INTRODUCTION

This *County Health Profiles* publication is a revision of Volume IV of *Alabama Vital Events, "County Profiles."* It is retitled to reflect the emphasis on health-related data and has been reformatted to contain the most frequently requested health data by county. The *Alabama Vital Events* publication has also been renamed to *Alabama Vital Statistics*, which contains data from Volumes I - III in one publication.

County Health Profiles and many other reports prepared by the Center for Health Statistics are now available on the Internet at www.adph.org, then click on Fast Find, then Health Statistics. This site has many tables and reports for immediate use.

Data for each county are displayed on two matching pages, left and right. Various footnotes give explanatory details about the different kinds of rates presented in the tables. Additional information may be obtained from the Technical Notes and Definitions in the Appendix B.

ALABAMA 2003 HEALTH PROFILE

BIRTHS BY AGE OF MOTHER					
	TOTAL	10-14	15-17	18-19	20 plus
All births	59,356	173	2,660	5,415	51,108
Rate	---	1.1	28.7	87.6	52.6
White	40,667	55	1,363	3,178	36,071
Rate	---	0.5	23.0	80.3	54.1
Black & Other	18,689	118	1,297	2,237	15,037
Rate	---	2.1	38.8	100.4	49.1

Rates for age group are per 1,000 females in specified age group (age-specific birth rate).
Births with unknown age of mother counted with the age group "20 plus".

Marriages	43,139
Rate	9.6
Divorces	23,205
Rate	5.2

Rate is per 1,000 population.

2003 POPULATION	
Total	4,500,752
White	3,210,758
Black and Other	1,289,994
Median age	36.5
Life expectancy at birth	74.7
Total fertility rate per 1,000 Women aged 10-49	1910.5

NATALITY					
	All Women		Women 10-19		
	Total	Rate	Total	Rate	
Est. pregnancies	82,382	86.5	11,954	38.4	
Births	59,356	13.2	8,248	26.5	
Abortions	10,130	10.6	1,871	6.0	
Est. fetal losses	12,896	---	1,835	---	

Birth rate is per 1,000 population.
Pregnancy and abortion rates are per 1,000 females 15-44. Rate is per 1,000 women 10-19.

	All women		Women 10 to 19	
	Total	Percent	Total	Percent
Births to unmarried women	20,788	35.0	6,142	74.5
Low weight births	5,932	10.0	1,006	12.2
Multiple births	1,950	3.3	128	1.6
Medicaid births	26,105	45.5	6,649	82.9

Percent is percent of all births with known status. Percent is percent of all births to women 10-19.

SELECTED NOTIFIABLE DISEASES	
New Cases	
HIV	432
AIDS	226
Syphilis	566
Gonorrhea	9,289
Chlamydia	14,168
Tuberculosis	258

INFANT RELATED MORTALITY BY MOTHER'S RACE AND AGE GROUP						
	All Ages			Ages 10-19		
	Total	White	Black & Other	Total	White	Black & Other
Infant deaths	519	264	255	101	55	46
Rate per 1,000 births	8.7	6.5	13.6	12.2	12.0	12.6
Postneonatal deaths	207	114	93	47	27	20
Rate per 1,000 births	3.5	2.8	5.0	5.7	5.9	5.5
Neonatal deaths	312	150	162	54	28	26
Rate per 1,000 births	5.3	3.7	8.7	6.5	6.1	7.1

Stroke	3,020	67.1	1,167	53.6	1,853	79.8	2,225	69.3	795	61.6
Accidents	2,183	48.5	1,442	66.2	741	31.9	1,658	51.6	525	40.7
CLRD	2,426	53.9	1,224	56.2	1,202	51.8	2,159	67.2	267	20.7
Diabetes	1,411	31.4	614	28.2	797	34.3	892	27.8	519	40.2
Inf. & pneumonia	1,153	25.6	519	23.8	634	27.3	907	28.2	246	19.1
Alzheimer's disease	1,266	28.1	358	16.4	908	39.1	1,063	33.1	203	15.7
Suicide	525	11.7	424	19.5	101	4.4	472	14.7	53	4.1
Homicide	436	9.7	338	15.5	98	4.2	161	5.0	275	21.3
HIV disease	189	4.2	143	6.6	46	2.0	50	1.6	139	10.8

Rate is per 100,000 population.

ACCIDENTAL DEATHS					
	Total	Rate	Children Under 20	Rate	
All accidents	2,183	48.5	275	22.3	
Motor vehicle	1,060	23.6	170	13.8	
Suffocation	137	3.0	18	1.5	
Poisoning	175	3.9	13	1.1	
Smoke, fire and flames	110	2.4	17	1.4	
Falls	177	3.9	1	0.1	
Drowning	59	1.3	21	1.7	
Firearms	38	0.8	7	0.6	
Other accidents	427	---	28	---	

Total rate is per 100,000 population. Child rate is per 100,000 children aged 0 to 19.

DEATHS BY AGE GROUP		
Age group	Total	Rate
Total	46,598	10.4
0 to 14	747	0.8
15 to 44	3,443	1.8
45 to 64	9,313	8.5
65 to 84	21,491	41.3
85+	11,604	162.3

Rate is per 1,000 population in age group.

Selected Cancer Site	New Cases	Deaths	Rate	Male		Female	
				Deaths	Rate	Deaths	Rate
All cancers	19,598	9,790	217.5	5,323	244.3	4,467	192.4
Trachea, bronchus, lung, pleura	3,179	3,100	68.9	1,944	89.2	1,156	49.8
Colorectal	2,269	890	19.8	448	20.6	442	19.0
Breast (female)	3,434	679	15.1	0	0.0	679	29.2
Prostate (male)	2,636	541	12.0	541	24.8	0	0.0
Pancreas	414	496	11.0	240	11.0	256	11.0
Leukemias	394	331	7.4	166	7.6	165	7.1
Non-Hodgkin's lymphomas	676	353	7.8	174	8.0	179	7.7
Ovary (female)	298	253	5.6	0	0.0	253	10.9
Brain and other nervous system	243	204	4.5	112	5.1	92	4.0
Stomach	290	186	4.1	116	5.3	70	3.0
Uterus & cervix (female)	611	175	3.9	0	0.0	175	7.5
Esophagus	209	194	4.3	153	7.0	41	1.8
Melanoma of skin	800	124	2.8	83	3.8	41	1.8
Other	4,145	2,264	---	1,346	---	918	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

AUTAUGA 2003 HEALTH PROFILE

BIRTHS BY AGE OF MOTHER					
	TOTAL	10-14	15-17	18-19	20 plus
All births	629	1	33	43	552
Rate	---	0.5	32.1	62.8	53.2
White	494	1	22	30	441
Rate	---	0.7	28.4	58.0	53.7
Black & Other	135	0	11	13	111
Rate	---	0.0	43.5	77.4	51.6

Rates for age group are per 1,000 females in specified age group (age-specific birth rate).
Births with unknown age of mother counted with the age group "20 plus".

