Mission of the Alabama Office of Emergency Medical Services

OVERVIEW

The Department of Public Health Office of Emergency Medical Services (OEMS) is tasked with oversight of emergency medical services in Alabama. The OEMS is responsible for protecting the health, safety, and welfare of the public by assuring that emergency medical response agencies, training entities, and emergency medical services personnel meet or exceed established standards. The mission of the OEMS is to reduce preventable mortality and morbidity caused by trauma and other emergency medical conditions.

FORCE OF LAW

The Code of Alabama 1975, §22-18-1, set forth the authority of the OEMS to create rules and regulations. The legislation includes mandates for the State Emergency Medical Control Committee (SEMCC), and all regulatory processes (licensure, fees, compliance, operations, etc.) regulated by the OEMS.

ADMINISTRATIVE MISSION

The spectrum of tasks that the OEMS implements for the Alabama Department of Public Health (ADPH) and Alabama, at large, includes but is not limited to:

- Facilitation of the prehospital component of the Alabama Incident Management System (AIMS), which allows the ADPH to monitor hospitals, nursing homes, and ambulance resources during times of disaster.
- Facilitation of the Emergency Medical Services (EMS) staffing of Medical Needs Shelters for the Center for Emergency Preparedness, during times of disaster.
- Facilitation and administration of Alabama's electronic patient care reporting (e-PCR) entreated by the federal government via the National Emergency Medical Services Information System (NEMSIS). The OEMS provides free software to facilitate licensed EMS provider data reporting. The software, Recording of Emergency Medical Services Calls and Urgent-care Environment (RESCUE), is compliant with the NEMSIS Version 3 platform for national EMS reporting. Otherwise, third-party software vendors are supplied upon request with the Alabama NEMSIS Version 3 schematron to enable their Alabama EMS provider service clients' e-PCR process. Data uploaded by EMS provider services is retained in the Alabama NEMSIS repository and further uploaded to the national NEMSIS repository.

- Facilitation and administration of Alabama's prehospital EMS provision; including standards, licensure, and compliance oversight for individuals, services, businesses, and departments engaged in provision of emergency medical care and/or transport of the sick and injured; oversight and guidance for universities, colleges, and schools engaged in EMS training; and the responsibility for quality assurance and quality improvement processes for Alabama EMS provider services through periodic inspection of deployed EMS vehicles and equipment and, for individuals and service providers, through definitive complaint investigation and adjudication.
- Facilitation and administration of Alabama's arrangement with the National Registry of Emergency Medical Technicians (NREMT) to oversee and guarantee integrity of the National Registry of EMTs examination process. National Registry certification is a prerequisite for licensure at the level of that certification in Alabama.
- Facilitation and administration of Alabama's Acute Health Systems (AHS) which includes the Alabama Trauma System (ATS) and the Alabama Statewide Stroke System, as well as the Alabama Trauma Registry (ATR), which also closely monitors head and spinal cord injuries. The AHS are also currently developing to include data reporting and management of cardiac data, especially myocardial infarction pathologies. That component of the AHS (the Alabama ST-Elevation Myocardial Infarction, or STEMI system) is now online. Much of the data collection and management for AHS is facilitated through the University of Alabama at Birmingham. In all aspects of the AHS, the OEMS coordinates with area hospitals to facilitate uniform data recording of provided care to enable data follow-up of patients from the prehospital phase until well into the specialty hospital care process.
- Facilitation and administration of the Alabama EMS Regional Agencies. Alabama counties are assigned to one of six EMS Regions that are tasked by the OEMS with: providing an initial point of contact for EMS issues or concerns, organizing meetings, and providing effective communication between local communities and the OEMS, assisting constituent EMS personnel with rules compliance, providing local ongoing credentialing, and functioning as a clearing house for EMS education activities. Each regional agency also assists with coordination and implementation of the AHS components.
- Facilitation and administration of the federally funded Emergency Medical Services for Children (EMSC) Program. The purpose of the EMSC is to prevent and reduce child, youth, and adolescent disability and death resulting from severe illness and injury. To accomplish its goal, the program provides education for prehospital providers and ensures that the American Academy of Pediatrics/American College of Emergency Physicians (AAP/ACEP) guideline compliant equipment is available on prehospital emergency vehicles that transport children.

- Provision of EMS data management and analysis for the purposes of quality assurance and improvement, compliance investigations, public health investigations of illness and injury, and research to drive the development of EMS efficacy in Alabama.

Purpose and Methods

PURPOSE

The purpose of this report is to present to our stakeholders a systematic overview of EMS calls occurring in Alabama in 2025. Data for this report was synthesized from the RESCUE database developed by the Center for Public Safety of the University of Alabama in Tuscaloosa based on NEMSIS V3 data standards.

