Put some brush & floss in your life today!

Children who see a dentist in their first year have dental costs that are 40% lower than those who wait until after one year of age.

Drinking fluoridated water is the most efficient way to prevent one of the most common childhood diseases, dental decay.

An estimated 51 million school hours are lost each year due to dental related illness.

Bacteria that causes cavities can be passed to children by simple routine activities like sharing spoons, cups or straws, testing food temperatures and licking pacifiers.