Marriages	413
Rate	8.9
Divorces	254
Rate	5.5

Rate is per 1,000 population.

2003 POPULATION	
Total	46,491
White	37,594
Black and Other	8,897
Median age	35.5
Life expectancy at birth	74.4
Total fertility rate per 1,000 women aged 10-49	1999.0

NATALITY					
	All Women		Women 10-19		
	Total	Rate	Total	Rate	
Est. pregnancies	850	82.8	112	31.6	
Births	629	13.5	77	21.7	
Abortions	87	8.5	18	5.1	
Est. fetal losses	134	---	17	---	

Birth rate is per 1,000 population.
Pregnancy and abortion rates are per 1,000 females 15-44. Rate is per 1,000 women 10-19.

	All Women		Women 10 to 19	
	Total	Percent	Total	Percent
Births to unmarried women	201	32.0	62	80.5
Low weight births	61	9.7	10	13.0
Multiple births	19	3.0	0	0.0
Medicaid births	235	37.4	61	80.3

Percent is percent of all births with known status. Percent is percent of all births to women 10-19.

SELECTED NOTIFIABLE DISEASES	
New Cases

Melanoma of skin	25	4	2.6	1	1.3	3	3.9	
Other	151	72	---	45	---	27	---	

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin		6	1	4.7	1	9.2	0	0.0
Other		14	14	---	5	---	9	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus		*	3	14.5	3	30.8	0
Melanoma of skin		6	0	0.0	0	0.0	0
Other		20	19	---	6	---	13

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

CALHOUN 2003 HEALTH PROFILE

BIRTHS BY AGE OF MOTHER					
	TOTAL	10-14	15-17	18-19	20 plus

Melanoma of skin	*		1	4.1	0	0.0	1	8.0
Other		12	12	---	7	---	5	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	*	0	0.0	0	0.0	0	0.0
Other		5	8	4	---	4	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	*	0	0.0	0	0.0	0	0.0	
Other		8	11	---	6	---	5	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus	*		2	14.7	0	0.0	2	27.8
Melanoma of skin		6	0	0.0	0	0.0	0	0.0
Other		11	8	---	5	---	3	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Other		43	23	---	12	---	11	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus	*	3	6.1	2	8.2	1	4.0
Melanoma of skin	18	3	6.1	2	8.2	1	4.0
Other	41	22	---	18	---	4	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Stomach	*	1	1	0.0
Uterus & cervix (female)	15	2	0	5.8
Esophagus	*	6	6	0.0
Melanoma of skin	8	2	1	2.9
Other	53	32	25	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Other	106	68	---	37	---	31	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin		9	2	7.8	2	16.1	0	0.0
Other		20	15	---	11	---	4	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus	*	3	18.3	2	25.5	1	11.6
Melanoma of skin	12	0	0.0	0	0.0	0	0.0
Other	25	8	---	2	---	6	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

HOUSTON 2003 HEALTH PROFILE

BIRTHS BY AGE OF MOTHER					
	TOTAL	10-14	15-17	18-19	20 plus

Esophagus	33	25	3.8	20	6.4	5	1.4
Melanoma of skin	80	12	1.8	8	2.6	4	1.2
Other	761	328	---	192	---	136	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	20	2	2.3	0	0.0	2	4.4
Other	98	59	---	38	---	21	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	10	5	7.3	5	14.4	0	0.0
Other	47	38	---	20	---	18	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Other		20	9	---	4	---	5	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

MADISON 2003 HEALTH PROFILE

BIRTHS BY AGE OF MOTHER					
	TOTAL	10-14	15-17	18-19	20 plus
All births	3,555	9	130	232	3,184

Melanoma of skin	9	1	3.3	1	6.7	0	0.0
Other	26	14	---	9	---	5	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	7	0	0.0	0	0.0	0	0.0
Other	20	12	---	8	---	4	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin		29	4	3.6	4	7.2	0	0.0
Other		136	38	---	25	---	13	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus		*	1	3.4	0	0.0	1	6.5
Melanoma of skin		7	1	3.4	0	0.0	1	6.5
Other		25	20	---	14	---	6	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	6	3	4.4	2	5.8	1	2.9
Other	59	39	---	27	---	12	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	*		0	0.0	0	0.0	0	0.0
Other		5	5	---	1	---	4	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Melanoma of skin	37	4	2.4	3	3.7	1	1.2
Other	156	71	---	40	---	31	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

Esophagus	*	0	0.0	0	0.0	0	0.0	
Melanoma of skin	*	0	0.0	0	0.0	0	0.0	
Other		13	10	---	5	---	5	---

Rate is per 100,000 population. New cancer cases are for 2001. Asterisk indicates fewer than 5 new cancer cases.

Measurements based on small denominators should be used with caution. Rates and ratios based on a denominator of less than 50 births or less than 1,000 population are shaded. Births, abortions and estimated total fetal losses sum to the total number of estimated pregnancies. Estimated total fetal losses is not the same as the total number of fetal deaths. The total fertility rate is the sum of age-specific birth rates multiplied by the width of the intervals, i.e. 5 years. A total fertility rate of 2,100 births per 1,000 females 10-49 years of age would maintain the current population. Population estimates are from the United States Census Bureau.

APPENDIX A

The estimated populations used in this volume were produced using data from Population Projections for Alabama Counties published by the Alabama State Data Center, Center for Business and Economic Research, University of Alabama. They were derived by using the cohort-survival method.

ALABAMA'S 2003 REPORT OF INDUCED
TERMINATION OF PREGNANCY**

TECHNICAL NOTES

Sources and Completeness of Data

Data in this publication are from certificates and reports filed with the Center for Health Statistics (CHS) in the Alabama Department of Public Health according to Alabama Vital Statistics Laws. The State Registrar of Vital Records enforces the laws and administers the system of vital statistics. Birth, death, marriage and divorce certificates and fetal death and induced termination of pregnancy reports provide most of the information included in this publication. The statewide data for Alabama are also sent to the National Center for Health Statistics (NCHS) for inclusion in national reports and tabulations.

BIRTHS. If a birth occurs in a hospital, the birth certificate is filed by that institution with the CHS. Information on a birth certificate is obtained from a parent and from medical files for the mother and infant. Nearly 99 percent of the hospitals in Alabama use a birth certificate software package provided by the CHS to prepare birth certificates and electronically transmit data to CHS. If a birth occurs outside of a facility, the birth certificate is filed by the parent or someone else aware of the facts of birth. Formal testing of completeness of birth has not been done since 1950 when birth registration completeness for births occurring in hospitals was 99.6 percent. Since that time, additional checks have been added to ensure that all births are filed. Also, since the legal requirements for certified copies of births have increased, nearly 100 percent of all births are filed with CHS.

