#

Objectives:

1. Define what PrEP is and how it is used for treatment and prevention.
2. Discussion of the advances in HIV prevention and treatment for people at high risk for HIV infection utilizing PrEP, a biomedical intervention.
3. Discussion about the barriers and challenges for members of the LGBTQ community when seeking health related treatment and prevention services as well as understanding the importance of Pride activities for the LGBTQ community.
4. Discussion about innovative solutions to increase access by young gay men to HIV prevention, treatment, and support services utilizing targeted social marketing campaigns and social media platforms.
5. Description of the mental and emotional struggles of members of the LGBTQ community.
6. Discussion of the biomedical interventions used in Alabama to educate and treat HIV.
