July 2019 UPDATES

- Partial Pill: The ability to inventory a partial pill dosage is in the Production phase.
- Current clinics in ImmPRINT Production: Elmore, Montgomery and Wilcox. The EHR team will begin adding additional counties in the Southwestern district in August 2019.
- Immunization location/registry: This defaults to the location where the patient received their vaccine.
- Chief Complaints that were free texted, rather than selected from the approved list, will not save as default chief complaints.
- ePrescribe: The Nurse and Provider roles are split; this will not change the work flow. Providers will be able to prescribe, Nurses will not.
- Staff members are requested to search all patients by their DOB and their last name.
- Do not add new Test patients in the Production database. Use the “Red Icon” to test.
- Counties in ImmPRINT Production are asked to run the HL7 report at least weekly.
- The Complaint text box was expanded to allow viewing of all text entered.
- When placing a request to add medications to CureMD please send the following information to the EHR team:
 1. Name of the medication (brand and generic)
 2. The dosage/strength of the medication
 3. Route of the medication
 4. NDC#
 5. The amount/number of vials, tablets, capsules, syringes, etc.....