METHODOLOGY

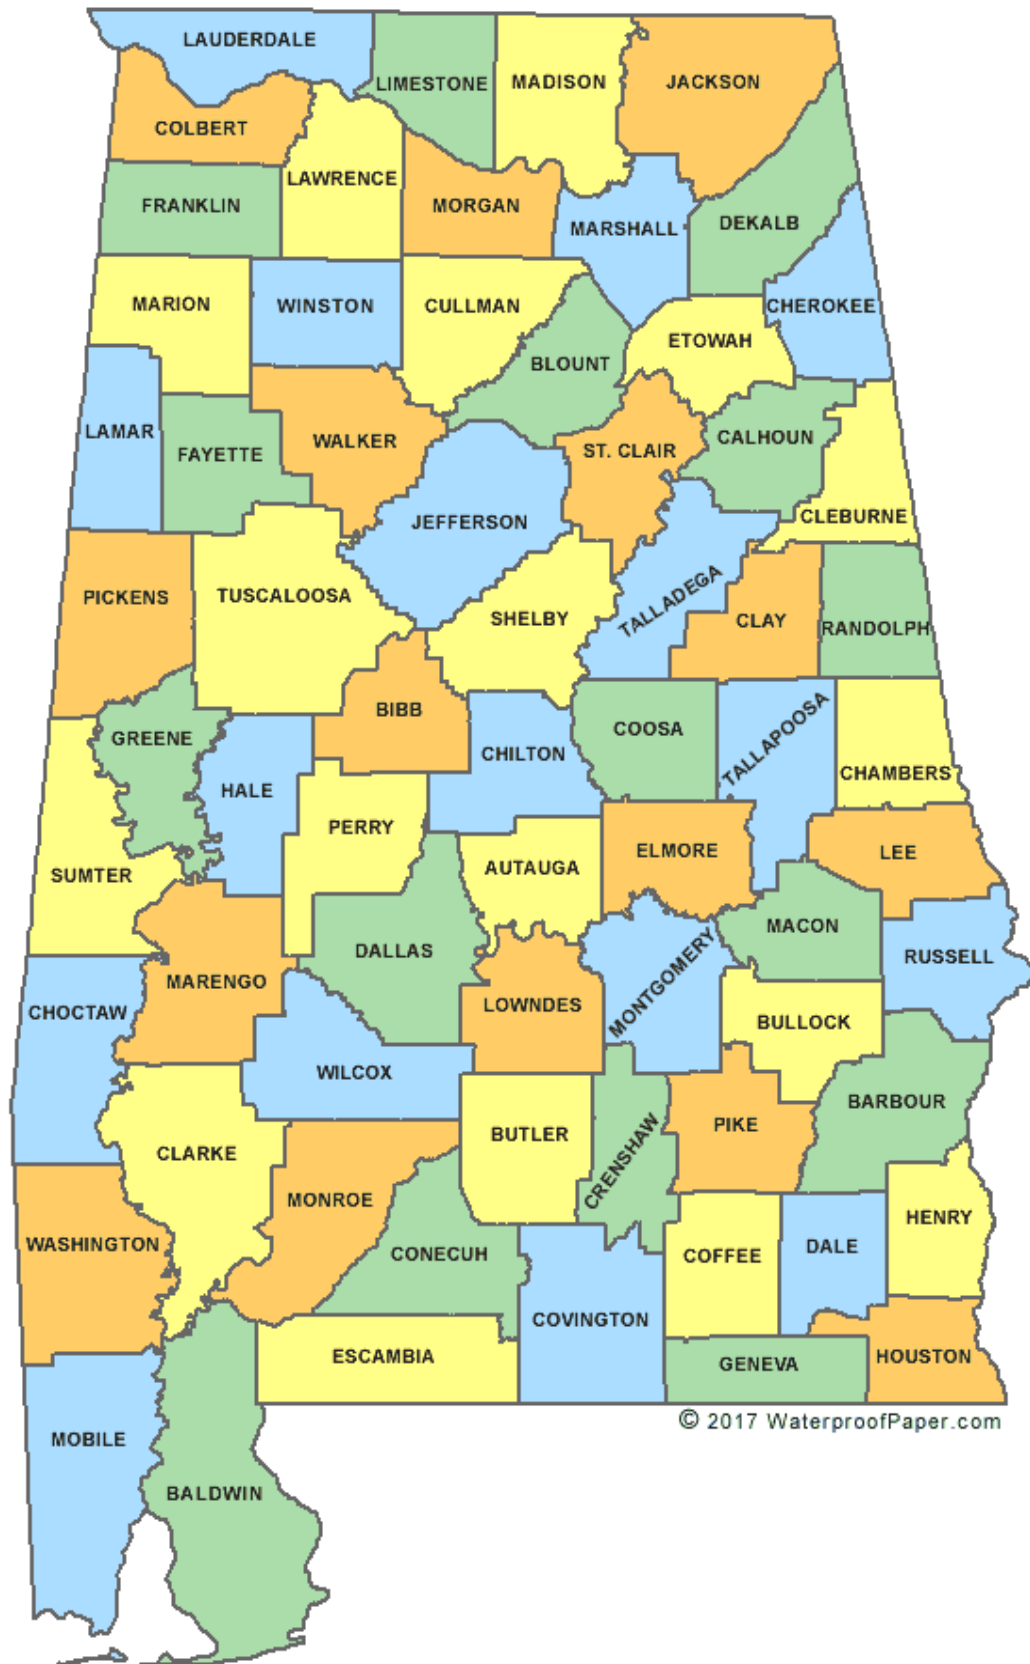

RESCUE captures prehospital care through both required and optional reporting elements and data are validated to meet (NEMSIS-3) standards. RESCUE captures agency information, patient demographics, response times, incident location, prehospital treatment, EMS transport, insurance, and patient disposition.

A total of 1,074,224 EMS reports were successfully submitted to RESCUE from January 1, 2025, to December 31, 2025, as of March 29, 2026. The OEMS used the 2025 U.S. Census Bureau, Vintage Year 2025 Population Estimates www.census.gov/programs-surveys/popest.html figures to calculate EMS runs per 10,000 Alabama residents.

2025 Alabama EMS Annual Report
Blood and Blood Product Administration Outreach Study (Chart 36)
01/01/2025 – 12/31/2025

OVERVIEW

As of this writing, Alabama licenses 357 Emergency Medical Provider Services. Of those, 313 are licensed at the ALS1 or ALS1 CC (Critical Care) level. Of those ALS services, 230 are categorized as providing patient transport, and 83 are categorized as non-transport (first response only). In May of 2026, OEMS selected 230 transport