DEATHS. Mortality data are obtained from death certificates filed with CHS. In Alabama, the funeral director who first takes custody of the body is responsible for obtaining the demographic data from the next of kin and filing the death certificate. The medical certification is completed by the physician in charge of the care of the decedent for the illness or condition that resulted in death or by the county medical examiner or coroner. Registration of deaths is thought to be nearly 100 percent complete since the death certificate is needed by the next of kin for legal purposes. In addition, listings of deaths, which are independently prepared by funeral directors, coroners, hospitals, nursing homes and other institutions where deaths occur, are compared to certificates received to ensure that all deaths are filed.

MARRIAGES. The judge of probate in each county in Alabama issues a marriage license containing information obtained from the parties who intend to be married. After the marriage ceremony has taken place, the person who performs the marriage certifies the fact of marriage and returns the record to the judge of probate who forwards it to the CHS. Marriage data are believed to be nearly 100 percent complete since a license is needed prior to the ceremony being performed.

DIVORCES. Divorce certificates are prepared by the petitioner or his or her legal representative and presented to the clerk of a court where divorces are granted. The clerk of the court completes the information certifying the divorce and forwards the certificate to the CHS. While the law does require the divorce certificate to be filed before a divorce is granted, the filing of these records may not be as complete as other vital records since court procedures vary.

FETAL DEATHS. Reports of fetal death are required to be sent to the CHS if the fetus has advanced to or beyond the twentieth week of uterogestation. If the fetal death occurs in an institution, the person in charge of the institution or his or her representative is responsible for filing the report. If the fetal death occurs outside of an institution, the physician in attendance is responsible for filing the report. Since not all fetal deaths are medically attended, it is likely that there is some under reporting of these events. Evidence indicates that reporting may be better in metropolitan counties.

INDUCED TERMINATIONS OF PREGNANCY. Since 1993, reports of induced termination of pregnancy have been required for all events occurring in Alabama. If the induced termination of pregnancy occurs in an institution, the person in charge of the institution is required to file the report. If the induced termination of pregnancy occurs outside of an institution, the physician in attendance is required to file the report. From September 1987 to December 1992, the only reporting requirement for induced terminations of pregnancy was for events to women under 18 years of age as part of the Parental Consent Act. The degree of completeness for these reports is not known. However, if the CHS learns of institutions that are not aware of the reporting requirements, they are contacted and reporting is immediately initiated.

OUT OF STATE EVENTS. To have complete data for state residents, offices of vital statistics in all states have entered into an agreement to share data for statistical purposes. When a report or certificate is filed for a vital event that occurred in Alabama to a resident of another state or Canada, Alabama notifies that government. Likewise, Alabama receives information and reports about events happening to Alabama residents in other states or in Canada. Data from these out of state events are included in the tabulations of resident data presented in this publication.

Most states send reports of out of state events to CHS on an ongoing basis, and these reports are believed to be quite complete since laws and procedures in other states are quite similar to Alabama's. The exception is reports of induced termination of pregnancy which have different reporting requirements in other states. Florida, a neighboring state, does not have a procedure for reporting Alabama resident induced terminations of pregnancy to CHS. Since it is unknown how many Alabama residents may have these events in neighboring states, the number of reported induced terminations of pregnancy for Alabama residents may be somewhat low.

Quality of Data

After reports and certificates are received at CHS, they are reviewed for all necessary information and signatures. Records that are incomplete or improperly completed are returned to the provider to be redone. If the information is accurate and consistent, the record is accepted into the official vital record files for Alabama.

Data for 99 percent of the births are keyed at the hospital into software containing edits and consistency checks and are electronically transmitted to CHS. Data for deaths, fetal deaths, induced terminations of pregnancy, marriages and divorces are coded and keyed into a computer database by CHS staff. Numerous edits and consistency checks are performed on all computer files to insure that the data are as accurate as possible. If data are inconsistent or missing, the provider is queried to try to verify information provided or to obtain the correct data. Additional procedures cross-check that all births and deaths are accounted for, particularly for infant deaths.

Residence Data

Unless specifically noted otherwise, data from vital events in this publication are reported according to the county or place of residence where the person, patient or decedent actually lived. Birth, fetal death, and induced termination of pregnancy statistics are reported according to the mother's residence. Deaths are reported by the residence of the decedent. The exceptions are marriage and divorce data that are reported according to the county where the marriage certificate was issued or the divorce was finalized.

Vital events occurring in other states and Canada to Alabama residents are also included in the residence data in this publication. See discussion under SOURCES AND COMPLETENESS OF DATA -- OUT OF STATE EVENTS.

Population Denominators

The population figures used in this publication to calculate rates for 2000 are from the 2000 Census of Population. Population figures used to calculate rates for data from 1990 through 1999 were based upon projections provided by the Alabama State Data Center, Center for Business and Economic Research, University of Alabama. Since the figures used for 1990 through 1999 were created by projecting forward from the 1990 Census, the further in time from the 1990 Census, the less accurate the populations and associated rates become. Caution should be used in comparing rates for earlier years with rates for 2000 since the projections for the 1990's appear to be too low for the later part of the decade and thus, the rate may be too high.

The rates in this publication may not be the same as those given in other publications if population data are from a different source. For example, for the years between decennial national censuses, the National Center for Health Statistics (NCHS) calculates crude rates using population *estimates* provided by US Census Bureau. Those figures are calculated in retrospect based on various housing, labor and vital statistics and are not the same as the figures used in CHS publications. Therefore, rates shown for Alabama vital events in NCHS publications may be slightly different from rates in this publication.

Race

Birth, fetal death, and induced termination of pregnancy statistics are reported according to the race of the mother since many of the health conditions related to these events are directly associated with the mother. Deaths are reported by the race of the decedent. Infant deaths are tabulated by the race of the infant (the decedent) while births, the denominator used for calculating infant mortality rates, are based on the race of the mother. Data for marriages and divorces are shown for both parties to the event.

For processing purposes, ten racial groupings are used: White, Black, American Indian, Chinese, Japanese, Hawaiian, Filipino, "other Asian or Pacific Islander," "other entries," and "unknown race." However, for tables shown in this publication, these groups are consolidated into "White" and "Black and Other." "White" encompasses Mexican, Puerto Rican, Cajun, Creole, and "other Caucasian." The "Black and Other" group includes Black, American Indian, Chinese, Japanese, Hawaiian, Filipino, and "other Asian or Pacific Islander." Events of unknown race are included in the "White" category.

