Remote Patient Monitoring (RPM) Program

The Remote Patient Monitoring (RPM) Program combines resources from ADPH Home Care, Alabama Medicaid Agency and the University of South Alabama to provide an in-home monitoring service for specific chronic illnesses.

Medicaid patients who have congestive heart failure, diabetes, and/or hypertension may qualify for the in-home monitoring program. The Medicaid provider will determine if the patient needs daily monitoring and will provide the orders for the patient to be admitted to the In-Home Remote Patient Monitoring Program.

- Remote Patient Monitoring Site Map
- Referral/RMEDE Demographics Form

For immediate assistance regarding the Remote Patient Monitoring (RPM) Program, please contact the Bureau of Home and Community Services at (800) 225-9770.

Next Steps

- Provider must agree to participate
 - Providers set the custom parameters appropriate to the patient
- Family/patient must also agree to participate

Assessment

- Initial evaluation is face-to-face with an ADPH RPM nurse
 - Provide education and instruction
- If certain criteria are met, an ACHN care manager may be assigned as well
- Subsequent face-to-face visits with RPM are only mandatory at yearly check-ins
 - Sooner if needed
- No specific equipment is needed
 - RPM may assist with patient/family needs

Monitoring

- Patient/family inputs information either into the IVR (interactive voice response) or via app directly into RMEDE
 - Real Time Medical Electronic Data Exchange (USA)
 - App (iPhone/Android)
- If a present threshold is violated, an alert is created
 - Notifies RPM nurse to connect with the patient

Monitoring

- Periodic graph reports of patient data are sent to the provider monthly for ongoing patient improvement tracking.
