# FLORENCE ADULT TOBACCO SURVEY 

## Introduction

The Capstone Poll at The University of Alabama conducted a survey of Florence residents for the Alabama Department of Public Health to gauge current tobacco-related behavior and attitudes regarding smoking, exposure to secondhand smoke, and policies affecting tobacco use. The survey was conducted in the spring and summer of 2015, and generally followed the CDC methodology guidelines for the Adult Tobacco Survey. There were 446 respondents who completed the questions which are available in Appendix A (p. 59).

The study population for the survey included a random sample of adult residents of Florence, Alabama, who were 18 years and older. The interviews were conducted by telephone at the Capstone Poll at The University of Alabama between March 6 and July 13, 2015. Percentages based on the full sample (446 interviews) have a margin of error of $\pm 5$ percentage points with a $95 \%$ confidence level. It is important to note that percentages based on subgroups of the sample will have a larger margin of error. For example, a subsample of 200 respondents would have a margin of error of $\pm 7$ percentage points, and a subsample of 100 respondents would have a margin of error of $\pm 10$ percentage points.

The respondents were contacted by calling a sample of random residential phone numbers (landlines) and a sample of random cell phone numbers in the Florence area. For each successful household contact, a respondent was randomly selected from among all the adults in the household using an automated algorithm based on the number of males and females. If the selected respondent was available, an interview was attempted; if the selected respondent was not available, a call back was arranged. For cell phones, the individual answering the phone was considered the target respondent. The target sample for the survey was 300 landline interviews and 100 cell phone interviews, for a total of 400 completions. The final sample consisted of 345 completions via landline and 101 completions via cell phone.

The interviews were conducted by experienced telephone interviewers employed by the Capstone Poll. The interviewers received additional training specific to the questionnaire used in this project. An experienced supervisor was present during the interview process. Calls were made Monday - Sunday, with at least seven callback attempts at varying times of day for landlines and five attempts for cellphones.

The results of the study are described on pages 2-7, with items grouped by topic. Response frequencies are reported on pages $8-17$. Crosstabulations of each question by smoking status (Current Smoker, Nonsmoker), by race (white, black, other), and by sex of the respondent are displayed in tables beginning on page 18.

For this study, current smokers are defined as respondents who indicated that they have smoked at least 100 cigarettes in their life and who currently smoke every day or some days. Former smokers are respondents who indicated they have smoked at least 100 cigarettes in their life and currently do not smoke. Nonsmokers are those who have not smoked at least 100 cigarettes.

For all crosstabulation tables, the significance level of the Pearson's Chi-square statistic is reported in the upper left-hand cell of the table. Significance levels can be characterized as not significant ( $p>.10$ ), marginally significant ( $.05<p<.10$ ), or significant ( $p<.05$ ). A statistically significant Chi-square test indicates a reliable difference in the distribution of responses between the groups being compared. The marginally significant differences may show trends that are of interest; however, they are not considered to be as reliable as the reported significant differences and should be interpreted more cautiously.

For reporting the crosstabulations by race, three groups are included: White, Black or African American, and Other. However, all of the statistical tests for revealing differences based on race were conducted using only the White and Black or African American groups. This was done because the "other" race category is rather small, and group comparisons conducted through crosstabulations yield cells for this category with very small numbers, especially when questions are only asked of current smokers or other subsets of the sample. These numbers are too small to be used appropriately in the statistical tests.

Unless otherwise indicated, the results presented in this report are based on data that have been weighted. Design weights adjusted for unequal probabilities of selection due to the number of telephone lines in a household and the number of adults within the household. In addition, the landline data were weighted to adjust for stratification into Genesys-listed and non-Genesys-listed strata. Finally, raked poststratification weights were applied to adjust to census-based proportions of adults for sex, age, race, and cellphone-only households within the state of Alabama.

## Results

## General Health (Q1)

Over two thirds of respondents reported that they had very good (35.5\%) or good (29.0\%) general health. The remaining third reported their general health as excellent (15.0\%), fair (15.3\%), poor (4.8\%), or they didn't know ( $0.3 \%$ ). Non-smokers and men were significantly more likely to report better health compared to current smokers and women. Responses about general health did not differ by race.

