ-3 Components

- One User's Guide
- Two Quick Start Guides
 - Handy reference
- Each county must maintain AN ORIGINAL SET OF QUESTIONNAIRES and Activity Sheets for copyright privileges

ASQ-3 Forms

- All forms (Questionnaires and Activity Sheets) are available from the warehouse
 - You have a copy of the numbers that have been assigned for ordering
- All forms are available in English and Spanish

ASQ-3 Forms

- There are 21 age-specific questionnaires for use with ages one to six years
- Activity Sheets are also available that correspond to ages in the ASQ-3 intervals
 - Activity Sheets provide parents with a short description of typical development and promote parent – child interaction

The ASQ-3 Materials Kit

- Many times children have not had the opportunity to try and master the various developmental skills
- We recommend assembling a kit and having it available so you can observe the child's skills or for parents to use as they complete the questionnaires

The ASQ-3 Materials Kit

- There is a list in your User's Guide on page 200, but we have compiled an abbreviated list of materials that we found is adequate for screening purposes

The ASQ-3 Materials Kit

- Some of the materials on the list are in your old Denver kits
 - Most of the items can be found at a discount store
 - Three kits can be made for less than \$50

Clinic Protocol for Developmental Screening

- The new protocol applies to children from one month to six years
- Please continue to use the current protocol using the Developmental Chart for the seven to 21 year age groups

Clinic Protocol for Developmental Screening

- A Developmental Testing Age Calculation Cheat Sheet has been created to assist staff
 - Age calculation is the same as previously done
 - Adjust for prematurity if the child is under two years of age and born three weeks before due date

Child Health Assessment Record CHR-12

- The changes to this form include:
 - Who brought the child in today?
 - Was the child premature?
 - Number of weeks?
 - In the Developmental Tool Section, “Abbreviated Denver” was removed and “ASQ-3” was added

PHALCON

- Document Diagnosis Code 41
 - “Unspecified delay in development” if you bring a child back for an Interperiodic Visit related to a developmental problem

Care Coordination Assistance

- Care Coordination and ASQ-3
- Patient 1st Care Coordination Protocol
- Reasons for Referral – ASQ-3 and Child Health Needs Assessment
- Assist parent with ASQ-3 Tool

Care Coordination Assistance

- Complete Child Health Screening Worksheet
- Psychosocial Assessment/Case plan
- Referrals
- Documentation
- SSR Coding
