

Know the
symptoms of

RSV

Respiratory
Syncytial
Virus

Here's what you need to
watch for this RSV season

wheezing or rapid breathing and
bluish skin, lips, or fingertips

fever that is more than 101° Fahrenheit
which is especially dangerous for
babies younger than 3 months

cough
that gets worse
and breathing
that causes
their ribcage to
"cave-in"

mucus that is yellow,
green, or grey and so thick
that clogs their nose and
lungs, making it hard to
breathe

RSV can be deadly if your baby
has these symptoms, don't wait. Get help.
