ImmPRINT

• Since 2000, state vaccine repository for all vaccines for all ages

• Registered:
  • > 5,000 sites total
  • >1,800 sites with an electronic interface registered in ImmPRINT
  • >1,475 clinics
  • > 850 pharmacies
  • > 1,000 adult providers
  • 96 hospitals
  • 17 long-term care facilities with 0 interfaces
ADPH is willing to pay for an interface and limited monthly maintenance fees for your Electronic Health Record (EHR) and ImmPRINT.
ImmPRINT

Interface would take the information you document in your EHR and automatically populate the fields in ImmPrint.

Pharmacy Partnership for Long-Term Care Program

• On Friday, October 16, the White House announced the Pharmacy Partnership for Long-Term Care Program - a national vaccine distribution program for long-term care residents.
Pharmacy Partnership for Long-Term Care Program

- This end to end service includes: cold chain management, on-site vaccinations, and fulfillment of reporting requirements.
**Pharmacy Partnership for Long-Term Care Program**

- **Starting October 15:**
- **Facilities sign-up for on-site clinics**
  - **SNFS via:** NHSN - An: alert will be incorporated into the NHSN LTCF form.
  - **ALFS via:** REDCap - https://redcap.link/LTCF
- **November:** Pharmacy partners coordinate with facilities for scheduling
Reporting Requirements

• Whoever administers the vaccination is the entity that must meet the reporting requirements.
CDC Frequently Asked Questions
Can staff at my facility get vaccinated via this program?

- It is possible that staff will be eligible to receive COVID-19 vaccine earlier than LTCF residents as part of a recommendation for vaccination for healthcare personnel, including those in LTCFs. Any staff member who was not already vaccinated could be vaccinated through these on-site clinics; however, we strongly encourage staff to be vaccinated as soon as they are eligible, which may occur through mobile clinics and clinics run by health departments for healthcare personnel.
Our facility has their own pharmacy, are we required to participate in the LTC pharmacy partnership program for vaccine distribution?

- No, you are not required to participate in this program.
- If an LTCF opts out of the pharmacy partnership program, the LTCF and the pharmacy provider of their choice are responsible for coordination of and adherence to all vaccine supply chain, storage, handling, administration, and **reporting requirements**, including strict cold chain and **public health reporting requirements**.
Can a combination of options be selected?

- Initially, a combination of options will not be possible. We are asking facilities to select a single option to facilitate efficient distribution of vaccine. We expect the pharmacy partnership services to continue on-site at the facility for approximately 2 month
How could new LTCF residents be vaccinated?

1) The facility can choose to continue to work with the pharmacy that provided their initial on-site clinics for additional doses.

2) The facility can choose to work with a pharmacy provider of their choice.

3) Depending on vaccine supply, facilities may want to work with local hospitals to ensure residents have received their first dose before being discharged.

4) Similarly, facilities may ask new admissions from the community to get vaccinated before admission.
What costs are we responsible for if we choose to participate in the pharmacy partnership program?

There will be no costs to the LTCF for participation in the pharmacy partnership program. It is anticipated that participating pharmacies will bill public and private insurance for the vaccine administration fees.
If the facility chooses its own pharmacy provider, what data will the facility or pharmacy have to report?

• To administer COVID-19 vaccine, providers will need to sign a provider agreement. One of the requirements is the requirement of reporting specific data elements once vaccine has been administered.
Is Centers for Medicare and Medicaid Services (CMS) mandating residents to be vaccinated with COVID-19 vaccine?

- Not at this time. Please refer to CMS directly for requirements around COVID-19 vaccine in LTCFs.
Who should I reach out to if I have additional questions?

For questions specific to the pharmacy partnership program for LTCFs, please contact:

eocevent494@cdc.gov.
Reporting Requirements

- Please remember:
- **Whoever administers** the vaccine is the responsible entity for reporting all required information.
Surveyor Testing

• ADPH will begin surveyor testing using the BinexNOW COVID-19 Ag test.

• The surveyors will be utilizing the NAVICA app. You may not require the proof of a negative test prior to surveyor entry.