## Cigarette Smoking Prevalence and History (Q2-Q7, Smoking Status)

Prevalence. Approximately seven out of ten respondents (66.9\%) reported they had tried smoking regular cigarettes. Among these, $56.7 \%$ reported having smoked at least 100 cigarettes in their entire lifetime. Among those who had smoked at least 100 cigarettes, $31.4 \%$ reported currently smoking every day, $2.9 \%$ reported smoking some days, and $63.2 \%$ reported not smoking at all. Approximately one in seven respondents ( $14.0 \%$ ) are considered current cigarette smokers, with $24.0 \%$ former smokers, and $62.0 \%$ who were never smokers. Women and black respondents were less likely than males and white respondents to be current smokers. Smoking status by race and gender are presented in the table below.

|  | Race |  |  |  |  | Gender |  | Total |
| :--- | :--- | :---: | :---: | :--- | :--- | :--- | :--- | :--- |
|  | White | Black | Other |  | Male | Female |  |  |
| Current smoker | $15.1 \%$ | $9.1 \%$ | $14.6 \%$ |  | $17.6 \%$ | $11.0 \%$ | $14.0 \%$ |  |
| Former smoker | $27.1 \%$ | $12.3 \%$ | $21.2 \%$ |  | $34.2 \%$ | $15.5 \%$ | $24.0 \%$ |  |
| Never smoker | $57.8 \%$ | $78.6 \%$ | $64.2 \%$ |  | $48.2 \%$ | $73.5 \%$ | $62.0 \%$ |  |
|  | $100 \%$ | $100 \%$ | $100 \%$ |  | $100 \%$ | $100 \%$ | $100 \%$ |  |

Electronic Cigarettes. All participants were asked about their use of electronic cigarettes or E-cigarettes such as Ruyan or Njoy and their perceptions of the harmfulness of E-cigarettes. Approximately two in every ten participants (21.4\%) said they had used E-cigarettes, and approximately two in 30 (6.3\%) had done so in the past 30 days. Very few (5.7\%) thought E-cigarettes are more harmful than smoking regular cigarettes, while approximately one-third said they are less harmful (29.8\%), one-third said they are just as harmful (35.7\%), and approximately one-third (28.7\%) said they did not know. Men were more likely than women to say electronic cigarettes are less harmful than regular cigarettes, while black participants were more likely than other groups to say electronic cigarettes are just as harmful as regular cigarettes. Current smokers and men were more likely than non-smokers and women to have used E-cigarettes, and black participants were less likely than others to have used E-cigarettes.

## Secondhand Smoke (Q8-Q9)

Overall, $62.2 \%$ of participants thought that breathing smoke from other people’s cigarettes was very harmful to your health. There were significant differences based on smoking status, race and gender in that smokers, men, and black participants were less likely than non-smokers, females, and white participants to think that breathing smoke from other people's cigarettes was very harmful to one's health. Over a third of respondents ( $33.6 \%$ ) said they believe that breathing secondhand smoke is more harmful to one's health than smoking one's own cigarettes. Women and black participants were significantly more likely than men and white participants to believe that breathing secondhand smoke is more harmful than smoking one's own cigarettes.

## Tobacco Presence Near Home (Q10-Q12)

Approximately $20 \%$ of respondents said they have smelled tobacco smoke in their home that comes from outside, such as from another apartment or outside the building. Non-smokers and black participants were significantly more likely than smokers and white participants to have smelled tobacco smoke outside their home. A majority of respondents reported they would prefer to live in a building where smoking is prohibited inside (61.7\%), while $55.2 \%$ of respondents indicated they would prefer living where smoking is prohibited outside of the building.

Smokers were much less likely than non-smokers to prefer living in a building where smoking was banned inside or outside the property. Women were significantly more likely than men to indicate that smoking should be banned outside of the building.

