Alabama Data-Driven Prevention Initiative on Opioid and Heroin Abuse and Overdose
STRATEGIC MAP: 2017-2020

11/01/17

Use Data to Collaborate Across Sectors to Reduce Opioid and Heroin Abuse and Overdose

	A — Improve Surveillance of Abuse and Overdose	B — Enhance Analysis and Use of Data	C — Strengthen Prevention and Education Infrastructure	D — Expand Treatment and Recovery
1	Establish Data Sharing Agreements Between State and Local Agencies	Connect Specific Data Metrics from Reporting Agencies Via a Centralized Database	Provide and Evaluate Statewide Evidence-Based Curriculum for Youth	Evaluate Treatment Options
2	Coordinate and Prepare Data for Use in a Centralized Database	Create an Alert System for the Centralized Database	Identify a Pool of Peers/Mentors to Foster a Different Approach to Education	Expand Evidence-Based Treatment Facilities Across the Continuum of Care
3	Review Data Sources, Collection and Reporting Methods and Identify Improvements	Use Independent Data Analytics Organization to Manage, Analyze and Report Data Metrics to Include a Dashboard	Educate Adults to Help Young People in Their Care Understand Addiction and Treatment	Expand Funding for Evidence-Based Programs
4	Require Positive Identification for the Purchase of Controlled Substances	Pursue PDMP Access to De-identified Data	Educate Prescribers on CDC Pain Management Guidelines	Realign Treatment and Recovery Resources with Needs
5	Strengthen Good Samaritan and Revise Child Endangerment Laws	Pursue Mandated Data Reporting by Other Agencies	Educate Current and Future Professionals About Addiction as a Disease	Improve Awareness of the Opioid Problem and Treatment Resources
6				Coordinate with Law Enforcement/Courts in Advancing Treatment versus Incarceration

E — Reduce the Stigma Associated with Addiction

F — Rescue – Naloxone Training and Distribution
