Webcast - Watch with RealPlayer or Windows Media Player. Test your computer with the "test connection link" at www.adph.org/alphtn

Audio - To listen by phone, call 1-888-557-8511. Enter access code 972-1530 #.
Press # again to listen to the conference.

On Demand - Available 2-3 business days after the live broadcast from the On Demand page of our website.

Conference Materials: Posted on our website approximately one week before the program for registered participants.

Conference Details Questions: Call: 334-206-5618 | Email: alphtn@adph.state.al.us

Not all patient assessments are the same, especially when it comes to infant and pediatric patients. Do not assume that just because you can successfully complete an adult assessment that you can complete one on a younger patient as well. Children and infants are not only smaller than adults, but also, they're significantly different physiologically. Understanding each patient's unique characteristics will aid in recognizing normal variations found during the physical examination and assist in recognizing the different responses children have to illness and injury.