## Smoking Restrictions Indoors and Outdoors (Q13-Q16)

Four questions asked respondents whether they thought smoking should be allowed in specific locations always, only at some times or in some places, or never. The first question asked respondents about smoking in restaurants; the second asked about smoking in bars, casinos, or clubs; the third referenced inside workplaces; and the fourth asked about parks. Approximately $70 \%$ of respondents indicated that smoking indoors in restaurants should never be allowed, while $25.0 \%$ indicated it may be allowed sometimes, and $3.2 \%$ thought it should always be allowed. Respondents were more split, however, on whether smoking should be allowed inside bars and clubs ( $40.9 \%$ never allowed, $37.9 \%$ sometimes,
15.7\% always). At workplaces, $82.0 \%$ of respondents said smoking indoors should never be allowed, $16.9 \%$ said sometimes or in some places, and $0.5 \%$ said always. For parks, $48.8 \%$ respondents indicated that smoking should never be allowed, $35.9 \%$ said sometimes, and $13.7 \%$ said always.

Smokers and males were more likely than non-smokers and females to report that smoking should always be allowed in bars, casinos, or clubs. They were also more likely to endorse that smoking should be allowed sometimes in restaurants and always allowed in parks. Black participants were more likely to say smoking should be allowed in some places or sometimes in parks and in bars, casinos, or clubs, while white participants were more likely to smoking should always be allowed in bars, casinos, or clubs.

## Monitoring Others’ Tobacco Use (Q17-Q18, Q28)

Two questions assessed the likelihood of respondents asking a stranger to not smoke around them if they were unable to move or if a non-smoking policy was in place. Only $42.9 \%$ of respondents would be very likely to ask a stranger not to smoke if they could not move, and an additional $33.9 \%$ would be somewhat likely. However, $74.1 \%$ of respondents indicated that they would be very likely to tell a stranger not to smoke if there was a non-smoking policy in place, and 13.9\% would be somewhat likely. More nonsmokers indicated that they would be very likely or somewhat likely to tell a stranger to not smoke if they were not able to move away or if a non-smoking policy was in place as compared to smokers. More white than black participants said they were not at all likely to ask a stranger not to smoke if they were unable to move away from the smoke.

Approximately nine out of ten respondents (88.8\%) said policies that do not allow smoking in indoor or outdoor public places should be strictly enforced. Non-smokers and women were more likely than smokers and men to affirm strict enforcement of such policies.

## Tobacco Taxes (Q19-Q20, ELCIGTAX)

Three questions asked respondents to indicate if they would be in favor of additional tobacco-related taxes. A majority of respondents indicated that they would be in favor of an increase in the state tax on a pack of regular cigarettes if the money was used to fund Medicaid (72.7\%) or to fund tobacco prevention programs for youth (73.4\%). A majority would also be in favor of starting a tax on electronic cigarettes (68.3\%). Non-smokers and women were more likely than smokers and men to be in favor of increased taxes that would support Medicaid and prevention program for youth. Smokers, however, were more likely to favor an increase to fund Medicaid than an increase to fund youth prevention programs. White participants and women were more likely than black participants and men to support a tax on electronic cigarettes. Among the three proposals, smokers gave their highest level of support to a tax on electronic cigarettes, with $58.7 \%$ saying they would favor such a tax.

## Demographics (Q21-Q27, Marital2-Income)

Demographic questions were asked in this survey to describe the characteristics of the sample and to allow for comparing the sample characteristics to the actual Florence population. The following table presents both the unweighted and the weighted frequencies for the demographic questions. The questions used to weight the data were sex, age, race, and cellphone only households. A comparison of the demographics for landline and cell phone samples is available in Appendix B (p. 65).

|  | Unweighted Percent | Weighted Percent |
| :--- | :---: | :---: |
| Sex |  |  |
| Male | 39.2 | 45.2 |
| Female | 60.8 | 54.8 |
| Age (collapsed into categories) |  |  |
| 18-24 | 3.6 | 18.4 |
| $25-34$ | 6.1 | 15.6 |
| $35-44$ | 7.2 | 13.0 |
| $45-54$ | 11.7 | 15.4 |
| $55-64$ | 21.1 | 16.3 |
| 65 and older | 50.3 | 21.3 |
| Race |  |  |
| White | 75.1 | 78.4 |
| Black or | 13.7 | 17.1 |
| African American | 9.9 | 3.1 |

## Smoking Status by Demographics

Crosstabulations of various demographic variables by smoking status appear on pages 25-30. As seen in these tables, in comparison to non-smokers, smokers are more likely to be male, have lower income, have no health insurance, have less education, and be in the middle age brackets (rather than youngest or oldest age groups); and they are less likely to be married and to have voted in the last presidential election.

