AUGUST 2022

UPDATES AND REMINDERS

Immunization Problem List

When a vaccine dose is entered into CureMD, the information is sent to ImmPRINT when “Save & Send” is selected. If information required by the ImmPRINT Registry is missing or incorrect, the data transfer will fail, and an error message will be generated.

Errors can be corrected from the Front End of the patient chart, followed by Re-Processing the file from the Problem List.

Users are urged to monitor and track errors daily/weekly.

To Correct Immunization Error Messages:

Personal > Administration > Tracking > Message > Outbound > Problem List

1. Problem List
2. Select Destination (Registry)
3. Date range
4. Select Immunization
5. Search
6. Select Message
7. Re-Process

Note: Do **not** click the “Save & Send” icon for the second time. This would generate another HL7 message.

Computer Issues

When experiencing issues with your computer or laptops (i.e., “problem logging in”), please have your Security Coordinator contact the Help Desk at 334-206-5268. The Help Desk will route your request to the appropriate IT person for assistance.

EHR Workflow Application Issues

Please submit an email to the EHR email address (ehr@adph.state.al.us). Submitting your request for assistance through this email is efficient and allows us to track problems if we suspect they may be happening statewide.
