1-800-QUITNOW 1-800-784-8664 www.quitnowalabama.com

Note: You may require other tests that are not listed

Take Charge of Your Diabetes with the Diabetes Health Record

All people with diabetes need to be actively involved in managing their diabetes. The Diabetes Health Record will help you keep track of the basic test you need and how often you need them. It will also help you to record and remember the results of these tests.

The Diabetes Health Record is based on practice recommendations from the American Diabetes Association Standards of Medical Care in Diabetes-2018.