## Weighted Frequencies

(Q1) Would you say that in general your health is ...

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | 1 - excellent | 67 | 15.0 | 15.0 | 15.0 |
|  | 2 - very good | 158 | 35.5 | 35.5 | 50.5 |
|  | 129 | 29.0 | 29.0 | 79.5 |  |
|  | 68 | 15.3 | 15.3 | 94.9 |  |
|  | 5 poor | 21 | 4.8 | 4.8 | 99.7 |
|  | 6 - don't know/not | 2 | .3 | .3 | 100.0 |
|  | sure | 446 | 100.0 | 100.0 |  |
|  | Total |  |  |  |  |

(Q2) Have you ever tried smoking regular cigarettes, even one or two puffs?

|  |  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |
| :---: | :--- | :---: | :---: | :---: | :---: |
| Valid | 1-yes | 298 | 66.9 | 66.9 | 66.9 |
|  | 2 - no | 148 | 33.1 | 33.1 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q3) (If Yes to Q2) Have you smoked at least 100 cigarettes in your entire life?

|  |  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  | 1-yes | 169 | 38.0 | 56.7 | 56.7 |
| Valid | 2-no | 129 | 28.9 | 43.3 | 100.0 |
|  | Total | 298 | 66.9 | 100.0 |  |
| Missing | System | 148 | 33.1 |  |  |
| Total |  | 446 | 100.0 |  |  |

(Q4) (If Yes to Q3) Do you now smoke [regular] cigarettes every day, some days, or not at all?

|  | Frequency | Percent | Valid Percent | Cumulative Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  | 1 - everyday | 53 | 11.9 | 31.4 | 31.4 |
|  | 2 - some days | 5 | 1.1 | 2.9 | 34.3 |
| Valid | 3-not at all | 107 | 24.0 | 63.2 | 97.4 |
|  | 4 - don't know/not sure | 4 | 1.0 | 2.6 | 100.0 |
|  | Total | 169 | 38.0 | 100.0 |  |
| Missing | System | 277 | 62.0 |  |  |
| Total |  | 446 | 100.0 |  |  |

## SmokingStatus

Current: smoked at least 100 cigarettes and currently smoke every day or some days; Former: smoked at least 100 cigarettes and do not smoke now; Never: have not smoked 100 cigarettes

|  |  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | Current Smoker | 62 | 14.0 | 14.0 | 15.0 |
|  | Former Smoker | 107 | 24.0 | 24.0 | 38.0 |
|  | Never Smoker | 277 | 62.0 | 62.0 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

SmokingStatus2

|  |  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | Current Smoker | 62 | 14.0 | 14.0 | 15.0 |
|  | Non-Smoker | 384 | 86.0 | 86.0 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q5) Have you ever used electronic cigarettes or E-cigarettes such as Ruyan or Njoy?

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | Yes | 96 | 21.4 | 21.4 | 21.4 |
|  | No | 347 | 77.8 | 77.8 | 99.2 |
|  | don't know/not sure | 3 | .8 | .8 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q6 )During the past 30 days, on how many days did you use electronic cigarettes or E-cigarettes such as Ruyan or NJOY?

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
|  | None | 68 | 15.2 | 70.8 | 70.8 |
|  | 1 days | 10 | 2.2 | 10.4 | 81.2 |
|  | 2 days | 1 | .2 | 1.0 | 82.2 |
|  | 3 days | 10 | 2.2 | 10.4 | 92.6 |
| Valid | 14 days | 3 | .7 | 3.1 | 95.7 |
|  | 20 days | 0 | .1 | .1 | 95.8 |
|  | 30 days | 4 | .9 | 4.2 | 100.0 |
|  | Total | 96 | 21.5 | 100.0 |  |
| Missing | System | 350 | 78.5 |  |  |
| Total |  | 446 | 100.0 |  |  |

(Q7) In your opinion, are electronic cigarettes or E-cigarettes such as Ruyan or Njoy less harmful, more harmful, or just as harmful as smoking cigarettes?

