INFANT MORTALITY RATES
ALABAMA, 2016-2025

IMRs BY YEAR
ALABAMA, 2016-2025 †

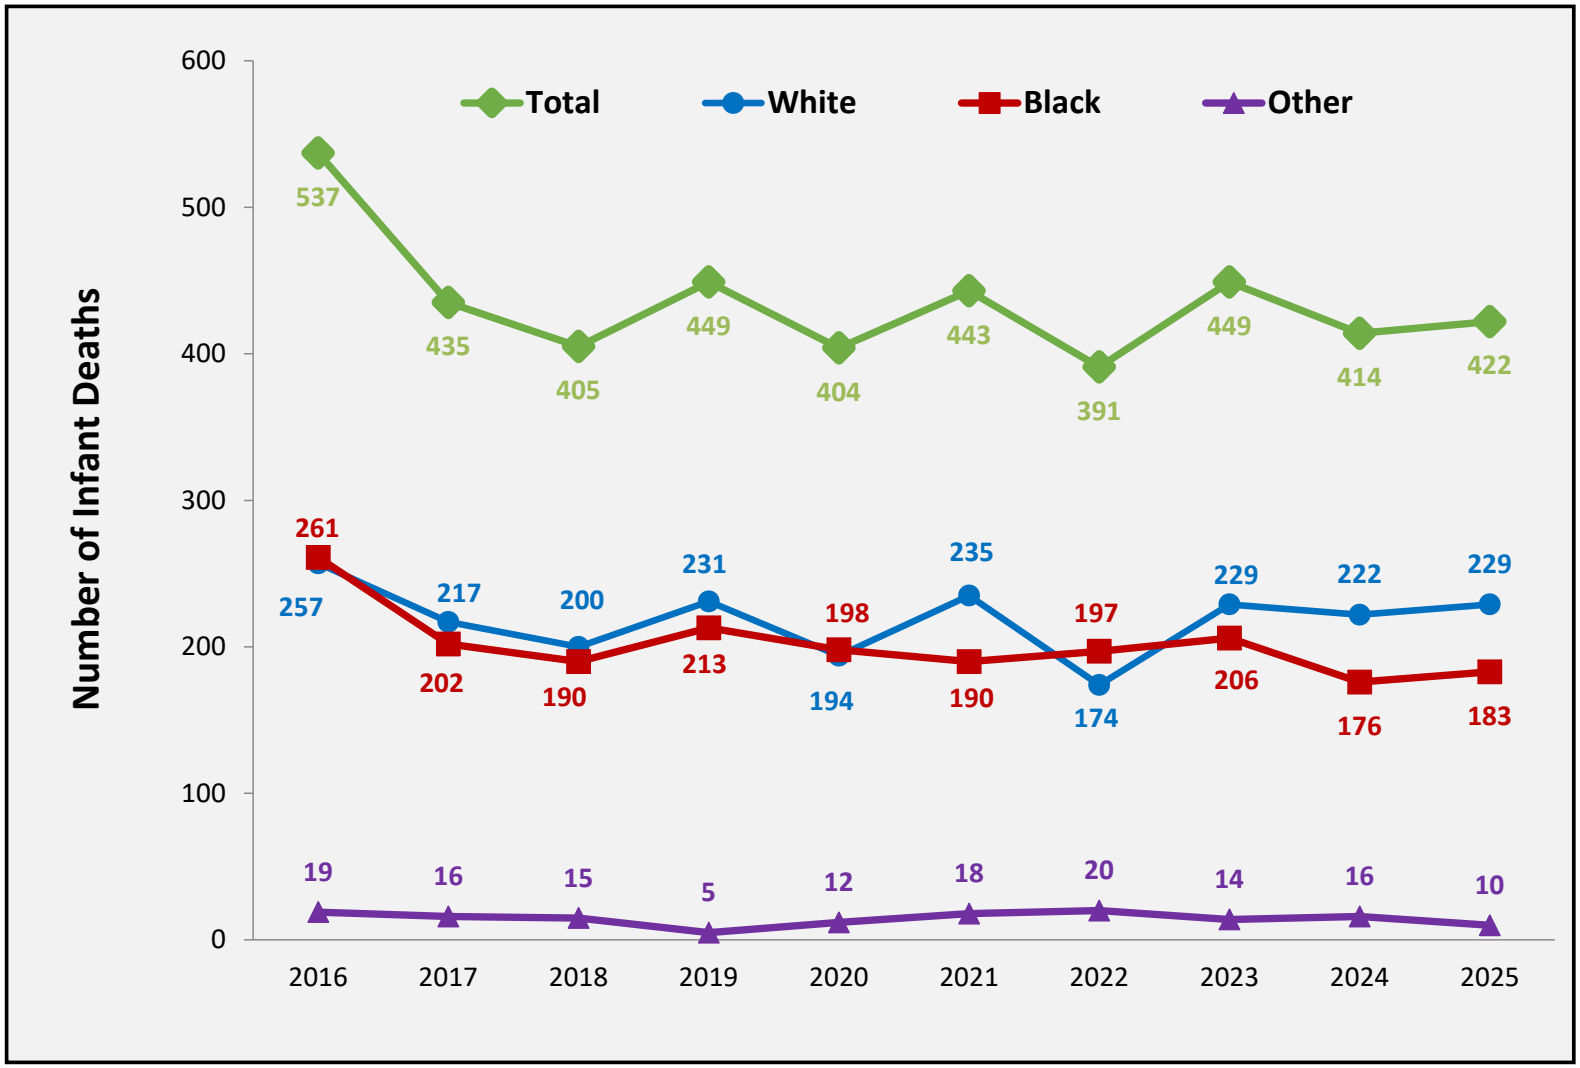

Source: Alabama Department of Public Health, Center for Health Statistics
† Infant mortality rates per 1,000 live births.

$$\text{IMR} = \frac{\text{Number of infant deaths under 1 year old}}{\text{Number of live births}} \times 1{,}000$$

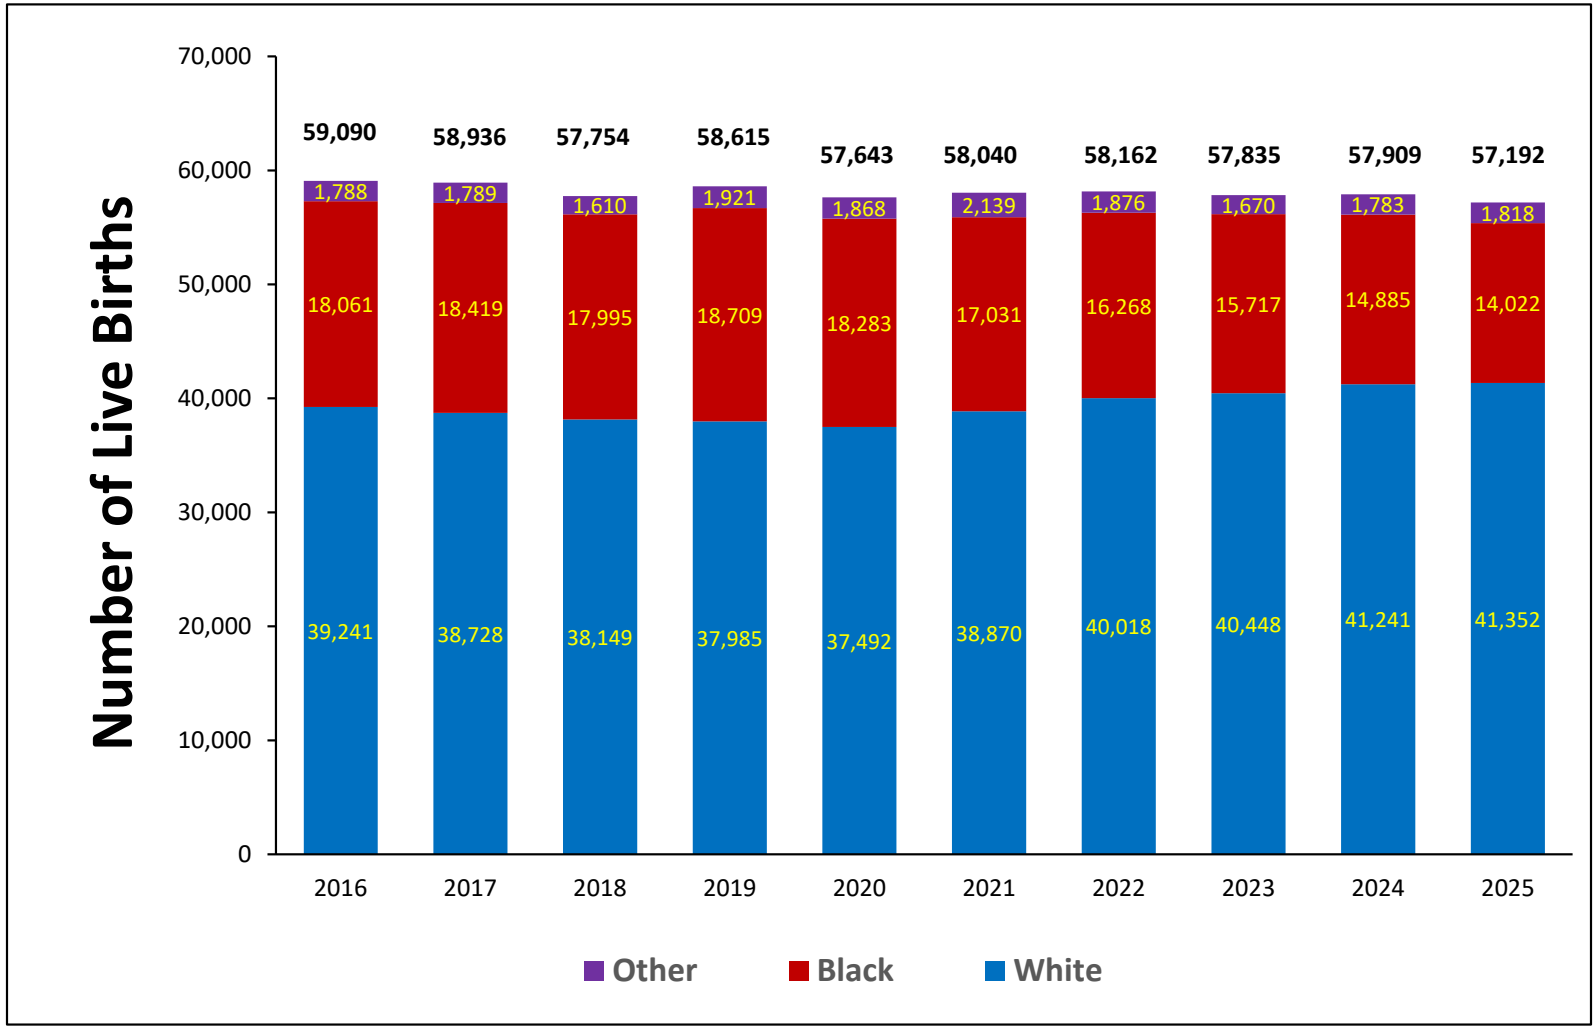

$$\text{Alabama 2025 IMR} = \frac{422}{57{,}192} \times 1{,}000 \approx 7.4$$

The 2025 IMR was 7.4 deaths per 1,000 live births, representing an increase of 0.3 compared to 2024. A total of **422** infants died before reaching their first birthday in 2025, which was 8 more infant deaths than **414** in 2024.

