

# ONLY YOU CAN PREVENT VACCINE LOSS

**You are responsible for the vaccines you order.  
There are a lot of ways you can prevent vaccine loss.**

Create and use a Vaccine Management Plan and...

- Make sure the refrigerator and freezer doors are closed
- Record MIN, MAX, and CURRENT temperatures
- If temperatures are out of range, TAKE ACTION IMMEDIATELY
- Order only as much vaccine as you can use
- Put vaccine shipment away immediately
- Check expiration dates at least monthly and use short-dated vaccine first

---

For vaccines that will expire within 6 months and cannot be used, notify the VFC Call Program at **866-674-4807** to prevent negligent provider loss.
