

Healthcare Made Simple: Close to Home, Under One Roof

Rockford, Alabama — At Accordia Health, we believe quality healthcare should never feel out of reach. That's why we're here in the heart of Coosa County, serving our neighbors with both primary care and behavioral health services—for patients of every age. Whether it's your child's check-up, help managing a chronic condition, or support for mental health, you'll find the care you need right here, close to home.

What makes our Rockford location even more special is our partnership with Rockford Pharmacy, operated by Hubbard Pharmacy. Patients can often pick up their prescriptions just steps away from the exam room—sometimes within minutes of their appointment. No extra trips, no long drives—just convenient, connected care.

And we're not stopping there. Under the same roof, you'll also find the Coosa County Health Department. From vaccinations and health screenings to important public health resources, it's all in one place.

By bringing medical care, pharmacy services, and public health together, we're making healthcare more straightforward, faster, and more personal. Because here in Rockford, we're more than a clinic—we're part of your community, and your health is our priority.