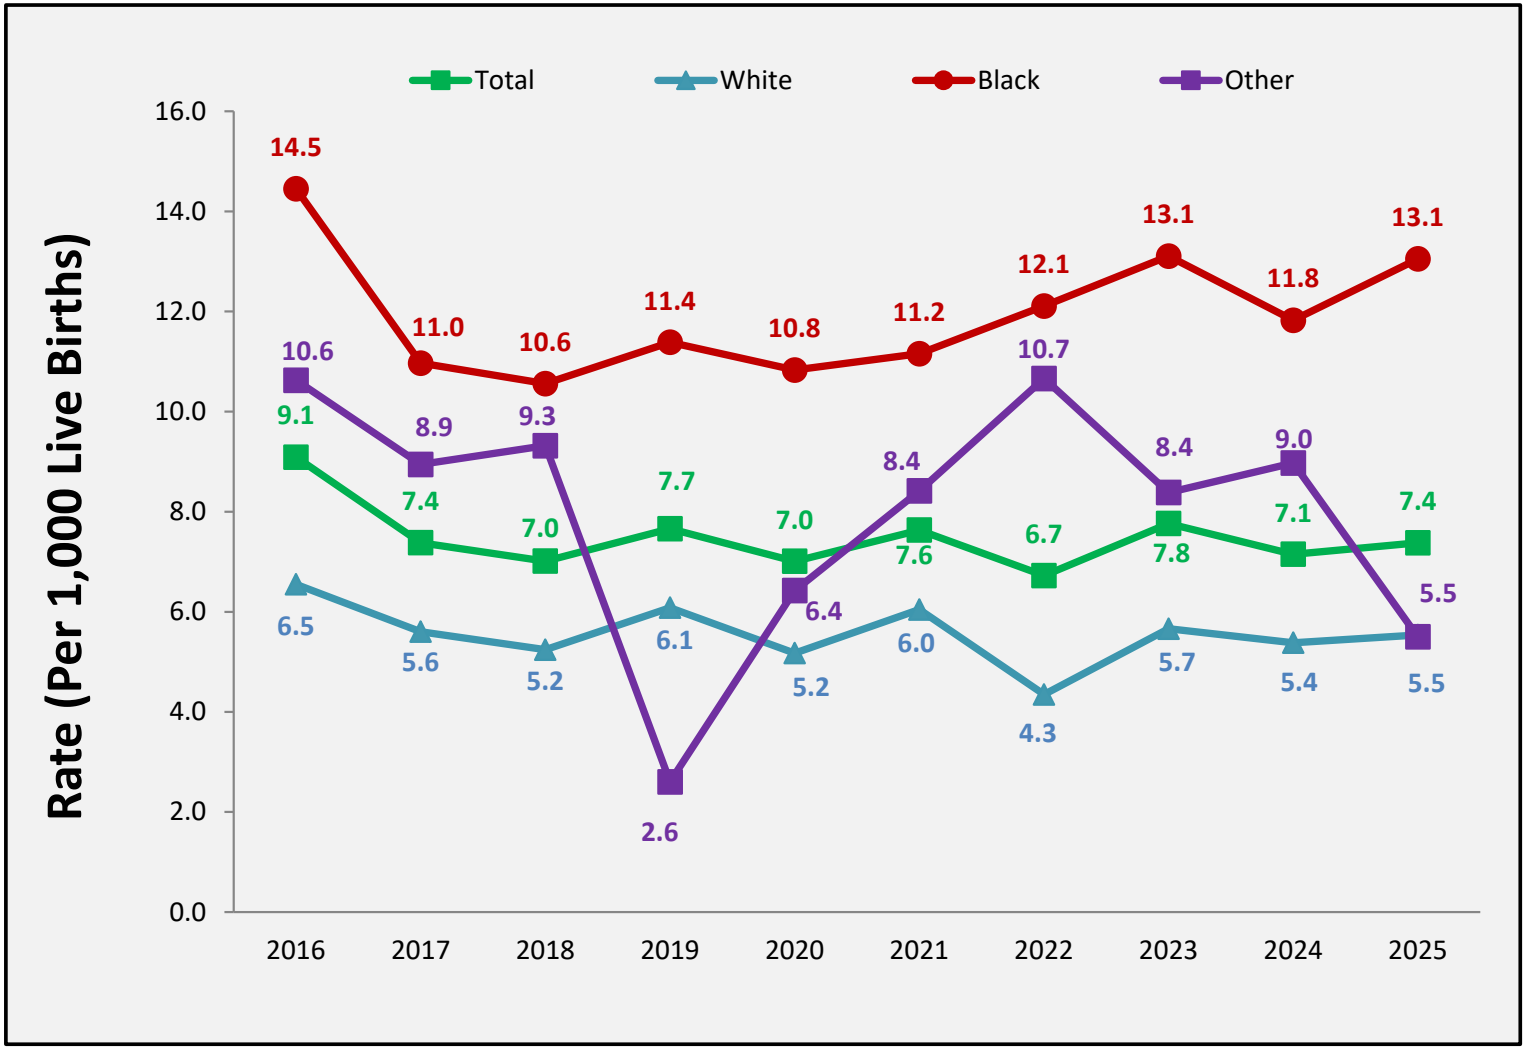

NUMBER OF INFANT DEATHS
ALABAMA, 2016-2025

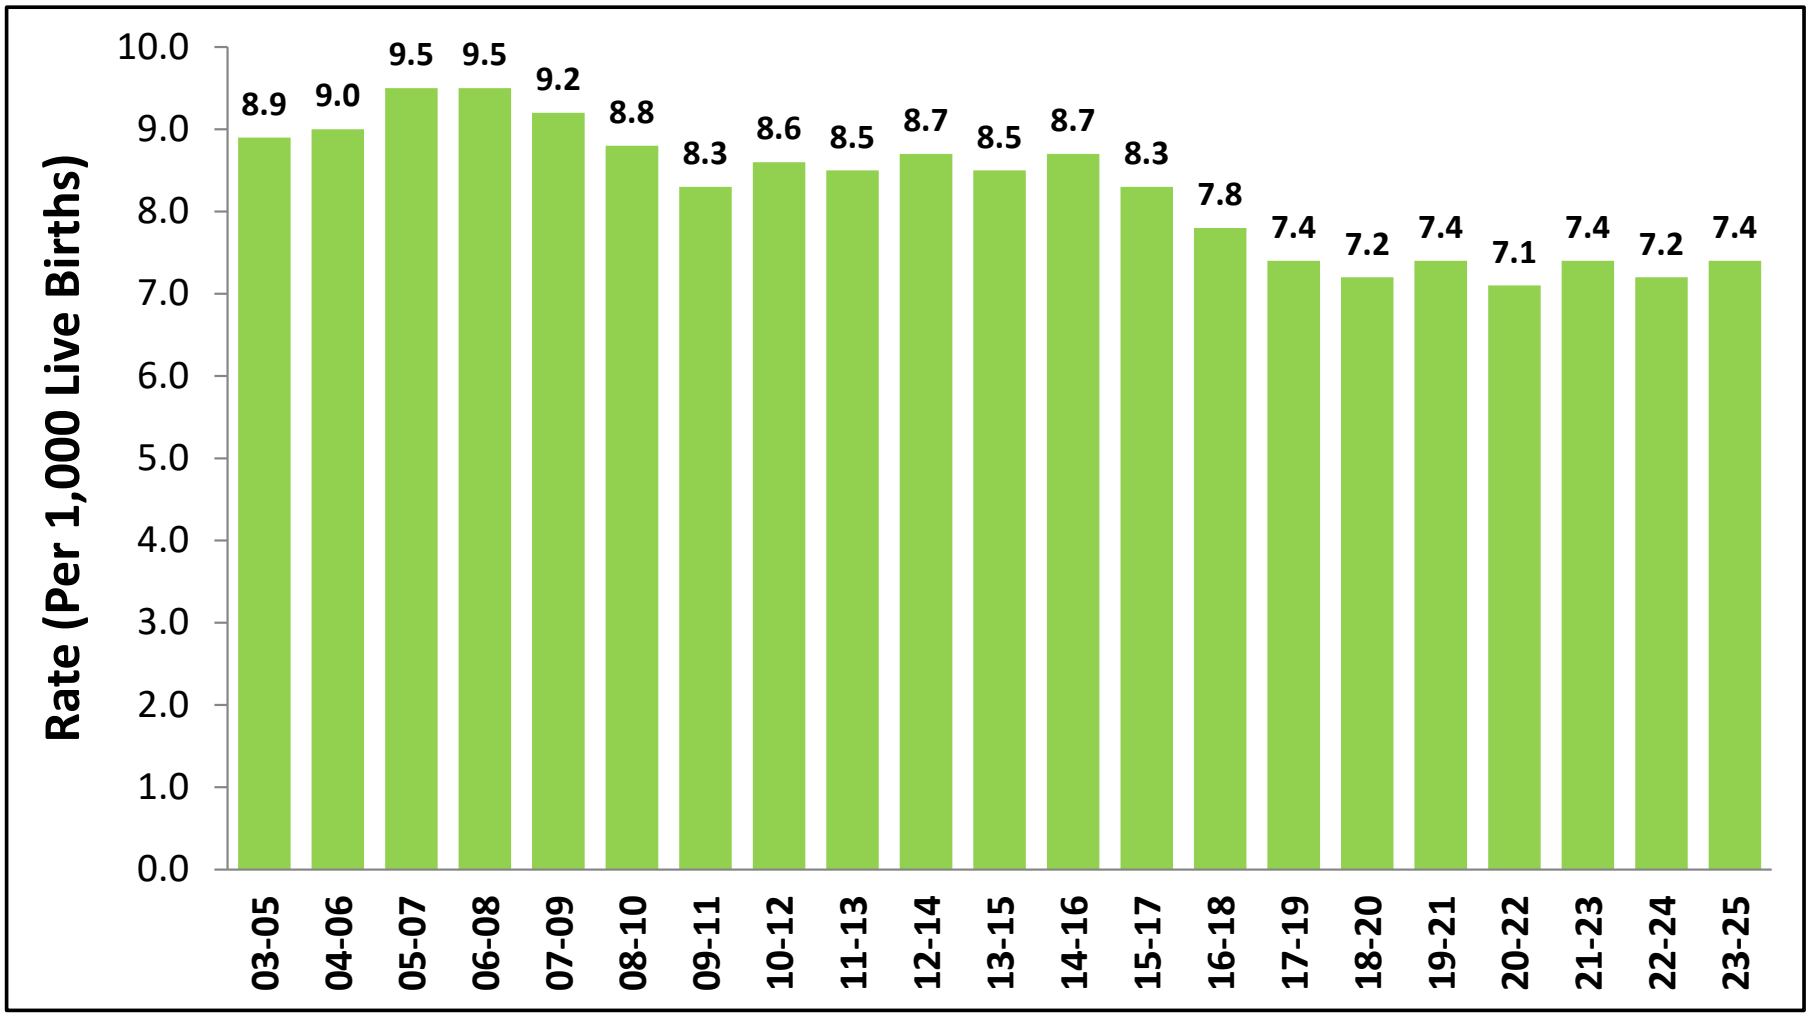

NUMBER OF BIRTHS
ALABAMA, 2016-2025

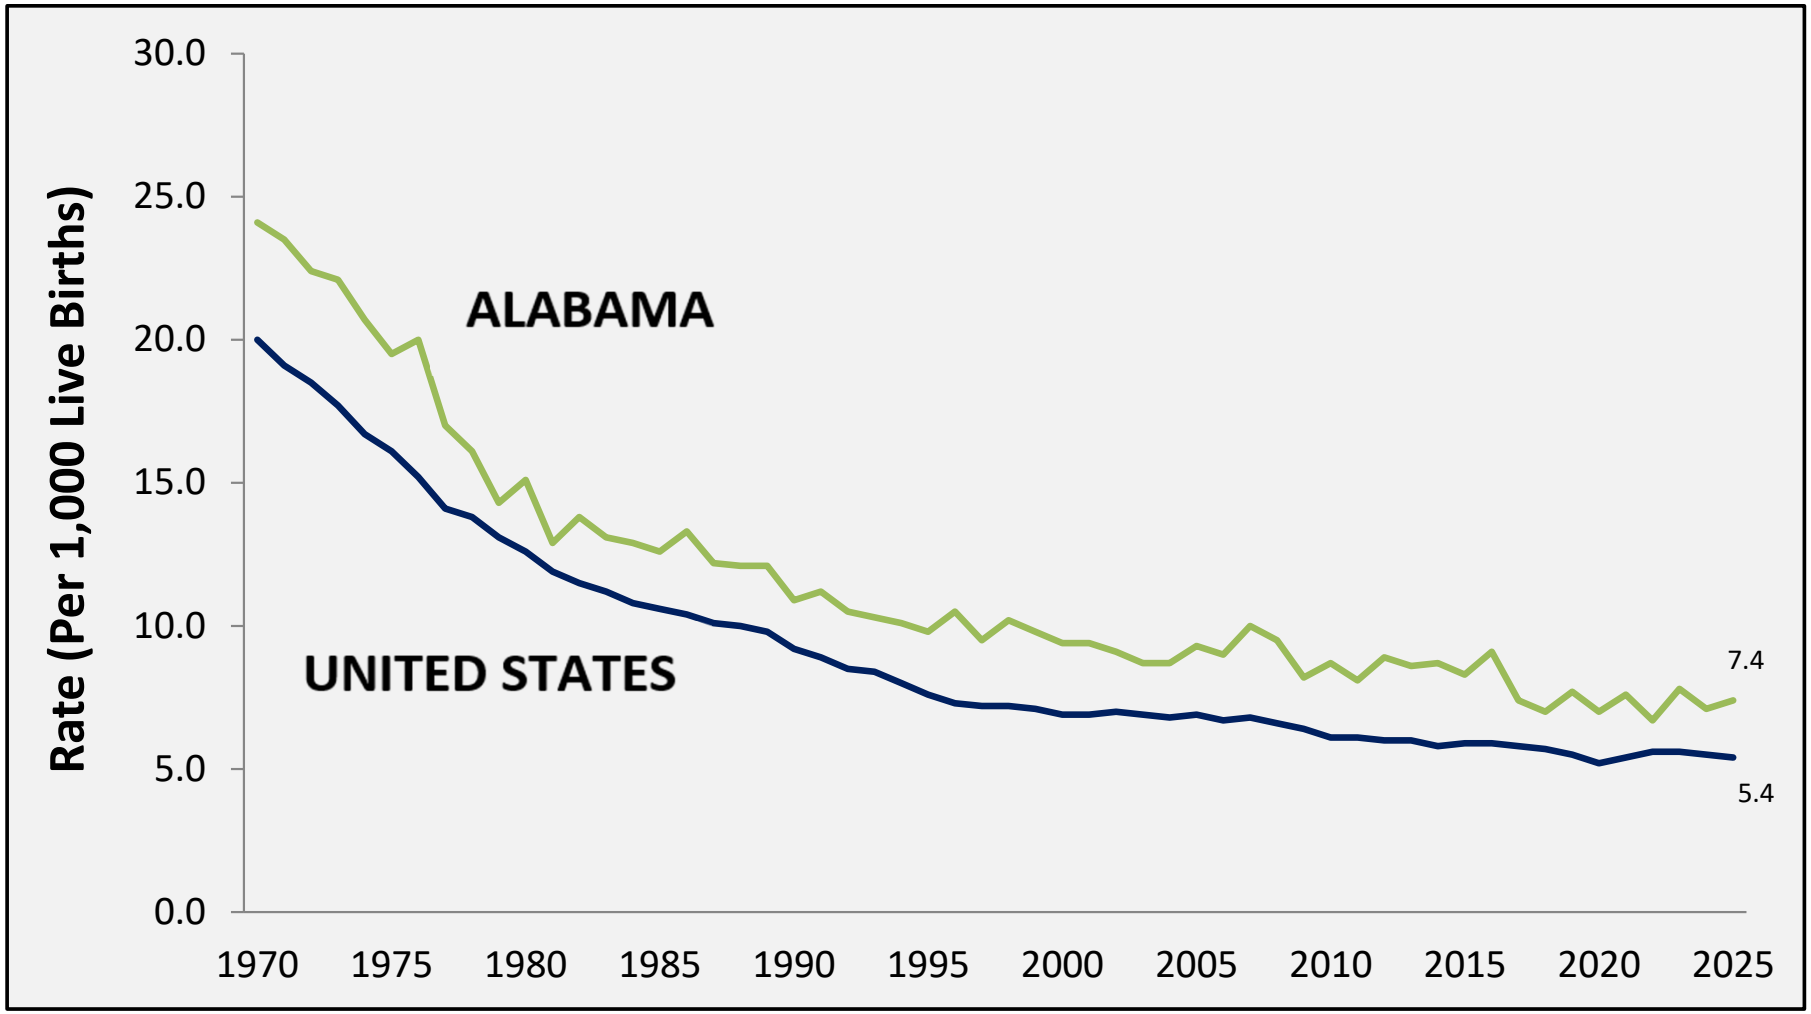

INFANT MORTALITY RATES
ALABAMA, 2016-2025

THREE-YEAR INFANT MORTALITY RATES
ALABAMA, 2003-2005 to 2023-2025

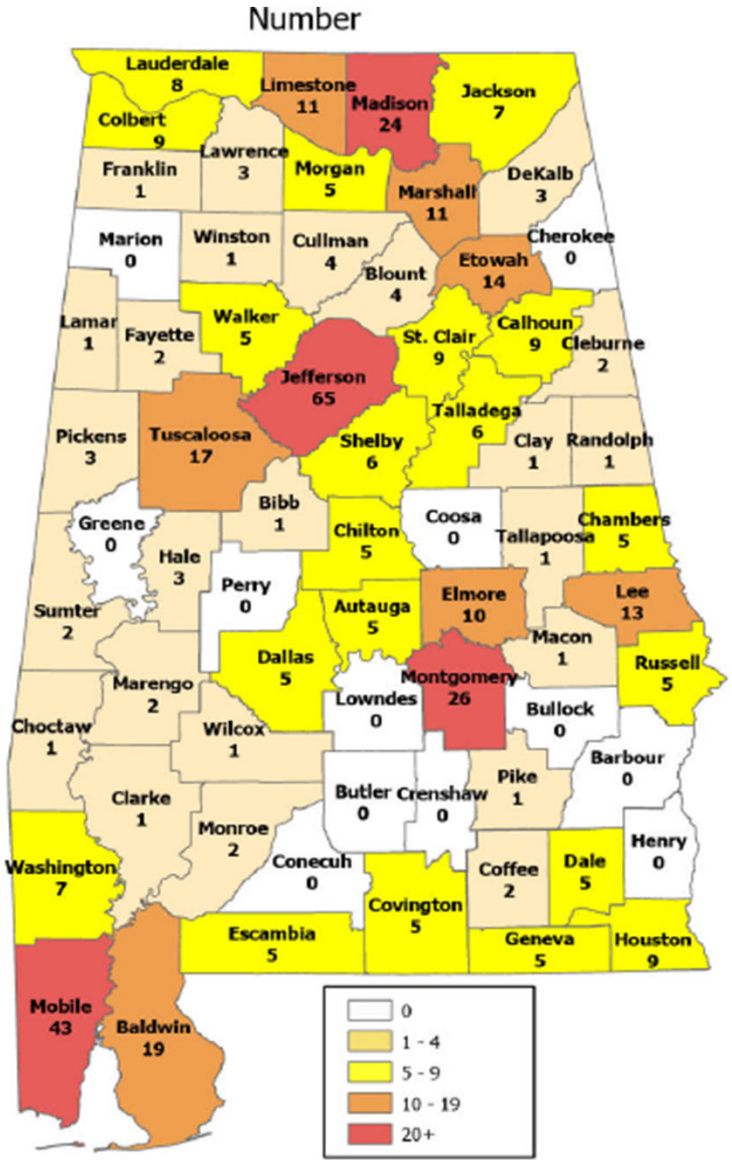

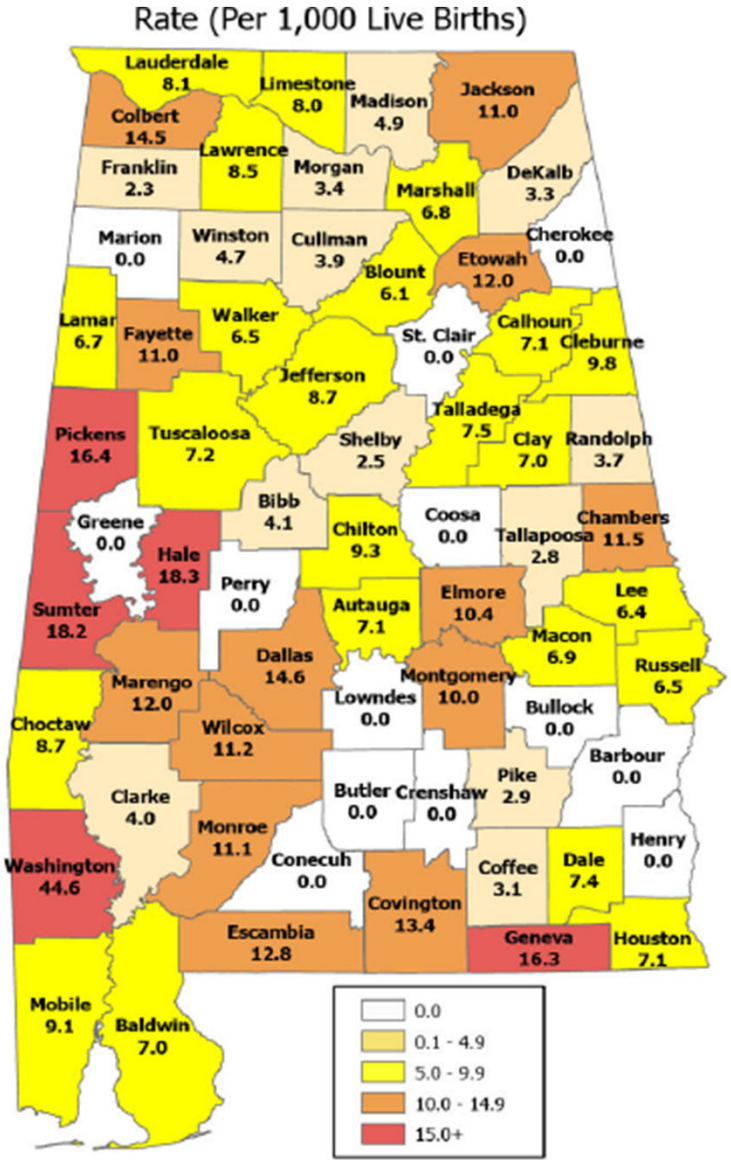

INFANT MORTALITY RATES
ALABAMA AND UNITED STATES[1], 1970-2025

INFANT MORTALITY BY COUNTY OF RESIDENCE
ALABAMA, 2025

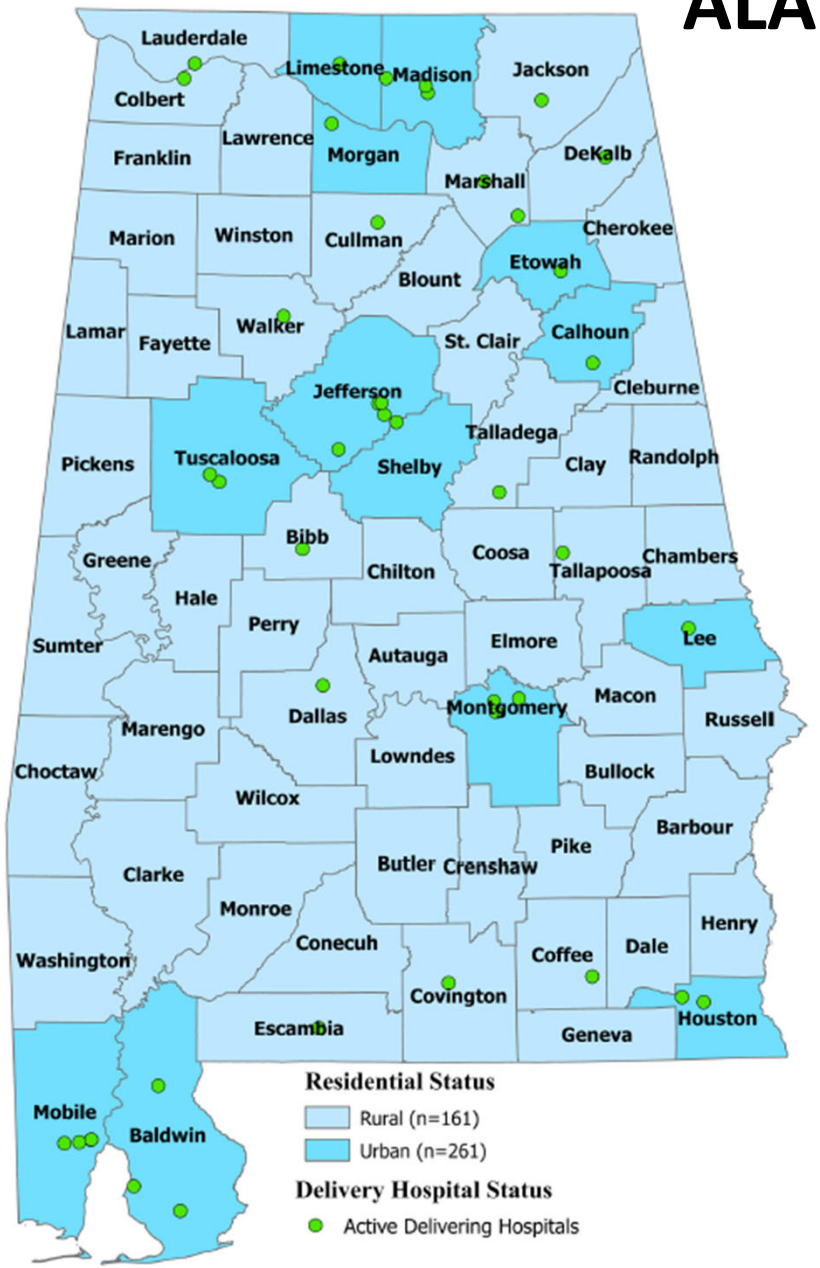

COUNTY IMRs AND DELIVERING HOSPITAL STATUS
ALABAMA, 2025

Source: Alabama Department of Public Health, Center for Health Statistics
† Infant mortality rates per 1,000 live births.