Population figures from the 2003 Census show the population for Alabama as 71.1 percent "White", 26.0 percent

“black”, 1.9 percent “Other Races”. One percent of the population reported two or more races and were included in the “Black and Other” population for tables shown in this publication.

Cause of Death

Alabama law requires the physician in charge of the care of the patient for the illness or condition that resulted in death to complete the medical certification section on the death certificate. The physician is requested to state the diseases or conditions that caused the death and other significant conditions contributing to death. If a death occurs with no physician in charge of the care, the county coroner or in a few counties, the medical examiner, is responsible for determining the cause of death.

CLASSIFICATION. For tabulation purposes, causes of death are coded according to the *International Classification of Diseases*¹ (ICD) which provides the essential ground rules for the coding and classification of cause-of-death data. The ICD was developed collaboratively between the World Health Organization (WHO) and ten international centers, one of which is housed at NCHS. The purpose of the ICD is to promote international comparability in the collection, classification, processing and presentation of health statistics. The United States is required to use the ICD under an agreement with WHO that has the force of an international treaty.

Besides being a classification system for the cause of death, the ICD includes coding rules. These rules identify the single condition on the death certificate considered most informative from a public health point of view, called the *underlying cause of death*. The underlying cause is the disease or injury initiating the sequence of events that leads directly to death or the circumstances of the accident or violence that produced the fatal injury.

Cause of death data in this publication were coded according to procedures established by the National Center for Health Statistics². Starting with death records for 1999, cause of death data were processed through computer software programs from NCHS which allow CHS staff to enter the literal information provided by the physician or coroner in the medical certification section of the death certificate. The software programs are written to apply WHO rules to select the underlying cause of death from all the conditions given on the death certificate. Tables in this publication contain the underlying cause of death as determined through these procedures.

TABULATION LISTS AND CAUSE OF DEATH RANKINGS. For dissemination and presentation of data, NCHS developed several tabulation lists which group causes of death codes into categories that are of public health interest and medical importance. The lists have increasing levels of detail or are for specific categories of death and are published in Part 9 of the NCHS Instruction Manual Series.³ Certain groups of causes on these lists are used for ranking causes of death to determine the leading causes of death. Starting with 1999 data, the list most widely used to identify and rank the leading causes of death in the United States is the *ICD-10 List of 113 Selected Causes of Death*. This list replaces the *ICD-9 List of 72 Selected Causes of Death* used from 1979 through 1998. For areas smaller than a state or nation, a *condensed list of selected causes* was developed to present cause of death data in Alabama.

CHANGE IN ICD. The ICD has been revised approximately once every 10 years to stay abreast with advances in medical science and to ensure the international comparability of health statistics. The tenth and most recent revision, known as the ICD-10, was first used to classify deaths that occurred on January 1, 1999 and after. The previous version, the ICD-9, was used from 1979 through 1998.

The ICD-10 is much more detailed with about 8,000 possible categories for cause of death compared with 4,000 categories in the previous version. For the first time, the ICD-10 uses alphanumeric codes. In the tenth revision of the ICD, cause of death titles have been changed and conditions have been regrouped. Some coding rules have also been changed. In addition, ICD-10 tabulation lists used in publications have also changed, so mortality data prepared under different revisions of the ICD may not be comparable.

COMPARISON OF CAUSE OF DEATH DATA. Changes in moving to a new revision of the ICD can cause major discontinuities in trend data for certain causes of death. To understand the changes in mortality rates that are simply due to the new ICD revision, NCHS double codes a large sample of deaths under each revision to develop *comparability*

¹World Health Organization. "International Statistical Classification of Diseases and Related Health Problems, Tenth Revision." Geneva: World Health Organization, 1992.

²National Center for Health Statistics. "NCHS Instruction Manual, Part 2a, Vital Statistics, Instructions for Classifying the Underlying Cause of Death." Hyattsville, Maryland: Public Health Service, published annually.

³National Center for Health Statistics, Centers for Disease Control and Prevention. "Instruction Manual Part 9, ICD-10 Cause-of-Death Lists for Tabulation Mortality Statistics, Effective 1999." Hyattsville, Maryland: October, 1997.

ratios. This is simply the ratio of deaths coded under the new revision (ICD-10) divided by the number under the old revision (ICD-9) for a particular cause of death. These ratios are given in Robert Anderson, *et. al.*, *Comparability of Cause of Death between ICD-9 and ICD-10: Preliminary Estimates*, Hyattsville, MD, National Vital Statistics Reports, Volume 49, Number 2, May 18, 2001. By applying comparability ratios to the 1999 data, an analyst can understand what the death rates would have been without the ICD-10 revision. This correction is crucial in time trend analyses. For additional information on comparability ratios, see the NCHS web site at www.cdc.gov/nchs.

Handling of Unknowns

Items with a missing value or a response of "unknown" are shown as Not Stated in tables of frequency distributions and are included in totals and subtotals. However, for calculation of rates and ratios, "unknowns" are subtracted from denominators before calculations are made.

The only exceptions to this rule are for race and sex. Events with race "unknown" are included with "white" for tabulation purposes. If sex cannot be determined, sex is considered male if the day of the event is odd and female if the day is even.

Data Techniques

Data in this publication are generally presented as frequencies, rates, ratios and percentages. Frequency distributions tell how many times an event occurred for a particular population. For purposes of comparison rates, ratios and percentages are provided to standardize the figures. A ratio is a comparison of two quantities and is generally expressed as a fraction. A rate is the number of items having a certain characteristic divided by the total number of items. Rates are generally expressed to a standard base of 100, 1,000 or 100,000. Percentages are rates standardized to a base of 100.

Demographic rates make all populations equal in size. Demographic rates such as the death rate and birth rate are calculated by dividing the number of events in a given period by the population at risk during that period. Thus, rates give the number of events per person, or the average. By standardizing all populations to the same size, we eliminate one factor that makes comparisons among areas difficult.

The base of a demographic rate may be the total population or a sub population. Rates based on the total population are called crude rates. Others are called specific rates, such as age-specific rates used for children or teenaged populations or the sex-specific rate for prostate cancer. For information on specific calculations, see the section on FORMULAS.

Small Number Limitations

When using vital events data for studying small geographic areas or for examining specific medical or social factors, the number of events reported in a given year may be very small. Understanding the statistical limitations of small numbers is important in conducting analyses. Any time something is measured, error is almost inevitable. Error can be based on the accuracy of the reports, or alternately, on the number of the events or the size of the population. Some error is random, and when the numbers are very large, random error does not affect the usefulness of the data. However, when the number of vital events is very small or the population of the area is very low, random errors in data collection, or even randomly occurring events, can cause drastic fluctuations in rates.