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | 1 - more harmful | 25 | 5.7 | 5.7 | 5.7 |
|  | 2 - less harmful | 133 | 29.8 | 29.8 | 35.5 |
|  | 159 | 35.7 | 35.7 | 71.3 |  |
|  | 128 | 28.7 | 28.7 | 100.0 |  |
|  | sure | 446 | 100.0 | 100.0 |  |

(Q8) Do you think that breathing smoke from other people's cigarettes or from other tobacco products is ...

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |
| :--- | :---: | :---: | :---: | :---: |
| 1 - not at all harmful to your <br> health <br> 2 - somewhat harmful to | 31 | 6.9 | 6.9 | 6.9 |
|  | 126 | 28.2 | 28.2 | 35.1 |
|  | 277 | 62.2 | 62.2 | 97.3 |

Q9) Do you believe that breathing secondhand smoke is more harmful to your health than smoking your own cigarettes?

|  |  | Frequency | Percent | Valid Percent | Cumulative Percent |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Valid | 1 - yes | 150 | 33.6 | 33.6 | 33.6 |
|  | 2 - no | 240 | 53.8 | 53.8 | 87.4 |
|  | 3 - don't know/not sure | 56 | 12.6 | 12.5 | 99.9 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q10) Have you smelled tobacco smoke in your home that comes from from outside your home [from another apartment or outside the building]?

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | 1-yes | 88 | 19.8 | 19.8 | 19.8 |
|  | 357 | 80.0 | 80.0 | 99.8 |  |
|  | 1 | .2 | .2 | 100.0 |  |

(Q11) Would you prefer to live in a building where smoking is prohibited inside all apartments?

|  |  | Frequency | Percent | Valid Percent | Cumulative Percent |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Valid | 1 - yes | 275 | 61.7 | 61.7 | 61.7 |
|  | 2 - no | 78 | 17.5 | 17.5 | 79.1 |
|  | 3 - not applicable/don't live in apartment | 81 | 18.3 | 18.3 | 97.4 |
|  | 4 - don't know/not sure | 12 | 2.6 | 2.6 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q12) Would you prefer to live in a building where smoking is prohibited on outside property?

|  | Frequency | Percent | Valid Percent | Cumulative <br> Percent |  |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Valid | 1 - yes | 246 | 55.2 | 55.2 | 55.2 |
|  | 3-not applicable/house or | 97 | 21.6 | 21.6 | 76.8 |
|  | 19.4 | 19.4 | 96.2 |  |  |

(Q13) Should smoking indoors in restaurants ...

|  |  | Frequency | Percent | Valid Percent | Cumulative Percent |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Valid | 1 - always be allowed | 14 | 3.2 | 3.2 | 3.2 |
|  | 2 - be allowed only at some times | 112 | 25.0 | 25.0 | 28.2 |
|  | 3 - never be allowed | 306 | 68.5 | 68.5 | 96.7 |
|  | 4 -it depends | 10 | 2.3 | 2.3 | 99.1 |
|  | 5 - don't know/not sure | 4 | . 9 | . 9 | 100.0 |
|  | Total | 446 | 100.0 | 100.0 |  |

(Q14) Should smoking indoors in bars, casinos, or clubs ...

|  |  | Frequency | Percent | Valid Percent | Cumulative Percent |

## Appendix A - 2015 Florence Tobacco Survey Questions

1) Would you say that in general your health is ..

1 excellent
2 very good
3 good
4 fair
5 poor
6 don't know/not sure
2) Have you ever tried smoking regular cigarettes, even one or two puffs?

1 yes
2 no
3 don't know/not sure
3) Have you smoked at least 100 [regular] cigarettes in your entire life?

1 yes
2 no
3 don't know/not sure
4) Do you now smoke [regular] cigarettes every day, some days, or not at all?

