HOW DOES THE ALABAMA PREGNANCY RISK ASSESSMENT MONITORING SYSTEM (AL-PRAMS) WORK?

The Alabama Center for Health Statistics provides the AL-PRAMS Program with a randomized monthly sample of mothers who have had a recent delivery within the preceding 2 to 6 months, drawn from Alabama's birth certificate data.

The figure below visualizes how the Centers for Disease Control and Prevention used the completed surveys to accurately represent what the maternal population at the state level would select concerning topics such as vaping.