Note: No delivering hospitals became inactive in 2025. The total statewide number of active delivering hospitals was 42.

DISTRIBUTION OF INFANT MORTALITY BY RURAL AND URBAN CLASSIFICATIONS ALABAMA, 2025

Infant Mortality Rates by Residential Status			
Residential Classifications	Deaths	Births	Rate†
Urban	261	35,708	7.3
Rural	161	21,484	7.5
Total	422	57,192	7.4

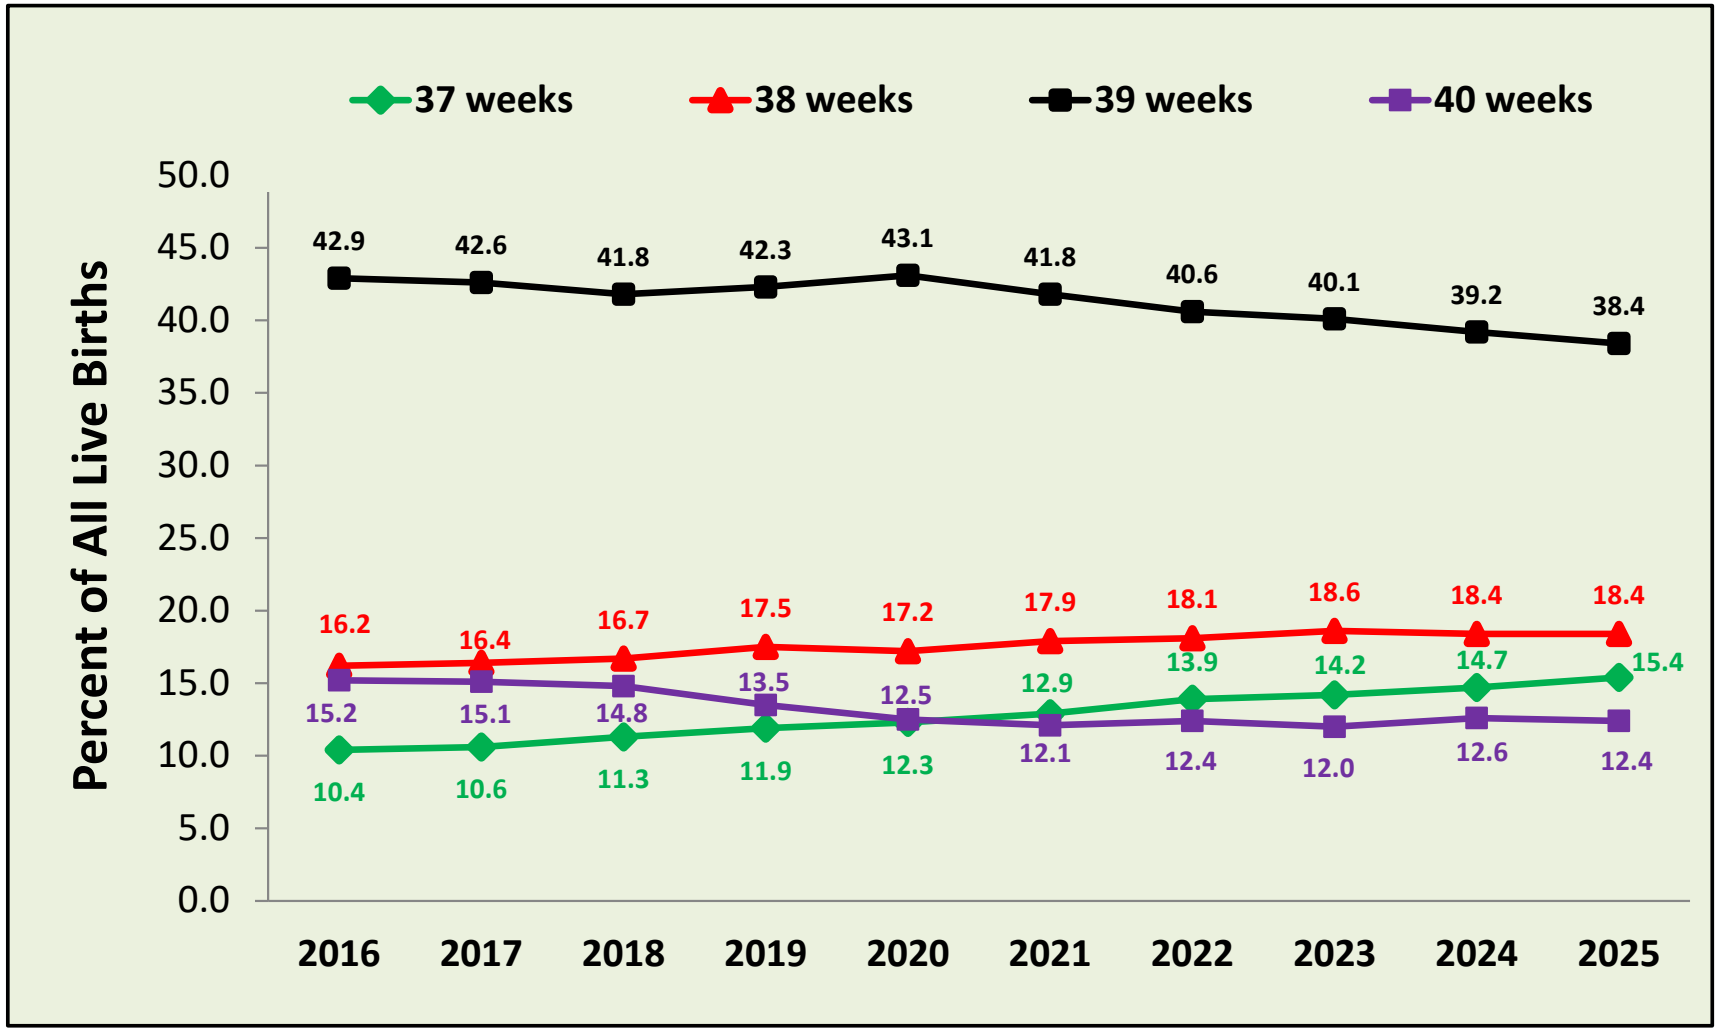

How the Office of Maternal & Child Health defines Urban and Rural Status		
Urban Classifications	Resident Population	Counties
Urban	100,000 or More	13 (19.4)
Rural	Less than 100,000	54 (80.6)
Total Alabama Counties		67 (100.0)

Sources: 2024 American Community Survey 5-Year Population Estimates, Table DP05 and Alabama Department of Public Health, Center for Health Statistics