One way to counteract random error is to increase the number of years or enlarge the area being studied. Otherwise calculations may be correct, but of very limited practical value. In this publication, rates are given regardless of their stability; however, for rates based on very small numbers, warnings are issued in the footnotes.

DEFINITIONS

Some definitions used in this publication may vary in meaning among states or nations. Also, some subjects change in definition over time. Center for Health Statistics definitions are consistent for all publications within a given year and are generally the same definitions used by the National Center for Health Statistics. However, a data-user should always compare definitions across geographical areas and times.

ABORTION -- See INDUCED TERMINATION OF PREGNANCY. In this publication, the terms *abortion* and *induced termination of pregnancy* are used synonymously.

ADEQUACY OF PRENATAL CARE UTILIZATION INDEX (APNCU) -- This index, also known as the Kotelchuck Index of Prenatal Care, was designed as an improvement on the Kessner Index. It has 5 values: 1 = adequate plus, 2 = adequate, 3 = intermediate, 4 = inadequate and 5 = unknown. Its major advantage is that it divides the adequate into two categories. Those with adequate plus had other risk factors, which increased the number of visits. The index can serve as an indicator that some medical condition required additional prenatal care. [Kotelchuck M., "An Evaluation of the Kessner Adequacy of Prenatal Care Index and a Proposed Adequacy of Prenatal Care Utilization Index", *American Journal of Public Health*, 1994, 84(9):1414-20.]

ANNULMENT -- "To nullify, to abolish, to make void by competent authority. An annulment differs from a divorce in that a divorce terminates a legal status, whereas an annulment establishes that a marital status never existed." *Black's Law Dictionary, Sixth Edition*. In this publication, annulments are included with divorces for rate calculation purposes and are available only by place of occurrence.

BIRTH -- See LIVE BIRTH. In this publication, the terms *live birth* and *birth* are used synonymously.

BIRTH INTERVAL -- The period from the date of the current birth to the date of the last termination of pregnancy, birth or otherwise.

BIRTH ORDER -- The numeric relationship of a child to other children born alive to that mother.

CAUSE OF DEATH -- The cause of death presented in this publication is the "underlying cause" which is defined as the cause deemed responsible for the sequence of morbid events leading directly to death or the circumstances of the accident or violence that produced the fatal injury. Deaths, by cause, are classified according to the *International Classification of Diseases (ICD), Tenth Revision*, following instructions established by the National Center for Health Statistics. See Appendix C for the compilation lists and ICD 10 codes used for the leading cause of death.

DEATH -- Death is defined in *Black's Law Dictionary, Sixth Edition* as "The cessation of life; permanent cessations of all vital functions and signs." For definitions of the determination of death under other than general circumstances, the *Code of Alabama* should be consulted.

DIVORCE -- A court decree dissolving a marital relationship. A divorce from bed and board is a separation from cohabitation which does not otherwise affect the marriage and is not included in this publication. See *Code of Alabama* for additional information. For rate calculation purposes in this publication, divorces include annulments and are reported by the county where the divorce occurred.

ESTIMATED POPULATION -- Estimated population as of April 1 of the year for which the estimate is made.

ESTIMATED PREGNANCIES -- The sum of births, induced terminations of pregnancy, and estimated total fetal losses.

ESTIMATED TOTAL FETAL LOSSES -- This term, which is a component used in determining the number of estimated pregnancies, is an estimate of the total number of fetal losses regardless of the gestational age of the fetus. Estimated total fetal losses is equal to the sum of 20 percent of births and 10 percent of induced terminations of pregnancy. This formula was developed by The Alan Guttmacher Institute and is widely accepted and used. Estimated total fetal losses should be distinguished from the term fetal deaths as used in this publication. While Alabama law defines fetal death to include all gestations (see definition of FETAL DEATH), only fetal deaths of at least 20 weeks in gestation are required to be reported by Alabama law and are the only ones counted as fetal deaths in this publication.

FETAL DEATH -- "Death prior to the complete expulsion or extraction from the mother of a product of human conception, irrespective of the duration of pregnancy and which is not an induced termination of pregnancy. The death is indicated by the fact that after the expulsion or extraction the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps." *Code of Alabama, 1975, Section 22-9A-1*. While the definition of fetal death includes all gestations, only fetal deaths that have advanced to or are beyond the twentieth week of uterogestation are required to be reported under Alabama law and they are the only ones counted as fetal deaths in this publication. (Also see ESTIMATED TOTAL FETAL LOSSES.)

GESTATION -- The period of development from the time of fertilization of the ovum to birth. In these publications, the terms *gestation* and *uterogestation* are used synonymously.

INDUCED TERMINATION OF PREGNANCY -- "The purposeful interruption of an intrauterine pregnancy with the intention other than to produce a liveborn infant and which does not result in a live birth. This definition excludes management of prolonged retention of products of conception following fetal death." *Code of Alabama, 1975, Section 22-9A-1* In these publications, the terms *induced termination of pregnancy* and *abortion* are used synonymously.

INFANT DEATH -- Death of a liveborn infant under one year of age. The term excludes fetal death.

INTERNATIONAL CLASSIFICATION OF DISEASES (ICD) -- A publication of the World Health Organization (WHO) that provides the essential ground rules for the coding and classification of cause-of-death data. The purpose of the ICD and of WHO sponsorship is to promote international comparability in the collection, classification, processing and presentation of health statistics. In addition to being a classification system, the rules provide for identification of a single condition on the death certificate that is considered most informative from a public health point of view, called the underlying cause of death.

LIVE BIRTH -- "The complete expulsion or extraction from the mother of a product of human conception, irrespective of the duration of the pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. Heartbeats are to be distinguished from transient cardiac contractions; respirations are to be distinguished from fleeting respiratory efforts or gasps." *Code of Alabama, 1975, Section 22-9A-1*. In these publications, the terms *live birth* and *birth* are used synonymously.

LOW BIRTH WEIGHT -- A weight at birth of under 2,500 grams or under 5 pounds and 8 ounces.

MARRIAGE -- The legal union of a man and a woman which establishes their relationship as husband and wife. See *Code of Alabama* for additional information. Marriage data are reported by the county where the marriage occurred.

MATERNAL DEATH -- A death due to complications of pregnancy, labor, delivery, or puerperium (ICD 10 codes: O00-O99).

NEONATAL DEATH -- Death of a liveborn infant occurring within the first 27 days of life.

OCCURRENCE DATA -- Data compiled as to the geographical place where the event occurred.

PERINATAL DEATH -- Death of a fetus of 28 or more weeks gestation or death of a live born infant under seven days of age. Note that several other definitions of this term exist.

