Meth Lab Awareness:
Health and Safety Issues for Homecare Patients

1. List and briefly define two protective actions to take if there are signs of a meth lab in a patient's physical environment.

2. Name three common locations for a meth lab.

3. What are two effects of a meth lab on patients and a visiting case manager?

4. Define a clandestine methamphetamine laboratory.

5. Name two exterior clues that a meth lab is in operation.
