MAKE A GOOD CHOICE: GET MOVING ALABAMA!

GET GOING

Getting started with physical activity can be challenging but is possible. If you're not used to being active, talk with your doctor first.

- Find where physical activity fits into your daily routine and make time for it.
- Take small steps towards increasing activity.
- Start slowly. Change one habit at a time.
- Get up and move every hour.
- Physical activity is for everybody!

GET ENOUGH

Any amount of physical activity is a good start! As your activity increases, remember:

- Aerobic activity increases your heart rate and gets you breathing harder like brisk walking or rolling, dancing, and swimming.
- Adults need 30 minutes of aerobic activity every day. 10 minutes at a time is fine.
- Work all major muscle groups at least 2 times a week. This includes using a stretch band, weight lifting, push ups, and yoga.

 Household chores, gardening, walking your pet, and taking the stairs all count as physical activity too.

GET TOGETHER

Increasing physical activity is easier and more enjoyable when you're not alone.

- Find a partner! Whether it's a friend, coworker, family member, or someone with similar goals.
- Work with your partner to motivate and cheer each other on.
- Find an activity that you want to do, not have to do. Choose an activity that's fun!

GET RESULTS

Physical activity improves your health by increasing energy, relieving stress, controlling your weight, building strength, and reducing your risk of heart disease, cancer, and other chronic conditions.

- Track your progress. Log what works best for you using tools like a journal, pedometer, calendar, or phone app.
- Expect slip ups or setbacks and don't give up!
- Celebrate successes, no matter how small!