POSTNEONATAL DEATH -- Death of a liveborn infant after the first 27 days of age, but before one year of age.

RESIDENT DATA -- Data compiled as to the place of residence without regard to the geographical place where the event occurred. For births and fetal deaths, place of residence of mother is used.

TEENAGE -- In this publication, persons aged 10 years through 19 years.

TOTAL BIRTH ORDER -- An expression of the numeric relationship of the birth of a child to all deliveries to that mother regardless of the outcome of a pregnancy.

TOTAL FERTILITY RATE -- An estimate of the average number of children that 1,000 women would bear if the current age-specific birth rates remained constant.

VERY LOW BIRTH WEIGHT -- A weight at birth of under 1500 grams or under 3 pounds and 5 ounces.

FORMULAS

Birth (crude) rate	=		$\frac{\text{(number of births)}}{\text{(estimated midyear population)}}$	X	1,000
Age-specific birth rate	=		$\frac{\text{(number of live births to females in a specific age group)}}{\text{(estimated female population in that age group)}}$	X	1,000
Teen-age birth rate	=		$\frac{\text{(number of births to females aged 10-19)}}{\text{(estimated female population aged 10-19)}}$	X	1,000
Abortion rate	=		$\frac{\text{(number of abortions)}}{\text{(estimated female population aged 15-44)}}$	X	1,000
Teenage abortion rate	=		$\frac{\text{(number of abortions to females aged 10-19)}}{\text{(estimated female population aged 10-19)}}$	X	1,000
Estimated total fetal losses	=		20 percent of births + 10 percent of abortions		
Estimated pregnancies	=		number of births + number of abortions + estimated total fetal losses		
Pregnancy rate	=		$\frac{\text{(number of births + number of abortions+ estimated total fetal losses)}}{\text{(estimated female population 15-44 years of age)}}$	X	1,000
Teenage pregnancy rate	=		$\frac{\text{(number of births to females aged 10-19 + number of abortions to females aged 10-19 + estimated total fetal losses to females aged 10-19)}}{\text{(estimated female population 10-19 years of age)}}$	X	1,000
Total fertility rate	=	\sum	(five-year age-specific birth rates for females aged 10 to 49)	X	5

Percent low weight births	=	$\frac{\text{(number of births with a birth weight less than 2500 grams)}}{\text{(number of births)}}$	X	100
Infant mortality rate	=	$\frac{\text{(number of deaths to live born infants under one year of age)}}{\text{(number of live births)}}$	X	1,000
Neonatal mortality rate	=	$\frac{\text{(number of deaths to live born infants occurring within the first 27 days of life)}}{\text{(number of births)}}$	X	1,000
Post-neonatal mortality rate	=	$\frac{\text{(number of deaths to live born infants occurring after the first 27 days of life but before one year of age)}}{\text{(number of births)}}$	X	1,000
Death (crude) rate	=	$\frac{\text{(number of deaths)}}{\text{(estimated midyear population)}}$	X	1,000
Cause-specific death rate	=	$\frac{\text{(number of deaths for a specific cause)}}{\text{(estimated midyear population)}}$	X	100,000
Age-specific death rate	=	$\frac{\text{(number of deaths for a specific age group)}}{\text{(estimated midyear population for that age group)}}$	X	1,000
Marriage rate	=	$\frac{\text{(number of marriages)}}{\text{(estimated mid-year population)}}$	X	1,000
Divorce (dissolution) rate	=	$\frac{\text{(number of divorces and annulments)}}{\text{(estimated mid-year population)}}$	X	1,000

ICD-10 CODES USED IN THE 2003 COUNTY HEALTH PROFILES

SELECTED DEATHS

Heart Disease = I00-I09 or I11 or I13 or I20-I51
Cancer = C00-C99
Stroke = I60-I69
Accidents = V01-X59 or Y85-Y86
Chronic Lower Respiratory = J40-J47
Diabetes = E10-E14
Influenza & Pneumonia = J10-J18
Alzheimer's Disease = G30
Suicide = X60-X84 or Y870
Homicide = X85-Y09 or Y871
HIV = B20-B24

ACCIDENTAL DEATHS

All Accidents = V01-X59 or Y85-Y86
Motor Vehicle = V02-V04 or V090 or V092 or V12-V14 or V190-V192 or V194-V196 or
V20-V79 or V803-V805 or V83-V86 or V870-V878 or V880-V888 or
V890 or V892
Suffocation = W75-W84
Poisoning = X40-X49
Smoke, Fire & Flames = X00-X09
Falls = W00-W19
Drowning = W65-W75
Firearms = W32-W34
Other Accidents = All other accident codes not specifically mentioned above.

SELECTED CANCER SITES

All Cancers = C00-C99
Trachea, Bronchus, Lung, Pleura = C33-C34
Colorectal = C18-C21
Breast (female) = C50 and sex is female
Prostate (male) = C61
Pancreas = C25
Leukemias = C91-C95
Non-Hodgkin's Lymphomas = C82-C85
Ovary (female) = C56
Brain and other nervous system = C70-C72
Stomach = C16
Uterus & Cervix (female) = C53-C55
Esophagus = C15
Melanoma of Skin = C43
Other = All other cancer sites not mentioned specifically above

THIS IS A LEGAL RECORD AND MUST BE FILED WITH LOCAL REGISTRAR WITHIN FIVE (5) DAYS AFTER BIRTH.

ALABAMA CERTIFICATE OF LIVE BIRTH

County File Number _____ State File Number **101**

CHILD

1. NAME: First _____ Middle _____ Last _____ (Type last name all capitals)

2. DATE OF BIRTH (Month, Day, Year) _____

3. TIME OF BIRTH (Specify am or pm) _____

4. SEX _____

5. THIS BIRTH—(Specify Single, Twin, Triplet, etc.) _____

6. IF NOT SINGLE BIRTH—(Specify if this child born first, second, etc.) _____

7. COUNTY OF BIRTH _____

8. CITY, TOWN OR LOCATION OF BIRTH _____

9. FACILITY NAME (If not institution, give street, street number, and indicate INSIDE or OUTSIDE city limits) _____

10. SIGNATURE OF ATTENDANT OR CERTIFIER (I hereby certify this child was born alive on the date and place stated above) _____

