

Welcome to ImmPRINT!

The ImmPRINT Team would like to welcome all practitioners and users to the Alabama Immunization Registry. We enjoy working with those who strive to keep Alabamians healthy. We are constantly working to improve and expand the registry. In addition to storing immunization data, our database offers: Certificates of Immunization, Vaccine Forecaster, and our new Vaccine Ordering Management System (VOMS). Providers who administer immunizations are eligible to enroll their practice/site in ImmPRINT. We look forward to continuing the expansion of our registry and support for providers who take care of Alabama's patients.
