

How to avoid misinformation

FAKECTE

4 in 10 U.S. adults

reported avoiding medical care because of concerns related to COVID-19*

Delaying or avoiding urgent or emergency care was more common among:

People with disabilities

People with two or more underlying conditions

*Web-based survey of a representative sample of U.S. adults aged ≥18 years during June 24–30, 2020

Telehealth may help people get the care they need

Even during the COVID-19 pandemic, people who experience a medical emergency should seek care **without delay**
