

Alabama Department of Public Health, Technical Services Unit
Written Fire Safety Plan

07/07/2020

The 2012 Life Safety Code, at sections 18.7.2 and 19.7.2, requires health care facilities to maintain a written Fire Safety Plan on the premises. All employees are required to be periodically instructed and kept informed with respect to their duties under the plan. During Life Safety Code surveys conducted by the Department of Public Health (Technical Services), Fire Safety Plans will be checked to verify that they include the nine items required in paragraphs 18.7.2.2 and 19.7.2.2. In addition, facilities that utilize door locking arrangements must include a written description of the function of each locked or delayed-egress door, preferably accompanied by a small-scale floor plan of the facility.
