Good Choice Program: General Info

Getting Started
The Alabama Healthy Vending Machine Program (AHVMP) increases access to healthier foods and beverages in worksites and other locations. The AHVMP utilizes nutrition standards to define healthier snacks and beverages, which are identified using the "Good Choice" logo in vending machines and anywhere else snacks and beverages are available. If you want to offer healthier snacks and beverages at your organization, the AHVMP (also called the “Good Choice Program”) could be right for you.

Nutrition Standards
With the AHVMP, between 25 and 100% of snacks in the vending machines meet the nutrition standards (also called the 10-10-5 rule) outlined in the AHVMP fact sheet. These snacks are then identified using the “Good Choice” logo (check out our toolkit for downloadable stickers).

“Good Choice” Logo
The "Good Choice" logo should only be used to identify snacks in a vending machine that meet the nutrition standards for the AHVMP, and may not be used with other nutrition vending standards. It is an attractive visual with a positive message that makes it easy to select healthy snacks and beverages.
