Human trafficking is the fastest growing illegal activity in the world and ranks second only to the illegal drug trade. It is estimated to be a \$150 billion dollar industry and affects over 40 million men, women, and children worldwide. COVID19 has caused an increase in the number of people at risk for being enslaved. This program will review the latest statistics and how efforts to slow the spread of the virus have placed vulnerable populations at an even higher risk of exploitation through trafficking.
