Recent studies show that rape is still all too prevalent. Somewhere in America, a woman is raped every two minutes. By the age of 18, one in four girls and one in six boys will be victimized. In fact, you are most likely to be raped by someone you know: a friend, an acquaintance, a relative or even the neighbor next door. Specifically, Alabama Coalition Against Rape (ACAR) works to improve treatment of and services to sexual assault victims, increase the reporting of sexual assaults, increase public awareness of sexual assault and improve investigation and prosecution of sexual assault. This training will cover important information to help support caregivers in providing better service and care to sexual assault victims.