1 everyday
2 some days
3 not at all
4 don't know/not sure
5) Have you ever used electronic cigarettes or E-cigarettes such as Ruyan or Njoy? IF NEEDED: An electronic cigarette is a pen-sized battery-operated tube that looks similar to a cigarette. It heats up air that is inhaled and can contain nicotine and other chemicals.
1
yes
2 no
3 don't know/not sure
6) During the past 30 days, on how many days did you use electronic cigarettes or Ecigarettes such as Ruyan or NJOY?
0 none
1 _ number of days (1-30)
2 don't know/not sure
7) In your opinion, are electronic cigarettes or E-cigarettes such as Ruyan or Njoy less harmful, more harmful, or just as harmful as smoking cigarettes?
1 more harmful
2 less harmful
3 just as harmful
4 don't know/not sure

The next several questions are about secondhand smoke.
8) Do you think that breathing smoke from other people's cigarettes or from other tobacco products is ...
1 not at all harmful to your health,
2 somewhat harmful to your health, or
3 very harmful to your health
4 don't know/not sure
9) Do you believe that breathing secondhand smoke is more harmful to your health than smoking your own cigarettes?
1 yes
2 no
3 don't know/not sure
10) Have you smelled tobacco smoke in your home that comes from outside your home [from another apartment or outside the building]?
1 yes
2 no
3 don't know/not sure
11) Would you prefer to live in a building where smoking is prohibited inside all apartments?

1 yes
2 no
3 not applicable/don't live in apartment
4 don't know/not sure
12) Would you prefer to live in a building where smoking is prohibited on outside property?

1 yes
2 no
3 not applicable/house or property
4 don't know/not sure
13) Should smoking indoors in restaurants...

1 always be allowed,
2 be allowed only at some times or in some places, or
3 never be allowed?
$4 \quad$ volunteered depends (specified)
5 don't know/not sure
14) Should smoking indoors in bars, casinos, or clubs ...

1 always be allowed,
2 be allowed only at some times or in some places, or
3 never be allowed?
4 don't know/not sure

15RV) At workplaces, do you think smoking indoors should be...
1 always be allowed
2 be allowed only at some times or in some places
3 never be allowed?
4 don't know/not sure
16) Should smoking in parks ...

1 always be allowed
2 be allowed only at some times or in some places
3 never be allowed?
4 don't know/not sure
17) How likely would you be to ask a stranger not to smoke around you if you could not move away from their smoke? Would you say ...
1 very likely
2 somewhat likely
3 not at all likely?
4 don't know/not sure
18) Should policies that do not allow smoking in indoor or outdoor public places be strictly enforced?
1 yes
2 no
3 don't know/not sure
19) Would you be in favor of an increase in the state tax on a pack of regular cigarettes if the money were used to fund Medicaid?
1 yes
2 no
3 don't know/not sure
20) Would you be in favor of an increase in the state tax on a pack of regular cigarettes if the money were used to fund tobacco prevention programs for youth?
1 yes
2 no
3 don't know/not sure

Q:ELCIGTAX: Electronic cigarettes are not currently taxed. Would you be in favor of starting a tax on electronic cigarettes?

```
1 \text { yes}
n no
3 don't know/not sure
```

21) Did you vote in the 2012 presidential election between Barack Obama and Mitt Romney?

1 yes
2 no
3 volunteers could not vote
4 don't know/not sure
22) What is the highest level of school you have completed or the highest degree you have received?
11 5-11th Grade
12 12th Grade, No Diploma
13 GED or Equivalent
14 High School Diploma
15 Some College, No Degree
16 Certif, Dipl, or Assoc Degree from Occup, Tech, or Vocat Prog
17 Associate Degree from Academic Program
18 Bachelor's Degree
19 Master's Degree
20 Professional School Degree (Examples: MD, DDS, DVM, LLB, JD)
21 Doctoral Degree (Examples: Ph.D, Ed.D)
22 don't know/not sure
23) Are you Hispanic or Latino [or neither]?

1 yes, Hispanic or Latino
2 no, neither
3 don't know/not sure
24) Which one or more of the following groups best describes you?

