Mission of the Alabama Office of Emergency Medical Services

OVERVIEW

The Department of Public Health Office of Emergency Medical Services (OEMS) is tasked with oversight of emergency medical services in Alabama. The OEMS is responsible for protecting the health, safety, and welfare of the public by assuring that emergency medical response agencies, training entities, and emergency medical services personnel meet or exceed established standards. The mission of the OEMS is to reduce preventable mortality and morbidity caused by trauma and other emergency medical conditions.

FORCE OF LAW

The <u>Code of Alabama</u> 1975, §22-18-1, set forth the authority of the OEMS to create rules and regulations. The legislation includes mandates for the State Emergency Medical Control Committee (SEMCC), and all regulatory processes (licensure, fees, compliance, operations, etc.) regulated by the OEMS.

ADMINISTRATIVE MISSION

The spectrum of tasks that the OEMS implements for the Alabama Department of Public Health (ADPH) and Alabama, at large, includes but is not limited to:

- Facilitation of the prehospital component of the Alabama Incident Management System (AIMS), which allows the ADPH to monitor hospitals, nursing homes, and ambulance resources during times of disaster.
- Facilitation of the Emergency Medical Services (EMS) staffing of Medical Needs Shelters for the Center for Emergency Preparedness, during times of disaster.
- Facilitation and administration of Alabama's electronic patient care reporting (ePCR) entreated by the federal government via the National Emergency Medical Services Information System (NEMSIS). The OEMS provides free software to facilitate licensed EMS provider data reporting. The software, Recording of Emergency Medical Services Calls and Urgent-care Environment (RESCUE), is compliant with the NEMSIS Version 3 platform for national EMS reporting. Otherwise, third-party software vendors are supplied upon request with the Alabama NEMSIS Version 3 schematron to enable their Alabama EMS provider service clients' ePCR process. Data uploaded by EMS provider services is retained in the Alabama NEMSIS repository and further uploaded to the national NEMSIS repository.

- Facilitation and administration of Alabama's prehospital EMS provision; including standards, licensure, and compliance oversight for individuals, services, businesses, and departments engaged in provision of emergency medical care and/or transport of the sick and injured; oversight and guidance for universities, colleges, and schools engaged in EMS training; and the responsibility for quality assurance and quality improvement processes for Alabama EMS provider services through periodic inspection of deployed EMS vehicles and equipment and, for individuals and service providers, through definitive complaint investigation and adjudication.
- Facilitation and administration of Alabama's arrangement with the National Registry of Emergency Medical Technicians (NREMT) to oversee and guarantee integrity of the National Registry of EMTs examination process. National Registry certification is a prerequisite for licensure at the level of that certification in Alabama.
- Facilitation and administration of Alabama's Acute Health Systems (AHS) which includes the Alabama Trauma System (ATS) and the Alabama Statewide Stroke System, as well as the Alabama Trauma Registry (ATR), which also closely monitors head and spinal cord injuries. The AHS are also currently developing to include data reporting and management of cardiac data, especially myocardial infarction pathologies. That component of the AHS (the Alabama ST-Elevation Myocardial Infarction, or STEMI system) is now online. Much of the data collection and management for AHS is facilitated through the University of Alabama at Birmingham. In all aspects of the AHS, the OEMS coordinates with area hospitals to facilitate uniform data recording of provided care to enable data follow-up of patients from the prehospital phase until well into the specialty hospital care process.
- Facilitation and administration of the Alabama EMS Regional Agencies. Alabama counties are assigned to one of six EMS Regions that are tasked by the OEMS with: providing an initial point of contact for EMS issues or concerns, organizing meetings, and providing effective communication between local communities and the OEMS, assisting constituent EMS personnel with rules compliance, providing local ongoing credentialing, and functioning as a clearing house for EMS education activities. Each regional agency also assists with coordination and implementation of the AHS components.
- Facilitation and administration of the federally funded Emergency Medical Services for Children (EMSC) Program. The purpose of the EMSC is to prevent and reduce child, youth, and adolescent disability and death resulting from severe illness and injury. To accomplish its goal, the program provides education for prehospital providers and ensures that the American Academy of Pediatrics/American College of Emergency Physicians (AAP/ACEP) guideline compliant equipment is available on prehospital emergency vehicles that transport children.

•	Provision of EMS data management and analysis for the purposes of quality assurance and improvement, compliance investigations, public health investigations of illness and injury, and research to drive the development of EMS efficacy in Alabama.

Purpose and Methods

PURPOSE

The purpose of this report is to present to our stakeholders a systematic overview of EMS calls occurring in Alabama in 2021. Data for this report was synthesized from the RESCUE database developed by the Center for Public Safety of the University of Alabama in Tuscaloosa based on NEMSIS V3 data standards.

METHODOLOGY

RESCUE captures prehospital care through both required and optional reporting elements and data are validated to meet (NEMSIS-3) standards. RESCUE captures agency information, patient demographics, response times, incident location, prehospital treatment, EMS transport, insurance, and patient disposition.

A total of 911,361 EMS runs were submitted to RESCUE from January 1, 2021, to December 31, 2021, as of July 1, 2022. The OEMS used the 2021 U.S. Census Bureau, Vintage 2021 Population Estimates www.census.gov/programs-surveys/popest.html figures to calculate EMS runs per 10,000 Alabama residents.