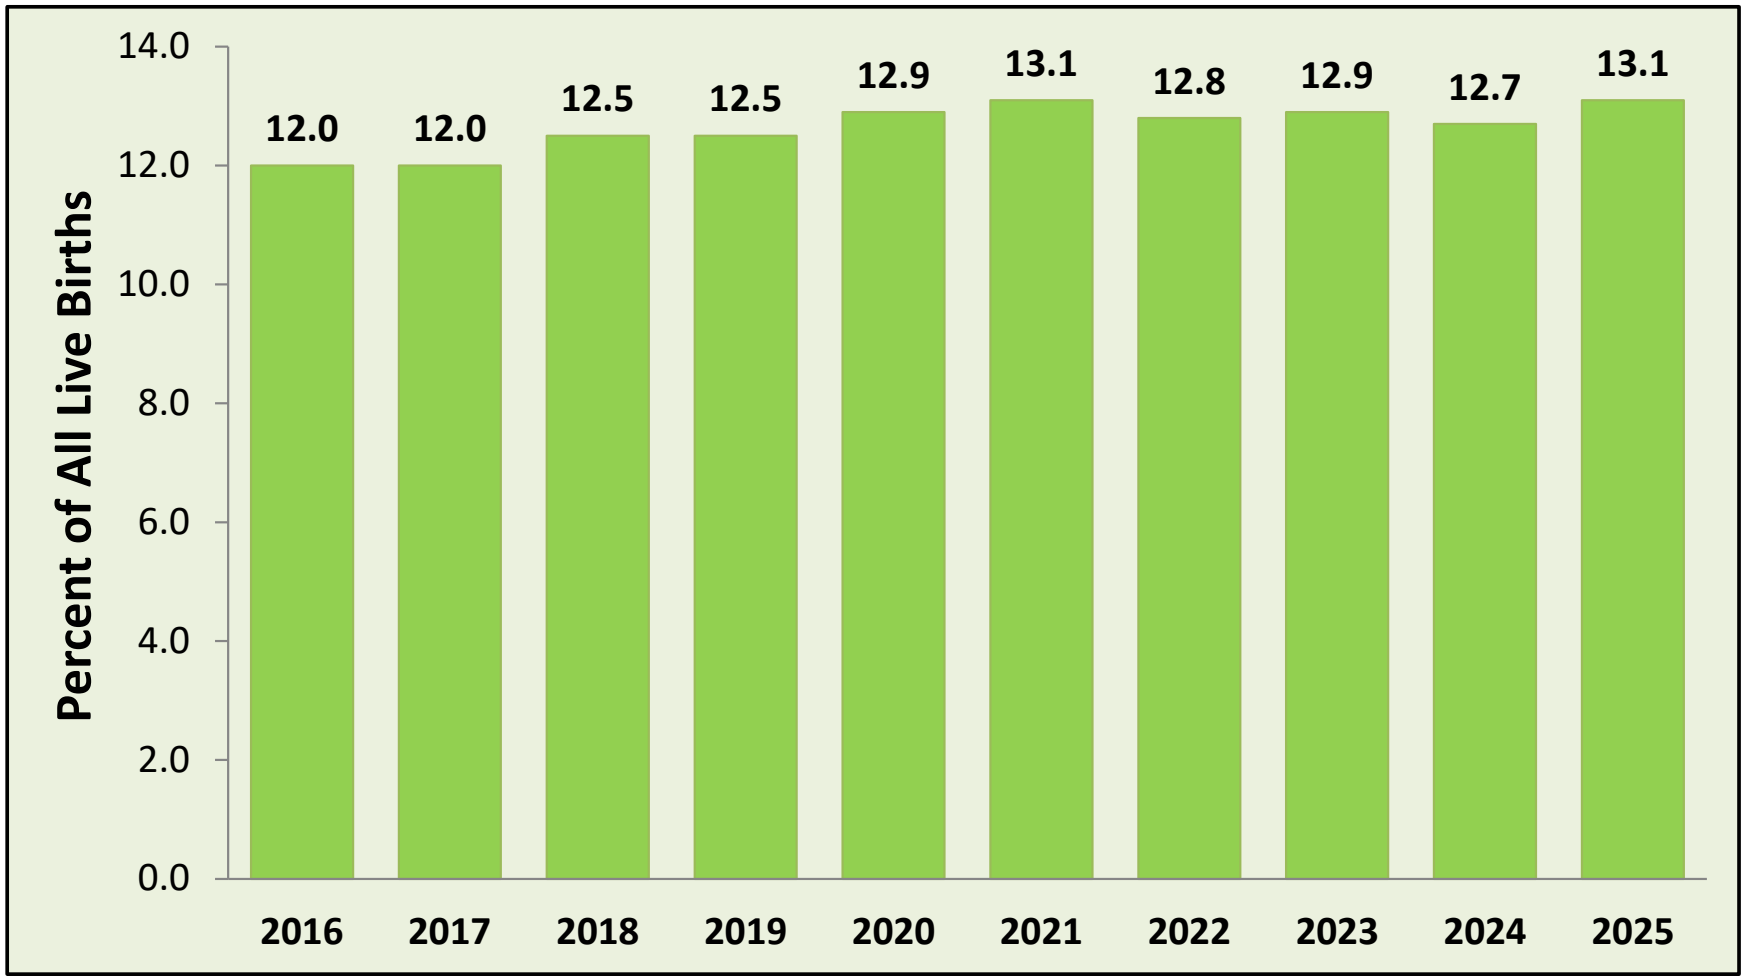

† Infant mortality rates per 1,000 live births.

Note: No delivering hospitals became inactive during 2025. The total number of active delivering hospitals was 42.

