As a nurse – do you truly know what your scope of practice is and are you reaching beyond it without realizing it? Nurses can only perform procedures deemed appropriate for their respective education, experience, and place of employment. Remember, the first rule of healthcare is do no harm, so it's critical to only perform procedures within your scope of practice. This program will help you get a better understanding of what tasks you can perform and who you can turn to if you feel you're being asked to perform a duty outside of your practice.