11. DATE SIGNED—(Month, Day, Year) _____

CERTIFIER

12. ATTENDANT'S NAME _____

16. CERTIFIER'S NAME (If other than attendant) _____

13. ATTENDANT'S ADDRESS _____

17. CERTIFIER'S ADDRESS _____

14. TYPE OF ATTENDANT (Specify M.D., D.O., C.N.M., O.N.M., Other (Specify)) _____

15. ATTENDANT'S LICENSE NUMBER _____

18. CERTIFIER'S TITLE _____

19. SIGNATURE OF EITHER PARENT—I certify that the personal information provided on this certificate is correct. _____

20. DATE SIGNED—(Month, Day, Year) _____

21. Parent(s) request that a Social Security Number be issued for this child. (Specify Yes or No) _____

22. REGISTRAR'S SIGNATURE _____

23. DATE FILED (Month, Day, Year) _____

24. MOTHER'S MAIDEN LAST NAME _____

25. MOTHER'S LEGAL NAME: First _____ Middle _____ Last _____

26. MOTHER'S DATE OF BIRTH _____

27. MOTHER'S STATE OF BIRTH (If not in U.S.A., name country) _____

28. MOTHER'S USUAL RESIDENCE—STATE _____

29. MOTHER'S RESIDENCE—COUNTY _____

30. MOTHER'S RESIDENCE—CITY OR TOWN AND ZIP CODE _____

31. MOTHER'S RESIDENCE—STREET ADDRESS (If rural, give location) _____

32. MOTHER'S RESIDENCE—Inside City Limits (Specify Yes or No) _____

33. FATHER'S NAME: First _____ Middle _____ Last _____

34. FATHER'S DATE OF BIRTH _____

35. FATHER'S STATE OF BIRTH (If not in U.S.A., name country) _____

ALL ITEMS MUST BE COMPLETE AND ACCURATE. ADPH-HS 1/Rev. 10-93

CONFIDENTIAL

The following section will not be shown on certified copies.

CONFIDENTIAL INFORMATION FOR MEDICAL AND HEALTH USE ONLY

36. FATHER—OF HISPANIC ORIGIN—(Specify Yes or No) If Yes, Specify Cuban, Mexican, Puerto Rican, etc. _____

37. FATHER'S RACE—(Specify American Indian, Black, White, etc.) _____

38. FATHER'S SOCIAL SECURITY NUMBER _____

39. FATHER'S OCCUPATION _____

40. FATHER'S INDUSTRY _____

41. FATHER'S EDUCATION (Specify ONLY highest grade completed): ELEMENTARY OR HIGH SCHOOL (0-12) _____ COLLEGE (1-4 or 5-1) _____

42. MOTHER—OF HISPANIC ORIGIN—(Specify Yes or No) If Yes, Specify Cuban, Mexican, Puerto Rican, etc. _____

43. MOTHER'S RACE—(Specify American Indian, Black, White, etc.) _____

44. MOTHER'S SOCIAL SECURITY NUMBER _____

45. MOTHER'S OCCUPATION _____

46. MOTHER'S INDUSTRY _____

47. MOTHER'S EDUCATION (Specify ONLY highest grade completed): ELEMENTARY OR HIGH SCHOOL (0-12) _____ COLLEGE (1-4 or 5-1) _____

48. MOTHER MARRIED—(Specify Yes or No) _____

49. DATE LAST NORMAL MENSTRUATION BEGAN (Month, Day, Year) _____

50. MONTH OF PREGNANCY PRENATAL CARE BEGAN—First, Second, etc. _____

51. PROVIDERS OF PRENATAL CARE (Check all that apply): PRIVATE PHYSICIAN HOSPITAL HEALTH DEPARTMENT COMMUNITY HEALTH CENTER NONE OTHER (Specify) _____

52. TOTAL NUMBER OF VISITS TO ALL PROVIDERS _____

53. MAIN SOURCE OF PAYMENT FOR THIS BIRTH: MEDICAID PRIVATE INSURANCE SELF PAY OTHER _____

54. DID INFANT RECEIVE NEONATAL INTENSIVE CARE (Specify Yes or No) _____

55. AT TIME OF THIS REPORT INFANT WAS—(Specify Alive or Dead) _____

56. PREGNANCY HISTORY—(Exclude this Child) (Complete each item): a. NUMBER BORN ALIVE—NOW LIVING _____ b. NUMBER BORN ALIVE—NOW DEAD _____ c. NUMBER BEFORE 20 WEEKS _____ d. NUMBER AT 20 WEEKS OR MORE _____

57. DATE OF LAST LIVE BIRTH (Month, Day, Year) (Exclude this child) _____

58. DATE OF LAST OTHER TERMINATION (Month, Day, Year) _____

59. APGAR SCORE: a. At 1 minute _____ b. At 5 minutes _____

60. WEIGHT AT BIRTH (Enter in grams) _____

61. CLINICAL ESTIMATE OF GESTATION—Weeks _____

62. MOTHER TRANSFERRED PRIOR TO DELIVERY (Specify Yes or No) If yes, enter name of facility transferred to: _____

63. INFANT TRANSFERRED (Specify Yes or No) If yes, enter name of facility transferred to: _____

64. MEDICAL RISK FACTORS FOR THIS PREGNANCY (Check all that apply): Anemia (Hct <30, Hgb <10) _____ 01 Cardiac disease _____ 02 Acute or chronic lung disease _____ 03 Diabetes _____ 04 Genital herpes _____ 05 Hydatidiform mole _____ 06 Hemoglobinopathy _____ 07 Hypertension, chronic _____ 08 Hypertension, pregnancy-associated _____ 09 Eclampsia _____ 10 Incompetent cervix _____ 11 Previous infant >4000 g grams _____ 12 Previous preterm or small-for-gestational-age infant _____ 13 Renal disease _____ 14 Rh sensitization _____ 15 Uterine bleeding _____ 16 None _____ 00 Other _____ 17 (Specify)

65. OTHER RISK FACTORS FOR THIS PREGNANCY (Complete all items): Tobacco use during pregnancy Yes No Average number cigarettes per day _____ Alcohol use during pregnancy Yes No Average number drinks per week _____ Weight gained during pregnancy _____ lbs Cocaine, Heroin, Marijuana, Methamphetamines or street drugs used during pregnancy Yes No

66. OBSTETRIC PROCEDURES (Check all that apply): Amniocentesis _____ 01 Electronic fetal monitoring _____ 02 Induction of labor _____ 03 Stimulation of labor _____ 04 Forceps _____ 05 Ultrasound _____ 06 None _____ 00 Other _____ 07 (Specify)

67. COMPLICATIONS OF LABOR AND/OR DELIVERY (Check all that apply): Febrile (>100 °F or 38 °C) _____ 01 Meconium, moderate/heavy _____ 02 Premature rupture of membrane (>12 hours) _____ 03 Abruptio placentae _____ 04 Placenta previa _____ 05 Other excessive bleeding _____ 06 Seizures during labor _____ 07 Precipitous labor (<3 hours) _____ 08 Prolonged labor (>20 hours) _____ 09 Dysfunctional labor _____ 10 Breech/Malpresentation _____ 11 Cephalopelvic disproportion _____ 12 Cord prolapse _____ 13 Anesthetic complications _____ 14 Fetal distress _____ 15 None _____ 00 Other _____ 16 (Specify)

