Welcome to ImmPRINT!

Alabama Immunization Information System (IIS)

The ImmPRINT Team would like to welcome all practitioners and users to the Alabama Immunization Registry. We enjoy working with those who strive to keep Alabamians healthy. We are constantly working to improve and expand the Alabama IIS. In addition to storing immunization data, our IIS offers: Certificates of Immunization, Vaccine Forecaster, and our new Vaccine Ordering Management System (VOMS). Providers who administer immunizations are eligible to enroll their practice/site in ImmPRINT. Therefore, participation in the IIS requires documentation of administered shots in ImmPRINT. We look forward to continuing the expansion of our IIS and support for providers who take care of Alabama's patients.