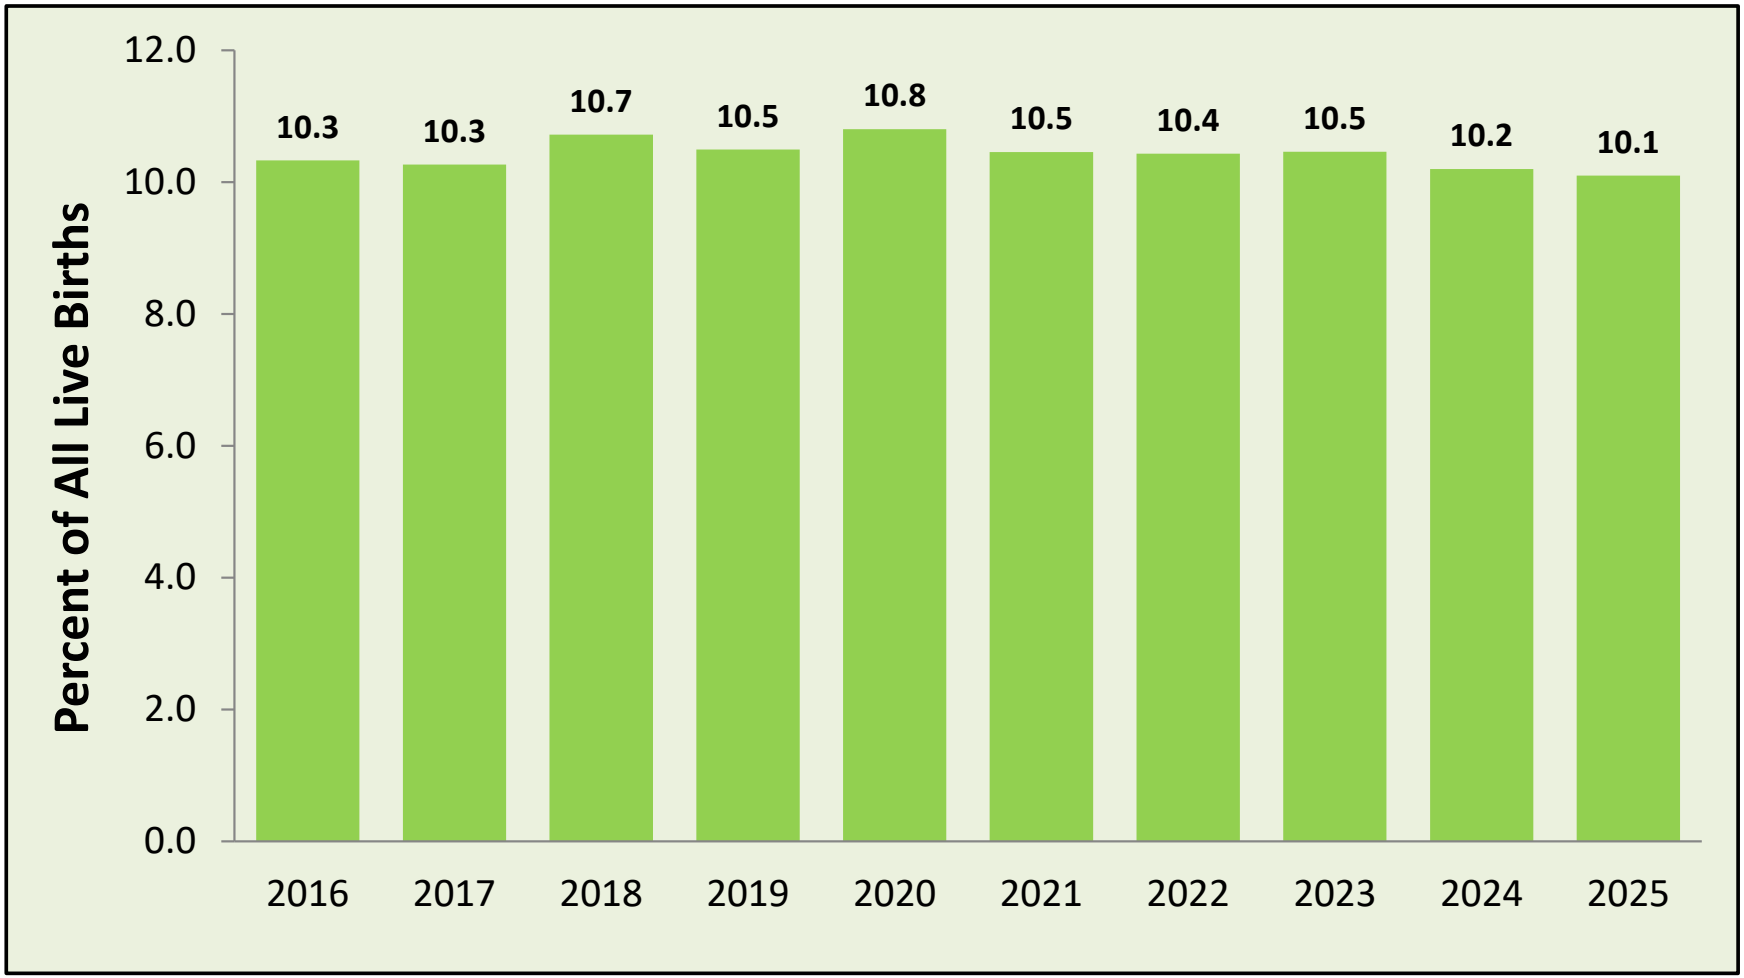

PERCENT OF BIRTHS AT 37-40 WEEKS GESTATION ALABAMA, 2016-2025

PERCENT OF BIRTHS LESS THAN 37 WEEKS GESTATION ALABAMA, 2016-2025

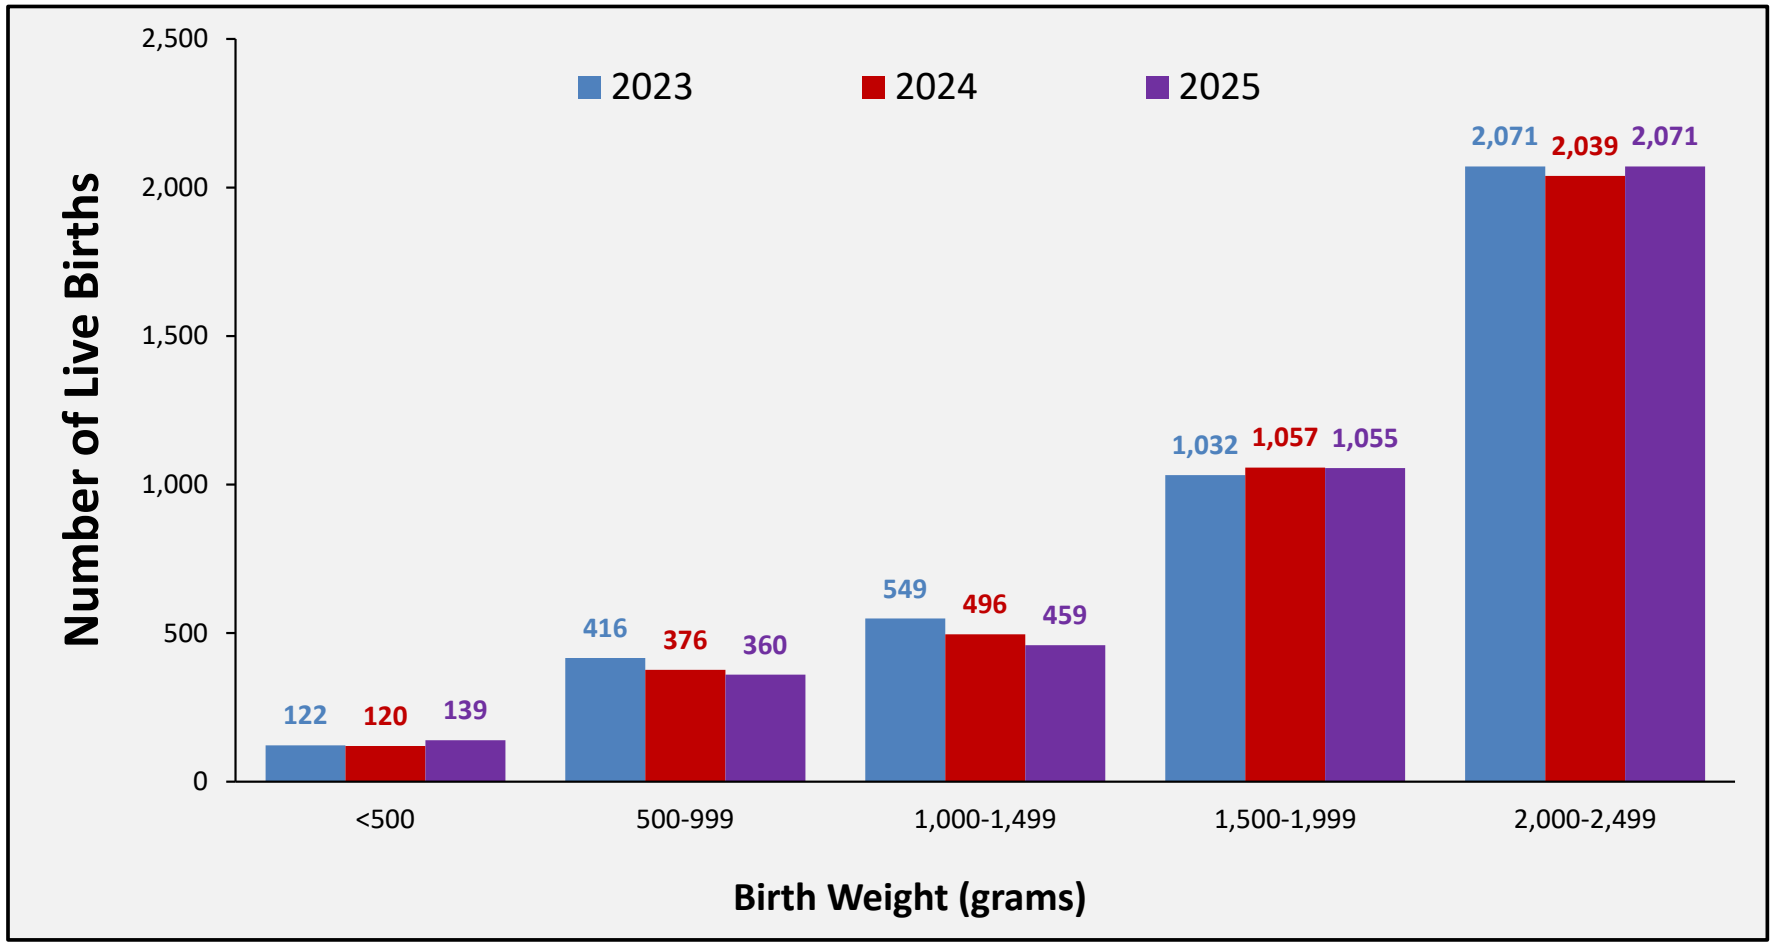

PERCENT OF LOW WEIGHT BIRTHS*
ALABAMA, 2016-2025

