PREVENTION TYPE			
Which type of cancer prevention does your activity address? ☐ Primary Prevention (education and policy/behavior change) ☐ Secondary Prevention (early detection and screenings) ☐ Tertiary Prevention (treatment and survivorship)			
GOALS			
□ GOAL 1 Reduce cancer risk by maintaining a healthy weight, eating a healthy diet, and being physically active □ GOAL 2 Increase vaccination rate for vaccines shown to reduce the risk of cancer □ GOAL 3 Reduce the incidence and mortality related to lung cancer □ GOAL 4 Reduce the risk of skin cancer by reducing exposure to ultraviolet light □ GOAL 5 - 8 Reduce the incidence of late stage breast, cervical, colorectal, and prostate cancer □ GOAL 9 Increase participation in cancer clinical trials □ GOAL 10 Improve quality of life for cancer survivors and their families			
OBJECTIVES			
Increase awareness of the link between being overweight/obese and an increased risk of cancers   Promote moderate to vigorous activity in addition to limiting sedentary behavior   Promote a healthy diet which emphasizes vegetables, whole grains, fruits, and nuts, while limiting processed foods, red meat, food with high fat and sugar content   Promote limiting alcohol intake   Increase percentage of adolescents who have initiated and completed the Human Papillomavirus (HPV) vaccine series for prevention of cervical cancer and possibly oral cancer and anal cancer   Promote Hepatitis B (HBV) vaccine for all children as well as at-risk adults to reduce the risk of hepatitis and liver cancer   Decrease the percentage of adults/youth who smoked cigarettes or spit tobacco in the last year   Reduce exposure to secondhand smoke   Increase the knowledge of radon in high-risk counties as a risk factor for lung cancer   Increase awareness of cancer risk related to UV exposure by sunlight or indoor tanning   Increase utilization of sun safety behaviors related to UV exposure   Reduce exposure to indoor tanning by adolescents   Increase appropriate screening and early detection of breast, cervical, and colorectal cancer   Promote education about prostate cancer screening options   Promote awareness and/or access of clinical trials in the state   Increase enrollment of minority populations in clinical trials   Promote individualized survivorship care plans for every cancer patient   Support integration of palliative care as a routine part of cancer care   Improve use of advance directives as part of a cancer treatment plan   Promote timely and appropriate referral to hospice care   Promote resources available to current cancer survivors			
STRATEGIC ACTIONS			
<ul> <li>□ Coaching or counseling in community settings</li> <li>□ Promote worksite programs</li> <li>□ Promote social support interventions in community settings</li> <li>□ Promote community-scale and street-scale urban design and land use policies</li> <li>□ Support enhanced school-based physical education</li> <li>□ Promote point-of-decision prompts to encourage use of physical alternatives (i.e. taking the stairs)</li> <li>□ Implement evidence-based school campus and community programs that increase youth healthy behavior adoption</li> <li>□ Improve health professional knowledge, practice behaviors, and system support related to provision of or referral for immunizations, tobacco cessation services and cancer screening services</li> <li>□ Encourage provider and community program referrals</li> <li>□ Address disparities among different and minority populations</li> </ul>			

STRATEGIC ACTIONS (continued)		
Advocation of local and state level policy Restricting minors' access Community mobilization Provide cessation education and available Promote evidence-based tobacco trees Increase public awareness in public is Identifying and decreasing disparities Promote and provide sun safety and Increase utilization of patient navigates Promote strategies that support paties Provide group and one-on-one educates Focus efforts to identify and provide Promote and support partner organistic Promoting discussion between primates Address barriers to participation successions.	dia education campaigns, including in high-risk counties olicy, including stronger policy restrictions  lable resources atment to tobacco users institutions, public housing and campus communities is in care skin cancer prevention support to Alabama schools tion programs ents to establish a medical home ation regarding risk factors, screening guidelines, and the importance of early detection mammograms to never or rarely screened "hard to reach" women trations that focus efforts on minority populations ary care providers and their patients about the benefits and risks associated with screening the as low literary, cost, lack of awareness and invitation, language differences an mistrust dep individuals make informed decisions about clinical trials ance of diversity in clinical research to ensure that the discoveries, treatment, interventions, and those populations as as a minority population	
REFLECTION/SUMMATION		
Describe the expectations and results		
Are you actively looking for partners If so, please provide any information	hips for the activity? ☐ Yes ☐ No and requirements necessary for participation below:
