Alabama WIC Program Hospital Special Formula Notification Form ADPH-WIC-114

- The dietitian from the hospital will fax the completed form to the State WIC Office at 334-206-2914.
- The order for the exempt infant formula or WIC eligible nutritionals will be placed by the State WIC staff.
- The State staff will, in turn, fax the form to the appropriate WIC clinic.
- This form will serve as the prescription form for the participant. It must be scanned in the participant's electronic medical record via Crossroads.
- A prescription form, ADPH-WIC-111a (infant) or 111b (child), will be needed at the 6 month and 12 month evaluations.

NOTE: In addition to the prescribed formula, infants at six (6) months of age and children may receive supplemental foods. USDA allows supplemental foods for infants/children receiving special formula only if prescribed by the physician. It is very important to indicate on the form if the infant at 6 months of age or the child requires special formula **only** or if supplemental foods are allowed. The specific foods allowed must be marked.