68. METHOD OF DELIVERY—(Check all that apply): Vaginal _____ 01 Vaginal birth after previous C-section _____ 02 Primary C-section _____ 03 Repeat C-section _____ 04 Forceps _____ 05 Vacuum _____ 06

69. ABNORMAL CONDITIONS OF THE NEWBORN (Check all that apply): Anemia (Hct <30, Hgb <13) _____ 01 Birth injury _____ 02 Fetal alcohol syndrome _____ 03 Neonatal membrane disease/RDS _____ 04 Meconium aspiration syndrome _____ 05 Assisted ventilation <30 min _____ 06 Assisted ventilation ≥30 min _____ 07 Seizures _____ 08 None _____ 00 Other _____ 09 (Specify)

70. FAMILY HISTORY OF HEARING LOSS/DEAFNESS AT AN EARLY AGE Yes No Unknown

71. CONGENITAL ANOMALIES OF CHILD (Check all that apply): Anencephalus _____ 01 Spina bifida, meningocele _____ 02 Hydrocephalus _____ 03 Microcephalus _____ 04 Other central nervous system anomalies _____ 05 (Specify) Heart malformations _____ 06 Other circulatory or respiratory anomalies _____ 07 (Specify) Renal anomalies _____ 08 Tracheo-esophageal fistula, esophageal atresia _____ 09 Omphalocele/gastrochisis _____ 10 Other gastrointestinal anomalies _____ 11 (Specify) Malformed genitalia _____ 12 Renal agenesis _____ 13 Other urogenital anomalies _____ 14 (Specify) Cleft lip/palate _____ 15 Polydactyly, syndactyly, adactyly _____ 16 Club foot _____ 17 Diaphragmatic hernia _____ 18 Other musculoskeletal/integument anomalies _____ 19 (Specify) Down's syndrome _____ 20 Other chromosomal anomalies _____ 21 (Specify) None _____ 00 Other _____ 22 (Specify)

DISCLOSURE OF SOCIAL SECURITY NUMBER IS REQUIRED BY FEDERAL LAW.

PUBLICATIONS AVAILABLE FROM THE CENTER FOR HEALTH STATISTICS

(NOTE: Many tables from these publications for 1998 through 2003 are available on the Department of Public Health website at www.adph.org, then click on Fast Find, then Health Statistics.)

CODE	TITLE/DESCRIPTION OF PUBLICATION	COST
AVE	Alabama Vital Events (1972-1993) <u>NOTE:</u> This publication is no longer available.	Unavailable
AV1	Alabama Vital Events (1994-1998) - Volume I, Pregnancy Statistics This annual publication contains the same information as was presented in the "Nativity" section of the <u>Alabama Vital Events</u> publication for the years 1986 through 1993. Additional information on Fetal Deaths and Pregnancies have been included with natality data. <u>NOTE:</u> Limited copies of these publications are available from the Center for Health Statistics..	\$10.00
AV2	Alabama Vital Events (1994-1998) - Volume II, Mortality Statistics This annual publication contains the same information as was presented in the "Mortality" section of the <u>Alabama Vital Events</u> publication for the years 1986 through 1993. The sub-section on Fetal Deaths has been moved from this publication into Volume I on Pregnancy Statistics. <u>NOTE:</u> Limited copies of these publications are available from the Center for Health Statistics..	\$10.00
AV3	Alabama Vital Events (1994-1998) - Volume III, Marriage and Divorce Statistics This annual publication contains the same information as was presented in the "Marriage" and "Divorce" sections of the <u>Alabama Vital Events</u> publication for the years 1986 through 1993. <u>NOTE:</u> Limited copies of these publications are available from the Center for Health Statistics..	\$10.00
AV4	Alabama Vital Events (1994-1998) - Volume IV, County Profiles This annual publication is an enhancement of the "Area Profile" section of the <u>Alabama Vital Events</u> publication for the years 1986 through 1993. Additional information has been included to make profile contents more valuable to the user. <u>NOTE:</u> Limited copies of these publications are available from the Center for Health Statistics..	\$10.00
AV5	Alabama Vital Events - Volume V, Life Expectancy (1995) This publication contains tables on life expectancy by race, sex, and age group for residents of Alabama. This volume of the <u>Alabama Vital Events</u> publication is published starting with the data year 1995 and quinquennially thereafter. <u>NOTE:</u> Limited copies of this publication is available from the Center for Health Statistics..	\$20.00
AVX	Alabama Vital Events (1998) - Volumes I-IV This code should be given when ordering a complete set of Volumes 1 through V of the <u>Alabama Vital Events</u> publication. Part V on life expectancy will be included at no additional costs during years for which this part is published.	\$40.00
AVS	Alabama Vital Statistics (1999-2003) This code should be given when ordering the <u>Alabama Vital Statistics</u> publication for 1999 through 2003. This is a new publication consolidating and replacing the previously published Volumes I (AV1), II (AV2), and III (AV3) of the <u>Alabama Vital Events</u> publication.	\$15.00
CHP	County Health Profiles (1999-2003) This annual publication has been revised and is a newly published version of what was formerly Volume IV (AV4) "County Profiles" of the <u>Alabama Vital Events</u> publication for the years 1994 through 1998. The 1999 through 2003 publications contain only two pages of selected data on each county, but the contents are still valuable and very useful to the user.	\$15.00
DMS	Detailed Mortality Statistics <u>NOTE:</u> This publication is no longer available.	Unavailable
ABR	Alabama Births by Residence and Occurrence <u>NOTE:</u> This publication is no longer available.	Unavailable
TBS	Teenage Birth Statistics <u>NOTE:</u> This publication is no longer available.	Unavailable

PUBLICATIONS AVAILABLE FROM THE CENTER FOR HEALTH STATISTICS-continued

MCH Selected Maternal and Child Health Statistics

\$10.00

This annual publication contains selected information on pregnancy and events related to pregnancy including live births, fetal deaths, perinatal deaths and infant deaths. Information on deaths to Alabama residents under 20 years of age is also included. Publication contents are intended to provide information to policy makers and planners on topics of interest in maternal and child health. This publication is a supplement to Alabama Vital Events, containing approximately 97 pages, and is available for 1993 through 2003.

(Additional publications on selected subjects are available upon request. The lower part of the page may be copied or detached and used as an order form. Please send check or money order made payable to the Center for Health Statistics along with your request since payment must be received prior to filling the order.)
