Southwestern	3	3.1	770	5.3
Mobile	19	19.4	2002	13.8
Total (does not include unknown)	98	100.0	14547	100.0

*Note: Statistics should be interpreted WITH CAUTION as not all reported cases have been entered into the HIV Surveillance database. Effective October 1, 2017, Public Health Areas have been redistributed as eight Public Health Districts. Unknown cases are only accounted for in state total.

Prevalent HIV includes all persons living with HIV as of March 31, 2020.

Totals include unknown case counts. Females with no risk factor reported are reclassified as heterosexual exposure.

Age among newly diagnosed cases is age at diagnosis. Prevalent age is current age among cases living as of March 31, 2020.

Public Health District represents residence at diagnosis among newly diagnosed cases and current residence among prevalent cases.