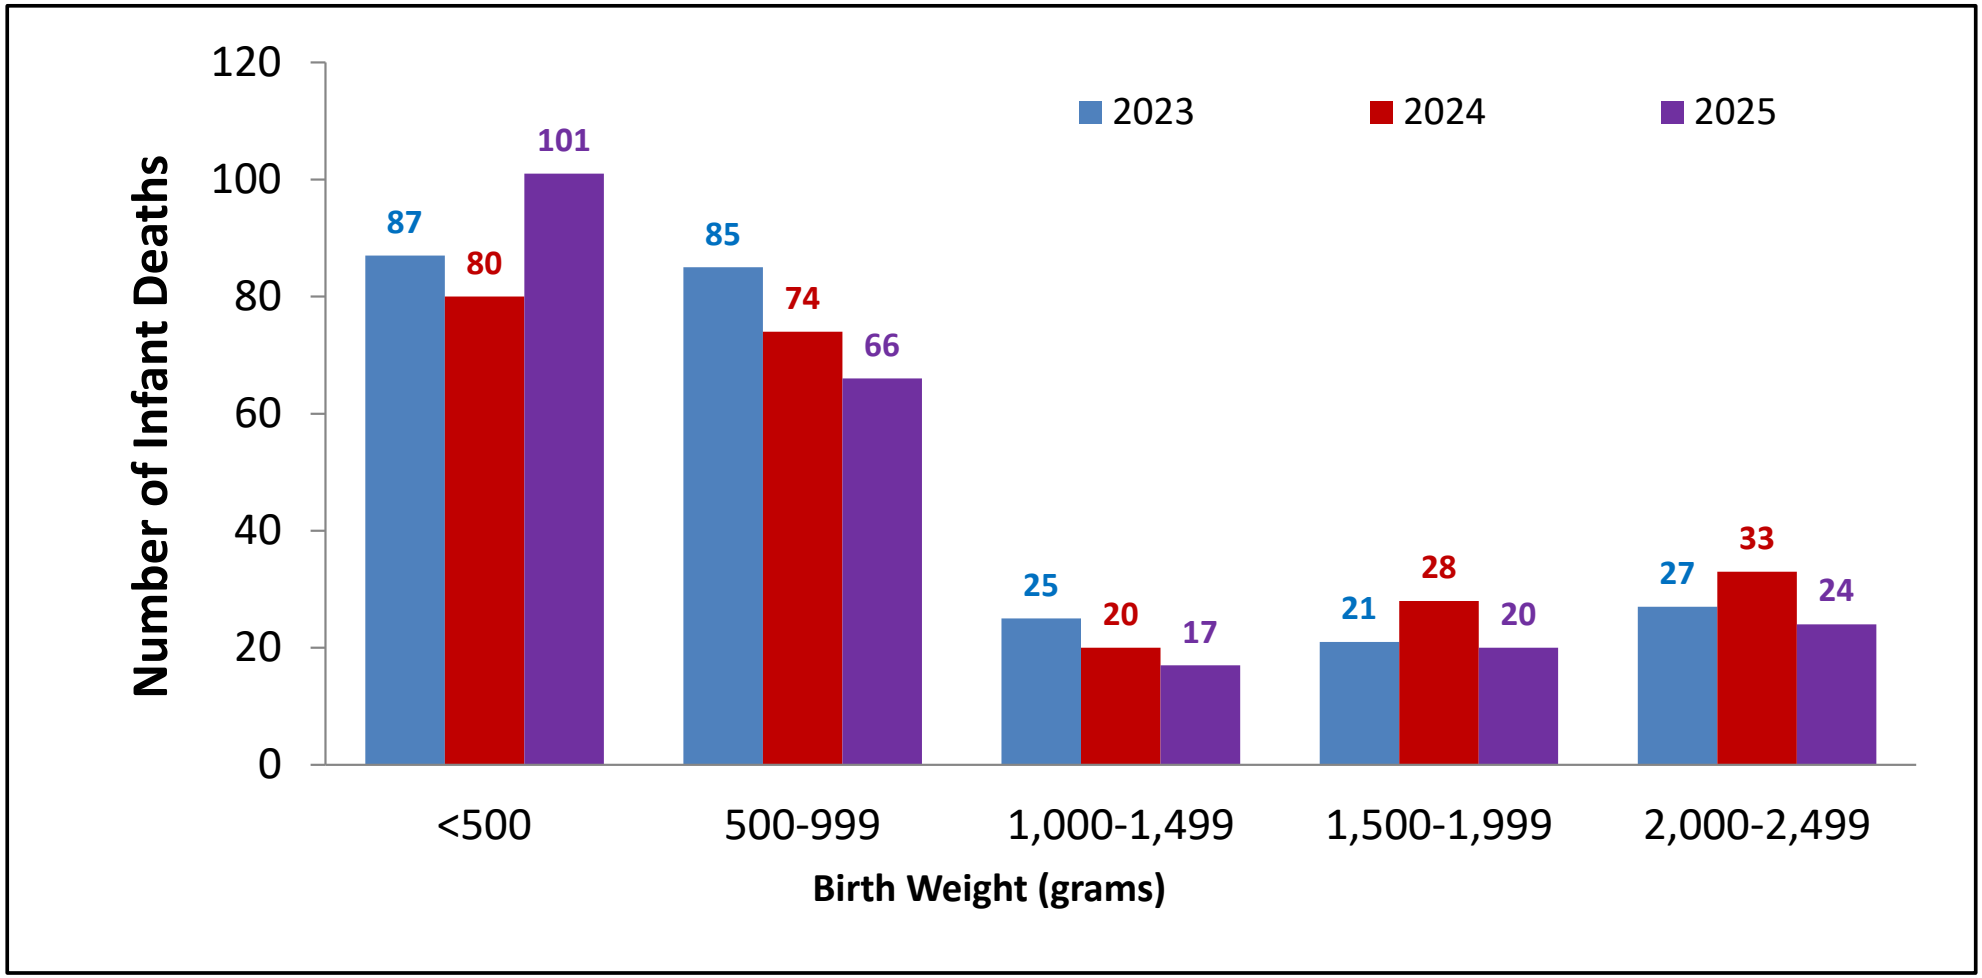

*Low birth weight is weight at birth under 2,500 grams.

NUMBER OF PRETERM BIRTHS* BY BIRTH WEIGHT
ALABAMA, 2023-2025

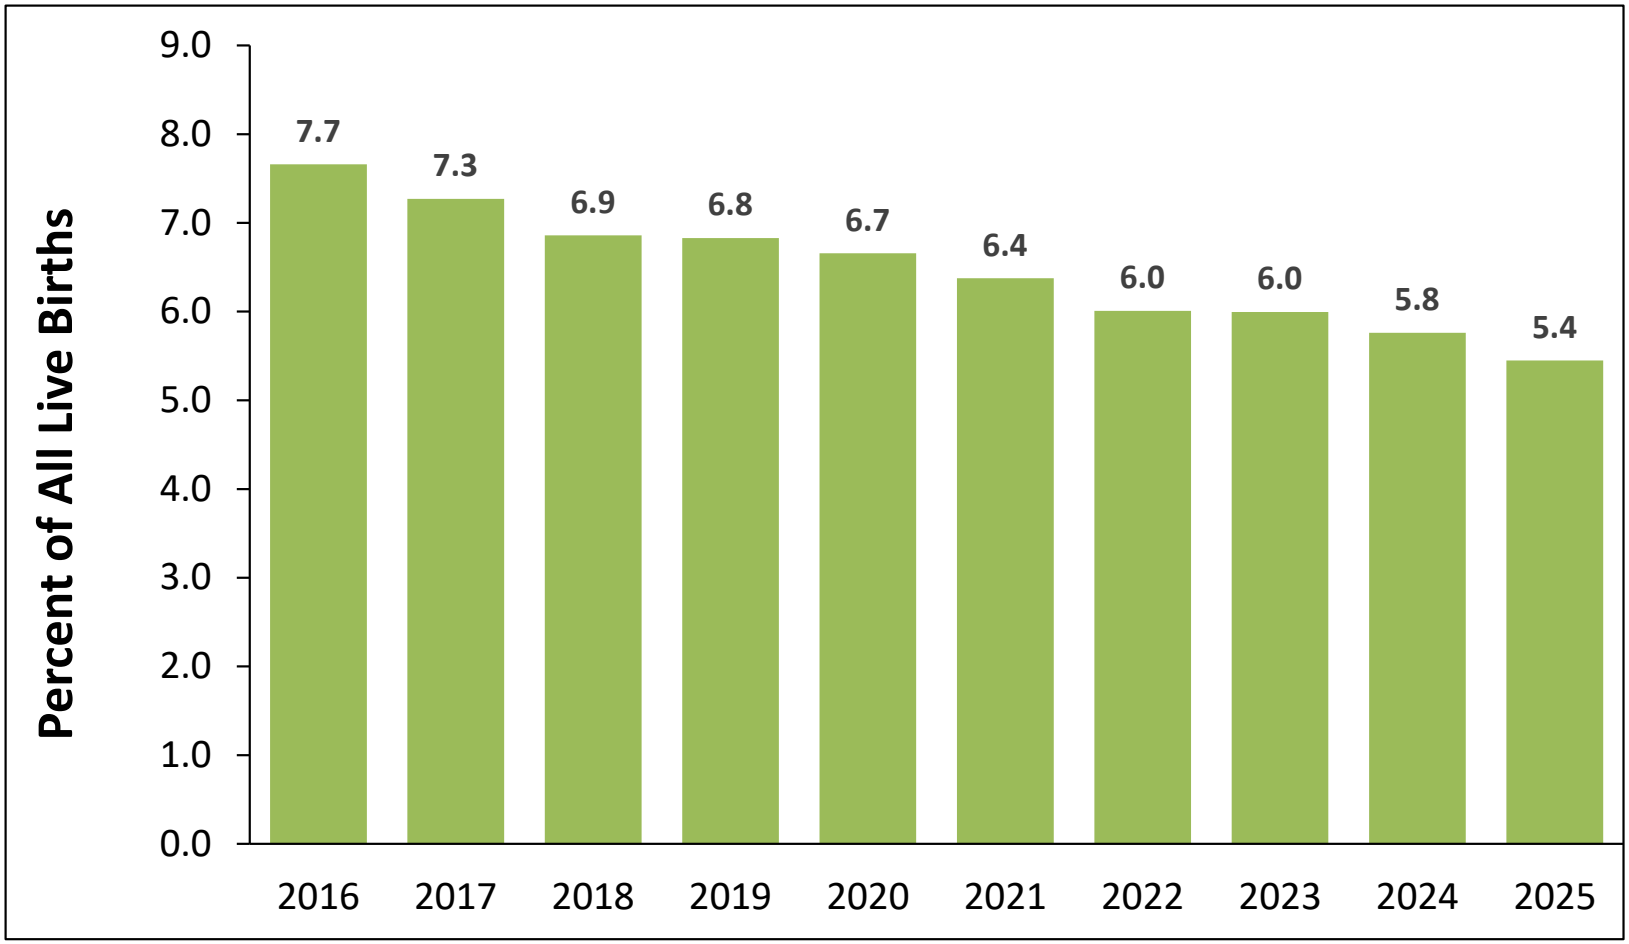

*Preterm birth is a live birth occurring before the 37th week of gestation.

