

HPV VACCINE IS CANCER PREVENTION

- ✓ 85% of people will get HPV infection in their lifetime.
- ✓ More than 4 out of every 10 cases of cancer caused by HPV occur among men.
- ✓ HPV vaccination can prevent over 90% of cancers caused by HPV.

HUMAN PAPILLOMAVIRUS

Human Papillomavirus (HPV) is a common virus that is spread through skin to skin contact and can lead to 6 types of cancers later in life. **HPV infections are so common, that nearly all men and women will get HPV at some point in their lives.** Teens who get their first dose before their 15th birthday only need 2 doses. Teens who get their first dose after their 15th birthday need 3 doses.
