

CDC OPIOID PRESCRIBING GUIDELINE MOBILE APP

Safer Opioid Prescribing at Your Fingertips

THE OPIOID GUIDE APP

Opioids can have serious risks and side effects, and CDC developed the CDC Guideline for Prescribing Opioids for Chronic Pain to encourage safer, more effective chronic pain management. CDC's new Opioid Guide App makes it easier to apply the recommendations into clinical practice by putting the entire guideline, tools, and resources in the palm of your hand.

Since 1999, the amount of prescription opioids sold in the U.S. has nearly quadrupled.

FEATURES INCLUDE:

MME Calculator

Patients prescribed higher opioid dosages are at higher risk of overdose death. Use the app to quickly calculate the total daily opioid dose (MME) to identify patients who may need closer monitoring, tapering, or other measures to reduce risk.

Prescribing Guidance

Access summaries of key recommendations or link to the full Guideline to make informed clinical decisions and protect your patients.

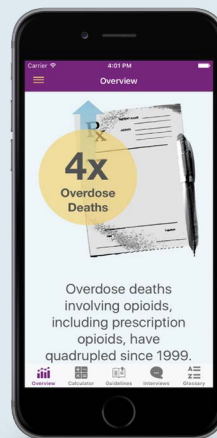

Motivational Interviewing (MI)

To provide safer, more effective pain management, talk to your patients about the risks and benefits of opioids and work together towards treatment goals. Use the interactive MI feature to practice effective communication skills and prescribe with confidence.

MANAGING CHRONIC PAIN IS COMPLEX, BUT ACCESSING PRESCRIBING GUIDANCE HAS NEVER BEEN EASIER.