White?
1-yes 2-no 3-don’t know 4-refused
Black or African American?
1-yes 2-no 3-don't know 4-refused
Asian?
1-yes 2-no 3-don’t know 4-refused
Native Hawaiian or Other Pacific Islander?
1-yes 2-no 3-don't know 4-refused
American Indian or Alaska Native?
1-yes 2-no 3-don’t know 4-refused
Other (Specify)?
1-yes 2-no 3-don’t know 4-refused
(If Yes to American Indian) What part American Indian or Alaska Native are you?
$1 \quad 1 / 2$ (one half) or more,
$2 \quad 1 / 4$ (one quarter or one fourth)
3 1/8 (one eighth)
$4 \quad 1 / 16$ (one sixteenth), or less
5 don't know/not sure
6 refused
25) What is your age?
26) Are you male or female?

1 male
2 female
27) What is the primary source of your health insurance coverage? Is your primary coverage with ,,"
10 volunteers health insurance marketplace or healthcare.com
11 a plan purchased through your employer or union
12 a plan purchased through another person's employer or union
13 a plan that you or another family member buys on your own
14 Medicare
15 Medicaid or another state program
16 TriCare, ChampUS, the VA, or another military program
17 Alaska Native, Indian Health Service, Tribal Health Services
18 Some Other Source
19 None
77 don't know/not sure
99 refused
(IF SAID (10) VOLUNTEERS HEALTH INSURANCE MARKETPLACE OR HEALTHCARE.COM)
Was it...
13 a private health insurance plan purchased by you or family member
14 Medicaid
18 some other source
77 don't know/not sure
99 refused
(IF SAID (18) SOME OTHER SOURCE)
What other coverage?
1 RECORD
2 don't know/not sure
3 refused

## (IF SAID AGE 65 OR OLDER AND DID NOT SAY MEDICARE OR REFUSED)

Do you have Medicare coverage?
1 yes
2 no
3 don't know/not sure
4 refused
28) How likely would you be to ask a stranger not to smoke around you if you were in a place where there was a non-smoking policy?
1 very likely,
2 somewhat likely
3 not at all likely
4 don't know/not sure
Q: Marital Status (Marital2) Are you now...
1 married
2 living with a partner
3 divorced
4 widowed
5 separated
6 single, that is, never married AND NOT now living with a partner
7 OTHER (Specify)
8 don't know/not sure
9 refused
Q:Income (I would like to ask about the combined income of everybody who lives with you)
Is your annual household income from all sources...
Less than $\$ 20,000$ ?
1-yes 2-no 3-don't know 4-refused
Less than \$30,000 ?
1-yes 2-no 3-don’t know 4-refused
Less than \$40,000 ?
1-yes 2-no 3-don’t know 4-refused
Less than \$50,000 ?
1-yes 2-no 3-don't know 4-refused
Less than \$70,000 ?
1-yes 2-no 3-don’t know 4-refused
Less than $\$ 100,000$ ?
1-yes 2-no 3-don't know 4-refused
Less than \$150,000 ?
1-yes 2-no 3-don’t know 4-refused
Q: IncEnd Let me check what I have recorded. Your annual household income is [INSERT ANSWER FROM ABOVE] Is this correct?

1 no, re-ask the question
2 yes, correct as is

## Appendix B - Cell Phone Usage

The use of a cell phone sample to enhance the residence sample is a relatively new methodology. To gain an understanding of the role of the cell phone sample in this study, a comparison was made of the sample demographics for the landline and cell phone samples for both the unweighted data and the weighted data. Tests of significance with the unweighted data indicate the cell phone and landline samples differ significantly from each other on all demographic variables except smoking status, Hispanic ethnicity, and education. The distributions are presented in the table below. Within each variable, column values sum to $100 \%$ (e.g., $51.5 \%$ of the unweighted cell phone sample is male and $48.5 \%$ is female; $50.3 \%$ of the weighted cell phone sample is male and $49.7 \%$ is female). As seen in these tables, the cell phone sample tends to include more males, younger respondents, fewer widowed respondents, and more who have employer insurance.

|  | Unweighted percent |  | Weighted percent |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Landline | Cell phone | Landline | Cell Phone |
| Smoking Status |  |  |  |  |
