01/01/00	6	Amersham, INC, SPEC, etc. and/or Balteau, XMAS, Sperry, etc.	John Doe
	2		<i>John Doe</i>

TOTAL HOURS _____ **(this page)**

*On-the-job training consisting of hands-on experience includes those areas considered directly involved in the radiography process. It includes taking radiographs, calibration of survey instruments, operational and performance testing of survey instruments and devices, posting of radiation areas, preparation of radiography equipment for transport, posting of records and radiation surveillance. Excessive time spent in only one or two of these areas, such as radiation area surveillance shall not be counted toward the on-the job training of a radiographer.
