DECEMBER 2022

UPDATES

FPAR 2.0 Requirements

- OBGYN History Changes
- Insurance linked to Visit Reason **must** be selected when scheduling patients

All users are strongly encouraged to get familiar with the new 10g layout in CureMD. The new layout will take effect January 2023 for all users.

All users are strongly encouraged to test the Lab Beta View. EHR plan to activate in CureMD by January 2023.

The link to the Breast Cancer Risk Assessment Tool (www.cancer.gov/bcrisktool) has been added to the Library section under the Breast and Cervical Documents tab.

REMINDERS

- ❖ Asterisks (*) in the Demographics Tab indicates it as "required". The orange asterisks are required for Scheduling. Blue asterisks are required for Immunization and Lab orders.
- ❖ Support Staff is responsible for setting up the Patient Portal. When accessing the Patient Portal, patients **only** have access to input the **username** and **temporary password** that is issued.
- ❖ Inform patients that the **temporary password** issued **must** be changed within 24 hours.
- ❖ The Clinic Protocol Manual, The Breast and Cervical Documents, and The Depo Calendar can be found in the CureMD Library.
- ❖ Contact Cornelius Smith (IT Help Desk) at 334-206-5268 with CureMD computer issues.
- ❖ When requesting a note to be unsigned, send email to Kaye Melnick and cc to DCD and supervisor.
- ❖ ADPH is scheduled for a December 2022 CureMD upgrade on the following dates:
    - **ADPH Staging: 12/19/2022**
    - **ADPH Live: 12/26/2022**

❖ Schedule Packages to be Delivered When You will be Home

❖ Don't Overload your Home's Electrical Circuits

❖ Avoid Driving Alone or at Night

❖ Don't Make the Tree a Fire Hazard

❖ Water Your Christmas Tree Daily

❖ Never Drink and Drive

ADPH NEWS…You Can Use

Covid-19. While the holiday season is well underway, the Alabama Department of Public Health encourages you to make time in your busy schedule to get up to date with your COVID-19 vaccinations if you haven't already. Scott Harris, State Health Officer, states, "COVID-19 vaccines are safe and effective at protecting you from serious illness, hospitalization, and death. Since every COVID-19 infection gives the virus a chance to mutate, being vaccinated helps prevent the spread of COVID-19 and its variants in our state and world."

World AIDS Day.   World AIDS Day is commemorated every year on December 1. This day is an opportunity for public and private partners to spread awareness about the status of the epidemic and encourage progress in HIV prevention, treatment, and care around the world. Sharon Jordan, Director of the Office of HIV Prevention and Care, states, "It is important to know your testing status. People who know their HIV status have the information they need to modify their behavior, to protect others, get counseling, seek treatment, and/or the support needed to live longer and healthier lives."

"A kind gesture can reach a wound that only compassion can heal"
