Cleaning and Disinfecting Against COVID-19 in Public Settings

**WHAT YOU SHOULD KNOW**
- Commonly used cleaners and disinfectants are effective against COVID-19.
- Frequently touched surfaces are most likely to be contaminated.
- Check the expiration date of products you use and always follow manufacturer’s instructions.

**CLEAN FREQUENTLY TOUCHED SURFACES TWICE PER DAY**
- In addition to routine cleaning, surfaces that have frequent contact with hands should be cleaned and disinfected twice per day and when visibly dirty.
- Examples include doorknobs, elevator buttons, light switches, toilet handles, counters, hand rails, touch screen surfaces and keypads.
- In addition to routine cleaning, check with your organization for any specific protocols for cleaning for COVID-19.

**SELECT PRODUCTS**

**Cleaners**
- Break down grease and remove organic material from the surface.
- Used separately before using disinfectants.
- Can be purchased with cleaner and disinfectant combined in a single product.

**Disinfectants**
- Have chemicals that kill most germs.
- Applied after the surfaces have been cleaned.
- Have a drug identification number (DIN).

**Disinfectant Wipes**
- Have combined cleaners and disinfectants in one solution.
- May become dry due to fast drying properties. Should be discarded if they become dry.
- Not recommended for heavily soiled surfaces. Prepare products for use.
- Where possible, use pre-mixed solution.
- Read and follow manufacturer’s instructions to:
  - properly prepare solution
  - allow adequate contact time for disinfectant to kill germs (see product label)
  - wear gloves when handling cleaning products including wipes
  - wear any other personal protective equipment recommended by the manufacturer