services active in 2025 that were categorized as ALS (and thus eligible to carry and administer blood) for query regarding their blood and blood product administration status and volume.

RESULTS

Of the selected services, 43 were found to be air transport (helicopter) services and all air transport services were found to provide blood. Additionally, 20 ground transport services were found to provide blood and 3 ground non-transport services not on the original list were discovered to provide blood. Self-reporting of blood and blood product administration numbers was found to be problematic and incomplete; therefore, we estimate that 66 Emergency Medical Provider Services provided blood in 2025, with an estimated number of administrations based upon reported totals ranging from 1,386 to 1,450 units of blood or blood products. OEMS reporting guidelines were adjusted to improve accuracy in feedback.

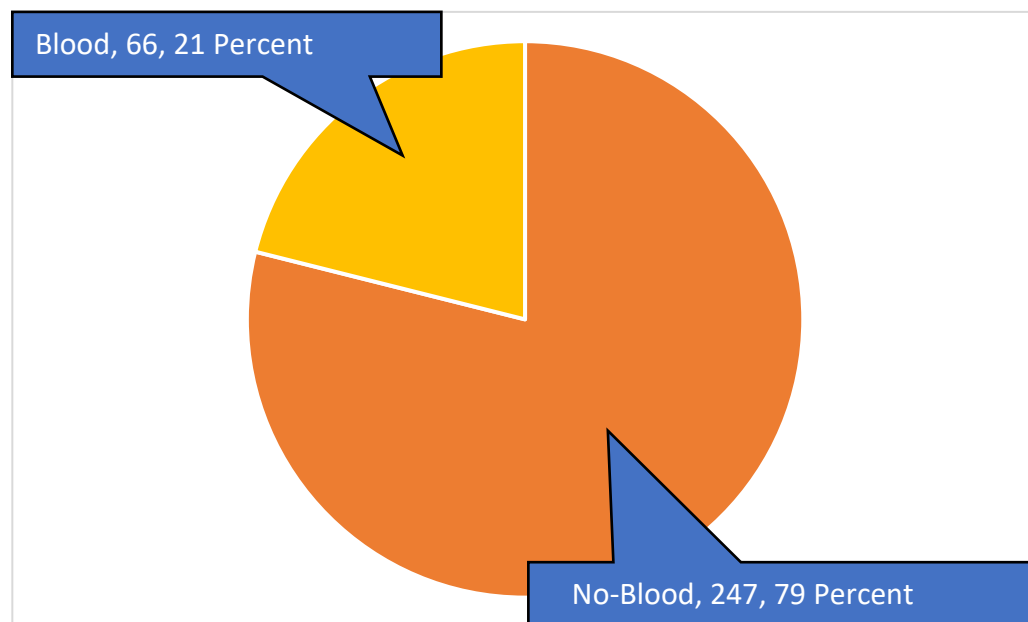

Chart 36 shows proportion of blood providing eligible services. Only approximately 21 percent (n = 66) of eligible services choose to provide blood and blood products during study year 2025.
