

Vaccine History

Objectives: At the completion of this section, the user will know how to:

- access and review available immunization records in ImmPRINT
- document and update patients' vaccination histories

The primary purpose of ImmPRINT is to be an up to date registry of Alabamians' vaccination histories, and this section will review how to view and update that information.

View History

When the correct patient is identified, select “View Vaccine History” on the left side of the screen. The “Vaccine History” page will appear. If a user needs information regarding vaccination recommendations select “CDC Immunization Schedules” at the top of the page. This will open the CDC’s Immunization Schedule page, where users can search for additional vaccine information.

The Vaccine History page displays a chart of the patient’s vaccination history based on the available information in the system. Vaccines names appearing in red may or may not be valid doses (i.e. given before the minimum age or outside the minimum interval) according to ACIP recommendations. Vaccines in blue are deemed valid or accepted. Also notice that some have an “A” notated to the right of the vaccine’s name. The “A” indicates that the immunization was entered as an administered vaccine. Users can only modify and update vaccines that were administered at their site.

Documenting Vaccines

Users document patients’ vaccinations from the “Vaccine History” page. Two types of vaccines can be documented in ImmPRINT: historical and administered. Historical vaccines are those vaccines given before the current date or same date by a different site. Historical vaccines, therefore, can be vaccines given at another facility or from the facility documenting the historical vaccine. Administered vaccines are vaccines given by the site that actually administered the vaccine to the patient and must be documented the day the vaccine is given.

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 06-13-25

Historical Vaccines

To document a historical vaccine, select “Add Historical Vaccines” from the “Vaccine History” page. The “Historical Vaccines” page will open, and the user will see the different vaccines listed on the left.

Historical Vaccines

Name	DOB	Age	RegistryID
DOE, JOHN	08/14/1987	30 Yrs 7 Mo 27 days	(15202232)

Users will be taken to another “Historical Vaccines” page to enter the CVX details. Under “CVX Description”, select the dropdown arrow and choose the appropriate information.

Vaccine	Vaccination Date	Historical Or Administered	Cvx Description
DT	09/02/2015	Historical	<--Select-->

In some cases the CVX Description will already be pre-populated in the field.

Vaccine	Vaccination Date	Historical Or Administered	Cvx Description
MMR	02/10/2018	Historical	MMR(M-M-R II)

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 06-13-25

If users do not enter a value in this field the following error message will appear. Click the Red “X” and add the CVX information.

After making the appropriate updates, review the vaccine information. Select “Cancel” if the information is inaccurate, or select “Update” if the information is correct. The user will be taken back to the Vaccine History page.

Documentation Errors

Users may encounter errors when entering historical vaccines. One common error is a user entering a duplicated vaccination. If a user documents a vaccine type with a vaccine date that has already been entered into ImmPRINT, an error message will appear (see image below) explaining that the vaccination with the entered date already exists for the patient. Select the Red X to exit the message. The user will be taken back to the “Historical Vaccines” page to correct or delete the vaccination date.

Another common error includes documenting administered vaccines as historical. Administered vaccines are vaccines that are given at the site and must be documented on the exact same day. Same day vaccines from a different site can be documented as historical but

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 06-13-25

not as an administered vaccination. For example, on 01/01/2025 Site A administers a vaccine to a patient at 10am, but Site A cannot enter the vaccination into ImmPRINT at that time. At 12pm, Site A is able to access ImmPRINT. Since the current date is still 01/01/2025, when documenting the 10am vaccination, the Site A user must document this as an administered vaccine in ImmPRINT. However, if the user chose to document the vaccine in ImmPRINT on the following day, 01/02/2025, then they would document this vaccine as an historical administered vaccine. If a user attempts to document an administered same day vaccine as historical, the following error message will appear. Select “Ok”, to be taken back to the “Historical Vaccines” page to correct or delete the vaccination date.

Administered Vaccines

To document an administered vaccine, from the “Vaccine History” page select “Administer Vaccines”. The “Administer Vaccines” page will appear allowing users to document inventoried or noninventoried vaccines. Inventoried vaccines are vaccine stock that has been added to the site inventory in ImmPRINT. Noninventoried vaccines are those vaccines not documented in the site inventory in ImmPRINT. For further information on how to add vaccine inventory to ImmPRINT, please see the Site Inventory section of the manual. Sites using ImmPRINT to document their vaccine stock screens will display: “Administer Noninventoried Vaccine” and “Administer Inventoried Vaccine”.

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 06-13-25

The third step is to provide details about the administered vaccine. The user should begin by selecting the correct 11-digit Point of Sale NDC which **must be found on the box**.

The screenshot shows a three-step process: 1. VACCINES (Select vaccines for patient), 2. VACCINATOR (Who's giving the vaccine?), and 3. DETAILS (Provide vaccine details). The 'VACCINES' step is active. Below the header, there is a blue button labeled 'Vaccines'. Underneath, a list shows 'HPV9' and 'IIV3 SEASONAL'. At the bottom, there is a 'Vaccine' field with 'HPV9' selected and an 'NDC Code' dropdown menu with '<--Select-->'.

Once an NDC code is selected, information associated with the vaccine will appear.

Complete the other information regarding the site, route, VFC eligibility (if patient is less than 19 years of age), VIS form, and any adverse reaction and select “Save”.

The screenshot shows the 'DETAILS' step of the vaccine administration process. The 'Vaccine' field is set to 'HPV9'. The 'NDC Code' dropdown is set to '00006-4119-01'. Other fields include 'Lot #', 'Brand' (Gardasil 9), 'Manufacture' (Merck and Co, Inc), 'Dosage(mL)' (0.5), 'Site' (<--Select-->), 'Route' (<--Select-->), 'VFC Eligibility' (Not Eligible), 'Adverse Reaction' (<--Select-->), 'VIS Form#1' (<--Select-->), and 'VIS Presented#1'. A 'Report to VAERS' link is visible. At the bottom, there are 'Save' and 'Back to NonInventoried Vaccine' buttons.

Alabama Department of Public Health

Immunization Division, 201 Monroe St, Montgomery, AL 36104

1-800-469-4599 www.alabamapublichealth.gov/immunization/index.html 06-13-25

If another vaccine needs to be documented, the user will be taken to the Step 3 to enter the vaccine details for that vaccination. Follow the instructions in the third step (i.e. adding NDC code and administration details) to complete the required documentation.

The screenshot shows a progress bar with two steps: 1. VACCINES (Select vaccines for patient.) and 2. VACCINATOR (Who's giving the vaccine?). A green banner indicates 'Successfully updated.' Below this, a link 'Select the NonInventoried Vaccine to Update' is visible. A table titled 'Vaccines' lists 'IIV3 SEASONAL' and 'HPV9', both with green checkmarks. At the bottom, a form shows 'Vaccine: IIV3 SEASONAL' and 'NDC Code: <--Select-->'. A button 'Back to NonInventoried Vaccine' is located at the bottom left.

Once all vaccinations are completed select “Save”.

The screenshot shows a progress bar with three steps: 1. VACCINES (Select vaccines for patient.), 2. VACCINATOR (Who's giving the vaccine?), and 3. DETAILS (Provide vaccine details.). A green banner indicates 'Successfully updated.' Below this, a link 'Select the NonInventoried Vaccine to Update' is visible. A table titled 'Vaccines' lists 'HPV9' and 'IIV3 SEASONAL', both with green checkmarks.