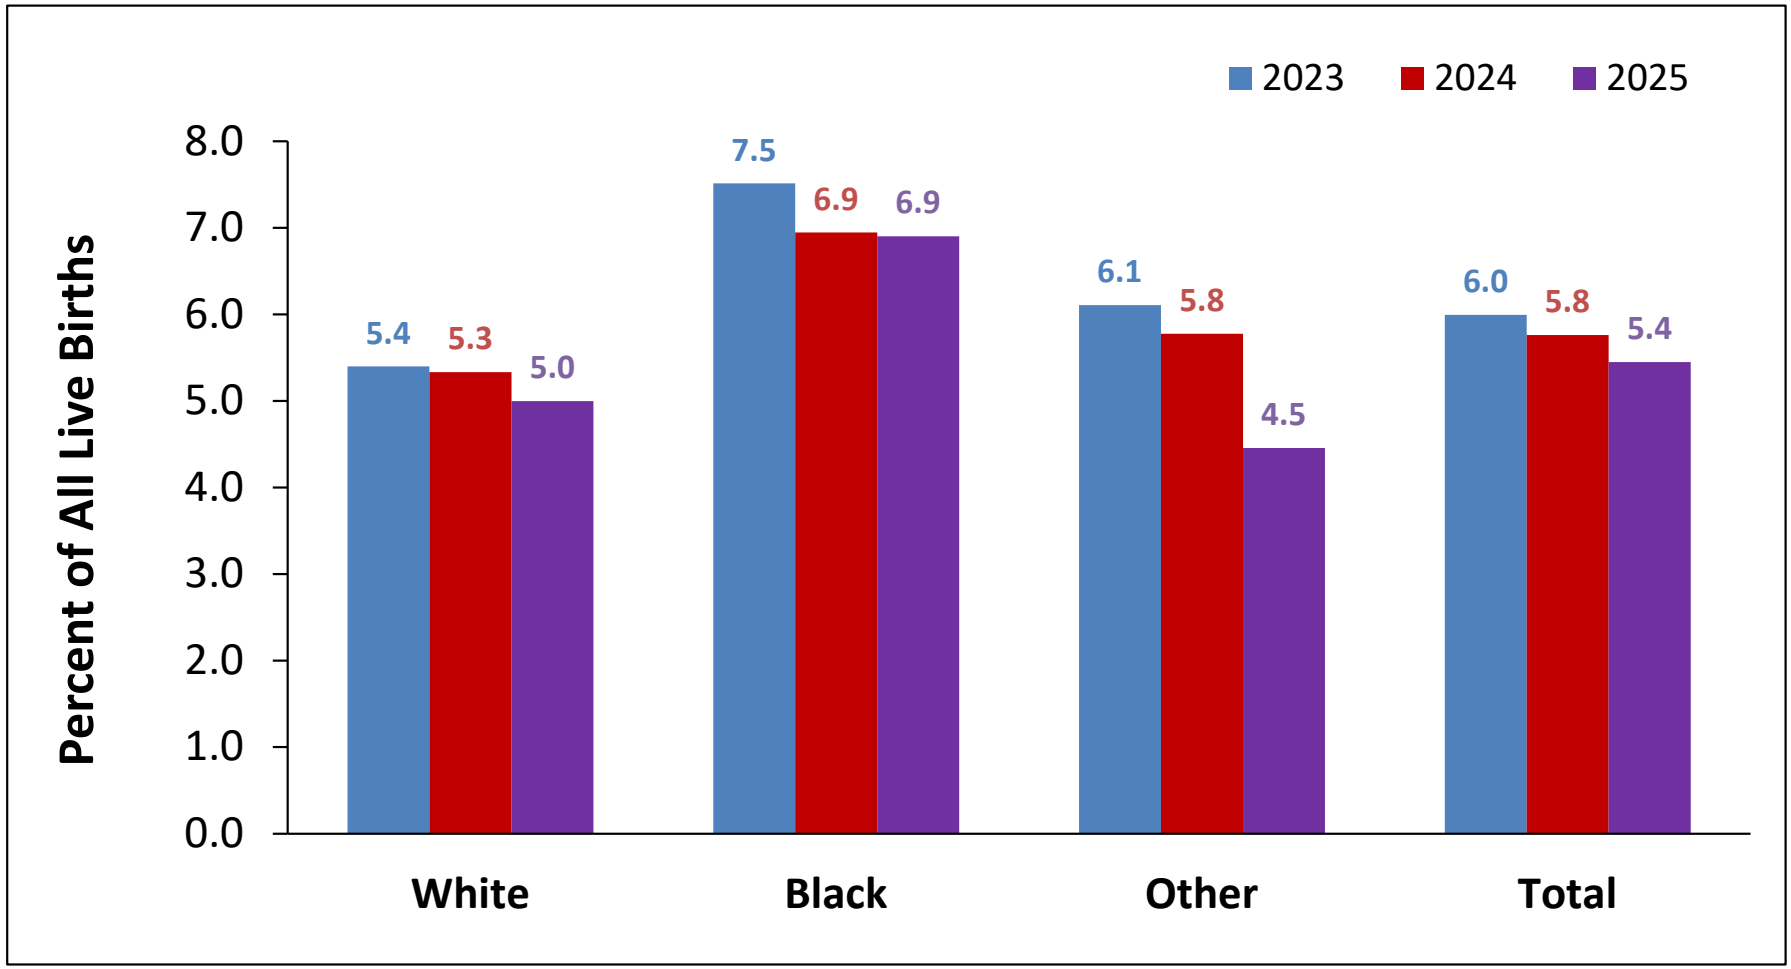

NUMBER OF INFANT DEATHS WITH PRETERM BIRTHS BY BIRTH WEIGHT ALABAMA, 2023-2025

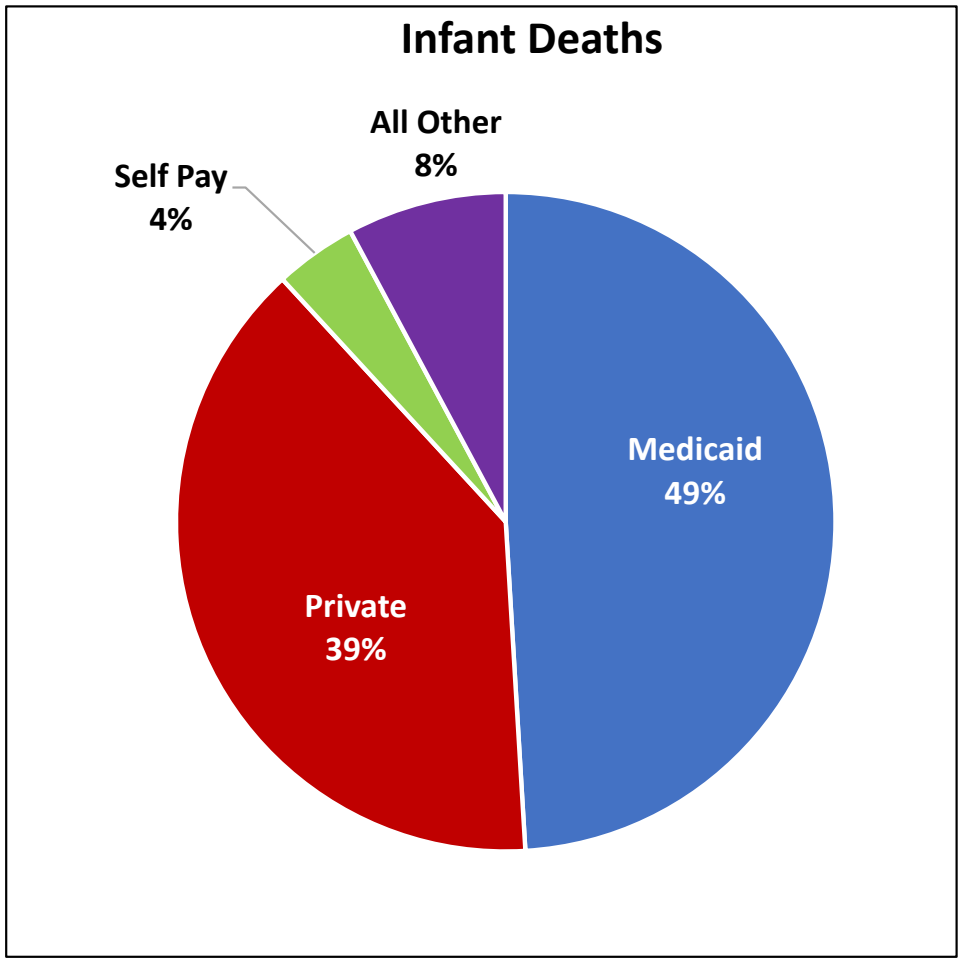

PERCENT OF BIRTHS TO TEENAGERS (AGES 10-19) ALABAMA, 2016-2025

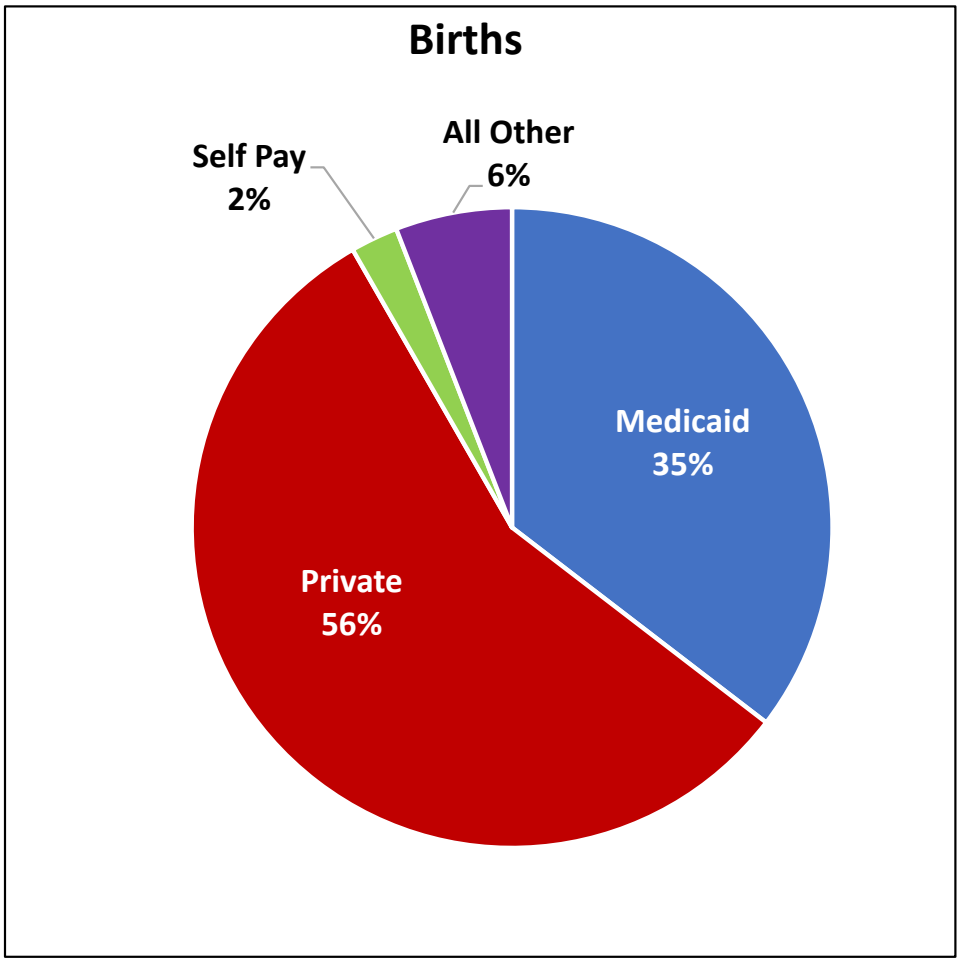

PERCENT OF BIRTHS TO TEENAGERS (AGES 10-19) BY RACE ALABAMA, 2023-2025

INFANT DEATHS AND BIRTHS BY PAYMENT SOURCE AT BIRTH ALABAMA, 2025

Due to rounding in some numbers, percentage totals may be slightly higher or lower than 100%.

