The Roadmap for Reopening K-12 Schools addresses the need for schools, local health departments, and healthcare providers to work together to support the goal of all students returning to school safely during the COVID-19 pandemic. In order to ensure that our county health departments are providing consistent and accurate information to local schools, the Alabama Department of Public Health (ADPH) developed this Back to School COVID-19 Toolkit of best practices recommended by ADPH and the Centers for Disease Control and Prevention (CDC). The toolkit will be used by ADPH staff to inform and support schools in their efforts to mitigate COVID-19 transmission. It will also be used by school systems as a resource for local decision-making.

PROGRAM OBJECTIVES:

1. Ensure county health departments are providing consistent and accurate information to local schools regarding COVID-19 mitigation strategies recommended by CDC and ADPH.
2. Review key principles to consider for re-opening schools.
3. Identify school and ADPH roles when students or staff members are positive or symptomatic.
4. Understand the guidelines for isolation and self-quarantine.
5. Discuss how to report positive and suspected cases to ADPH.
6. Review the risk dashboard - a tool for decision making.
