

# HPV Vaccine Prevents Oral Cancers

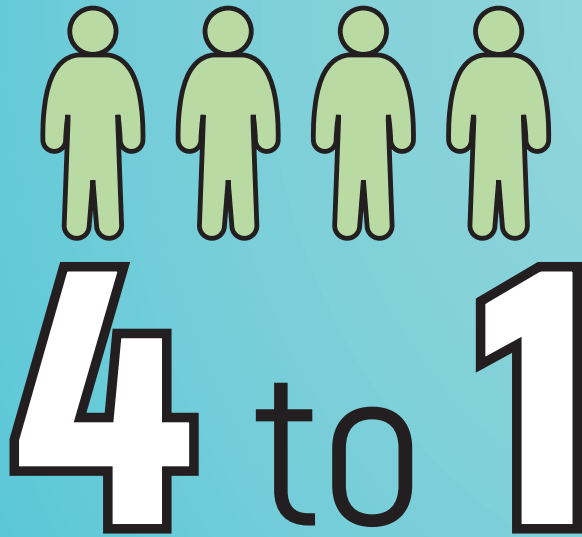

## EARLY SIGNS and SYMPTOMS

Only **40.3%** of 13-17 year old **Alabamians** are fully protected from HPV, compared to **48.6% in the US** and the **80% Healthy People 2020 goal**.

\*Source: Centers for Disease Control and Prevention 2017

Men get HPV associated oropharyngeal (oral) cancers at **four times** the rate of women
