

Children with Chronic Respiratory Complaints: When Does Normal Become Abnormal?

Satellite Conference and Live Webcast

Wednesday, April 27, 2011, 12:00-2:00 p.m. (Central Time)

1:00-3:00 p.m. (Eastern) • 11:00 a.m.-1:00 p.m. (Mountain) • 10:00 a.m.-12:00 p.m. (Pacific)

Respiratory complaints are the most common problem physicians see in pediatrics. Each year most children have several respiratory illnesses that present with a variety of symptoms. What separates simple respiratory complaints from a more serious condition? This program provides expert medical advice and a parent's first-hand account of her journey to find a diagnosis.

FACULTY:

J.P. Clancy, MD

Tom Boat Chair
 and Director of
 Cystic Fibrosis Clinical
 and Translational Research
 Cincinnati Children's Hospital
 and Medical Center
 Cincinnati, Ohio

Angela Happney

Parent of a daughter diagnosed with
 Immotile Ciliary Syndrome
 (Primary Ciliary Dyskinesia)

PROGRAM OBJECTIVES:

1. To identify when common pediatric respiratory symptoms become excessive and beyond the normal range of care.
2. To state parental perspectives into the evaluation of chronic respiratory signs and symptoms.
3. To identify less common diagnoses that can present with common respiratory symptoms.
4. To formulate appropriate diagnostic testing plans for children with chronic respiratory complaints.

CONFERENCE DETAILS:

Target Audience: All primary care providers, pulmonologists, nurses, pharmacists, educators, social workers, parents, health educators, public health providers, school counselors, and administrators.

Continuing Education: CME (\$25 per certificate for CME only); Nurses 2.0 hours, Social Workers 2.0 hours

Registration: www.adph.org/alphn
