

10 Core HIV Prevention Tasks for Network Subcommittees

1. Bridge gaps with consumers using focus groups, chat rooms, and panel discussions with emphasis on utilizing HIV positive speakers.
2. Dialogue, outreach, and involvement should be continued with high risk negatives such a MSM, prostitutes, pregnant teens, etc.
3. Conduct prevention activities in high-risk communities (bars, prisons, housing communities and alternative schools).
4. Monthly meetings may have more value in retaining member instead of bi-monthly meetings.
5. Increase involvement and face to face meetings with ASO's and other CBO's in communities.
6. Make a calendar of screening events and other activities for Network members.
7. Local HIV Prevention Networks should develop a standardized flyer about their network.
8. Access more user friendly epi-profile fact sheets and/or documents.
9. Identify an innovative intervention or strategy to mobilize the Network region or designated communities on HIV prevention for identified targeted/high risk audiences.
10. Collaborate more with other Health, Education, Social Service and other institutional professionals (nurses, social workers, guidance counselors, etc.).
