Note: All amounts over a dollar round up to the next whole dollar. The 2019 poverty guidelines were updated on January 11, 2019 and are applicable beginning January 13, 2019.

* For each additional family member, add this amount to the 400% FPL for a household size of eight. For example, the 400% FPL income eligibility limit for a family size of 10 with the client paid every two weeks (e.g., every other Friday) would be calculated by adding \$680 for each family member above 8 (\$6,682) as follows:

$$\$6,682 \text{ (family size 8)} + \$680 \text{ (added for first additional family member)} + \$680 \text{ (added for second additional family member)} = \$8,042.$$

To claim a dependent, the applicant must provide more than one half of all financial support for the dependant and the dependant must reside with the applicant.

† Alabama’s RWHAP Part B income eligibility increased to 400 percent of the FPL on April 1, 2017.