PERCENT OF BIRTHS WITH A BIRTH INTERVAL LESS THAN 2 YEARS ALABAMA, 2016-2025

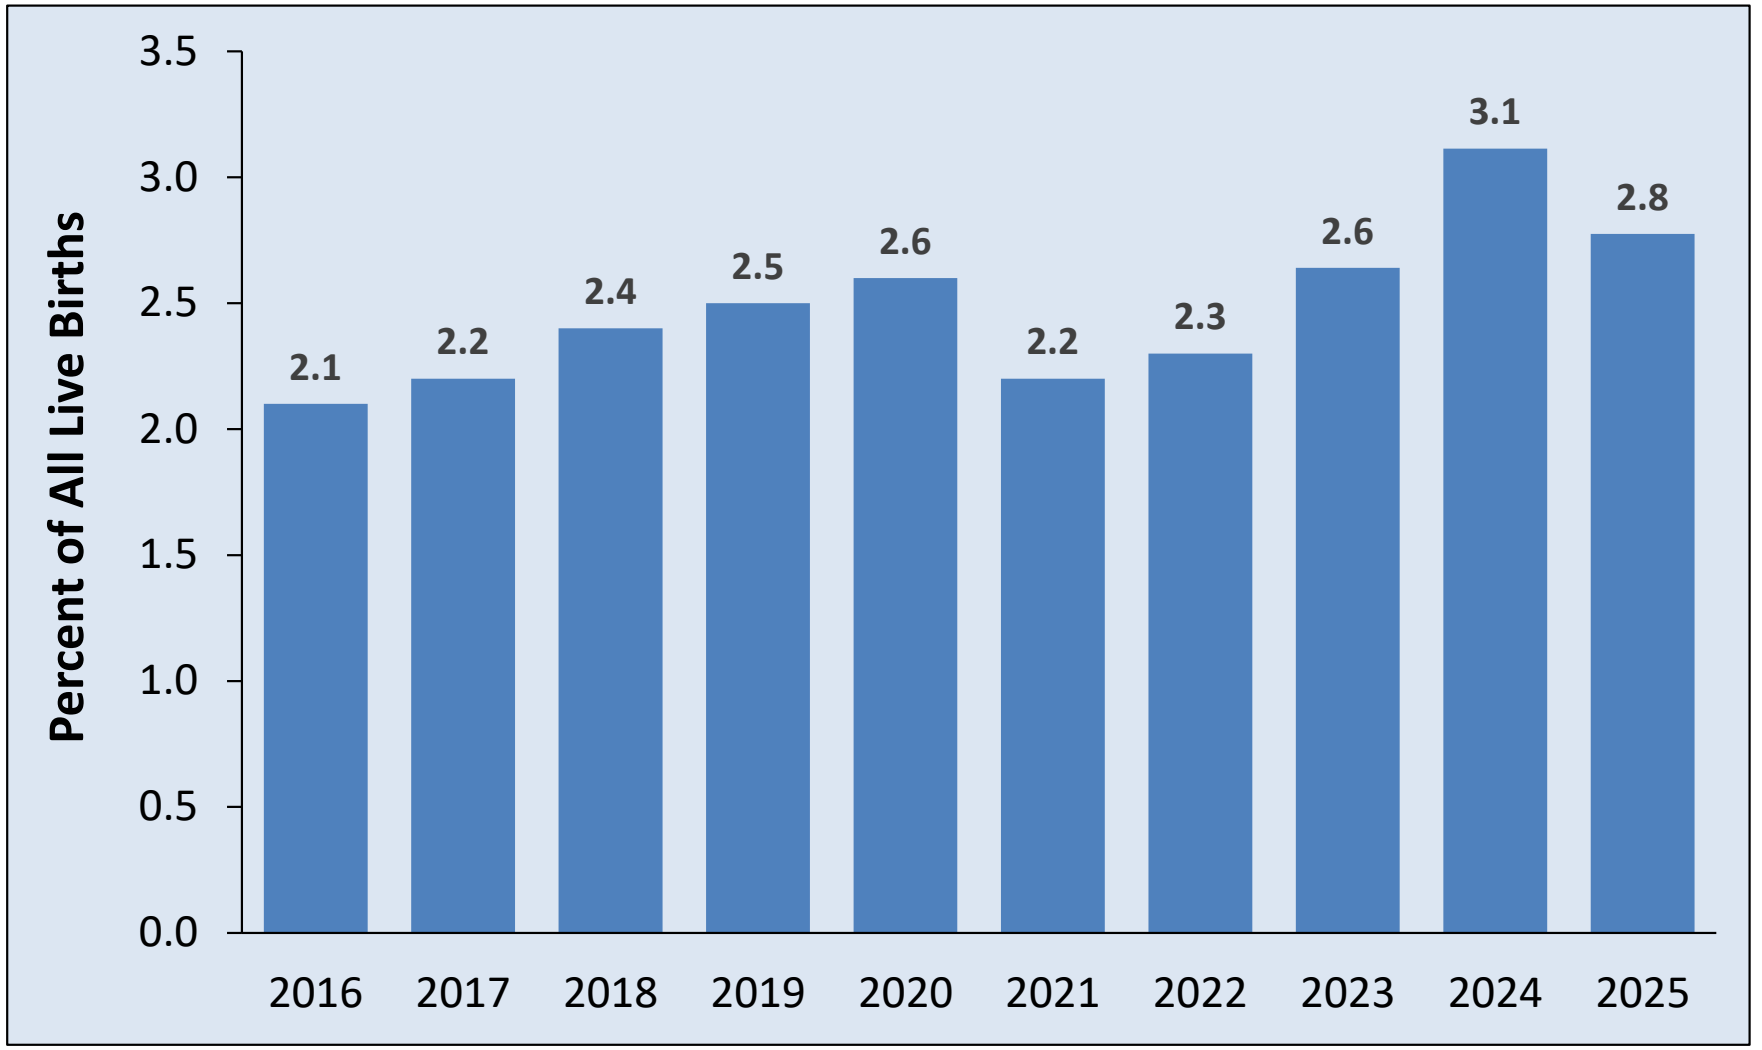

PERCENT OF BIRTHS WITH ADEQUATE PRENATAL CARE[1] ALABAMA, 2016-2025

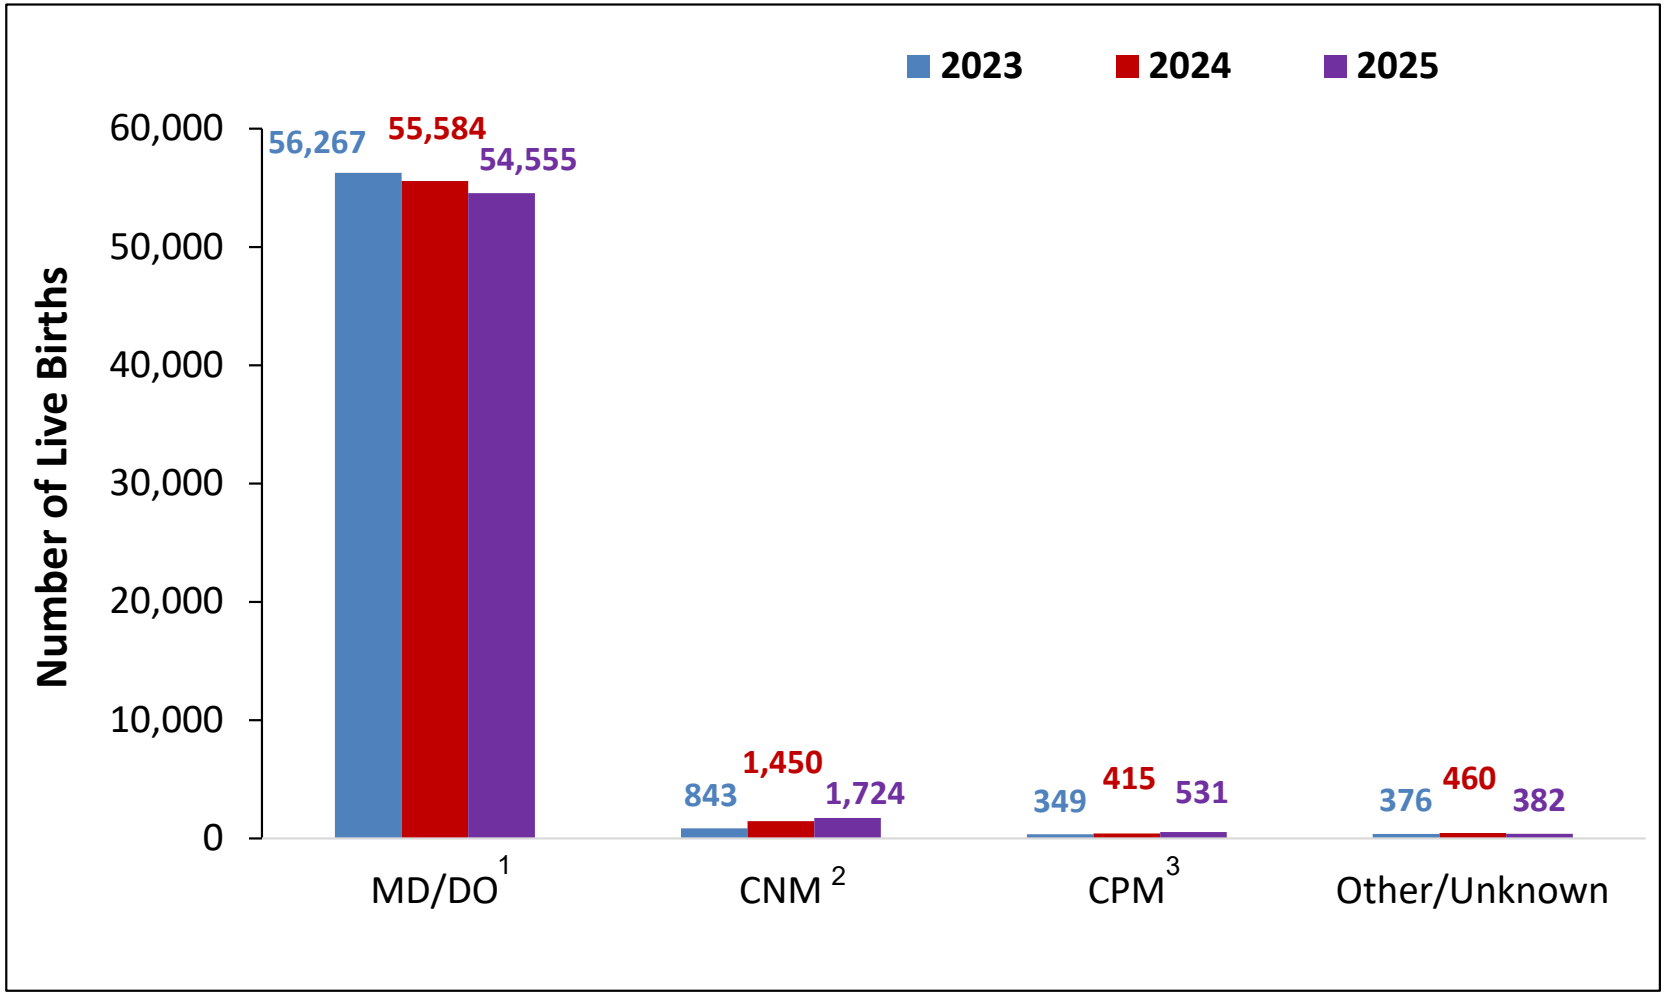

[1]Adequacy of care includes both adequate plus and adequate as measured by the Kotelchuck index. Percentage calculation excludes unknown status.

PERCENT OF BIRTHS WITH NO PRENATAL CARE ALABAMA, 2016-2025

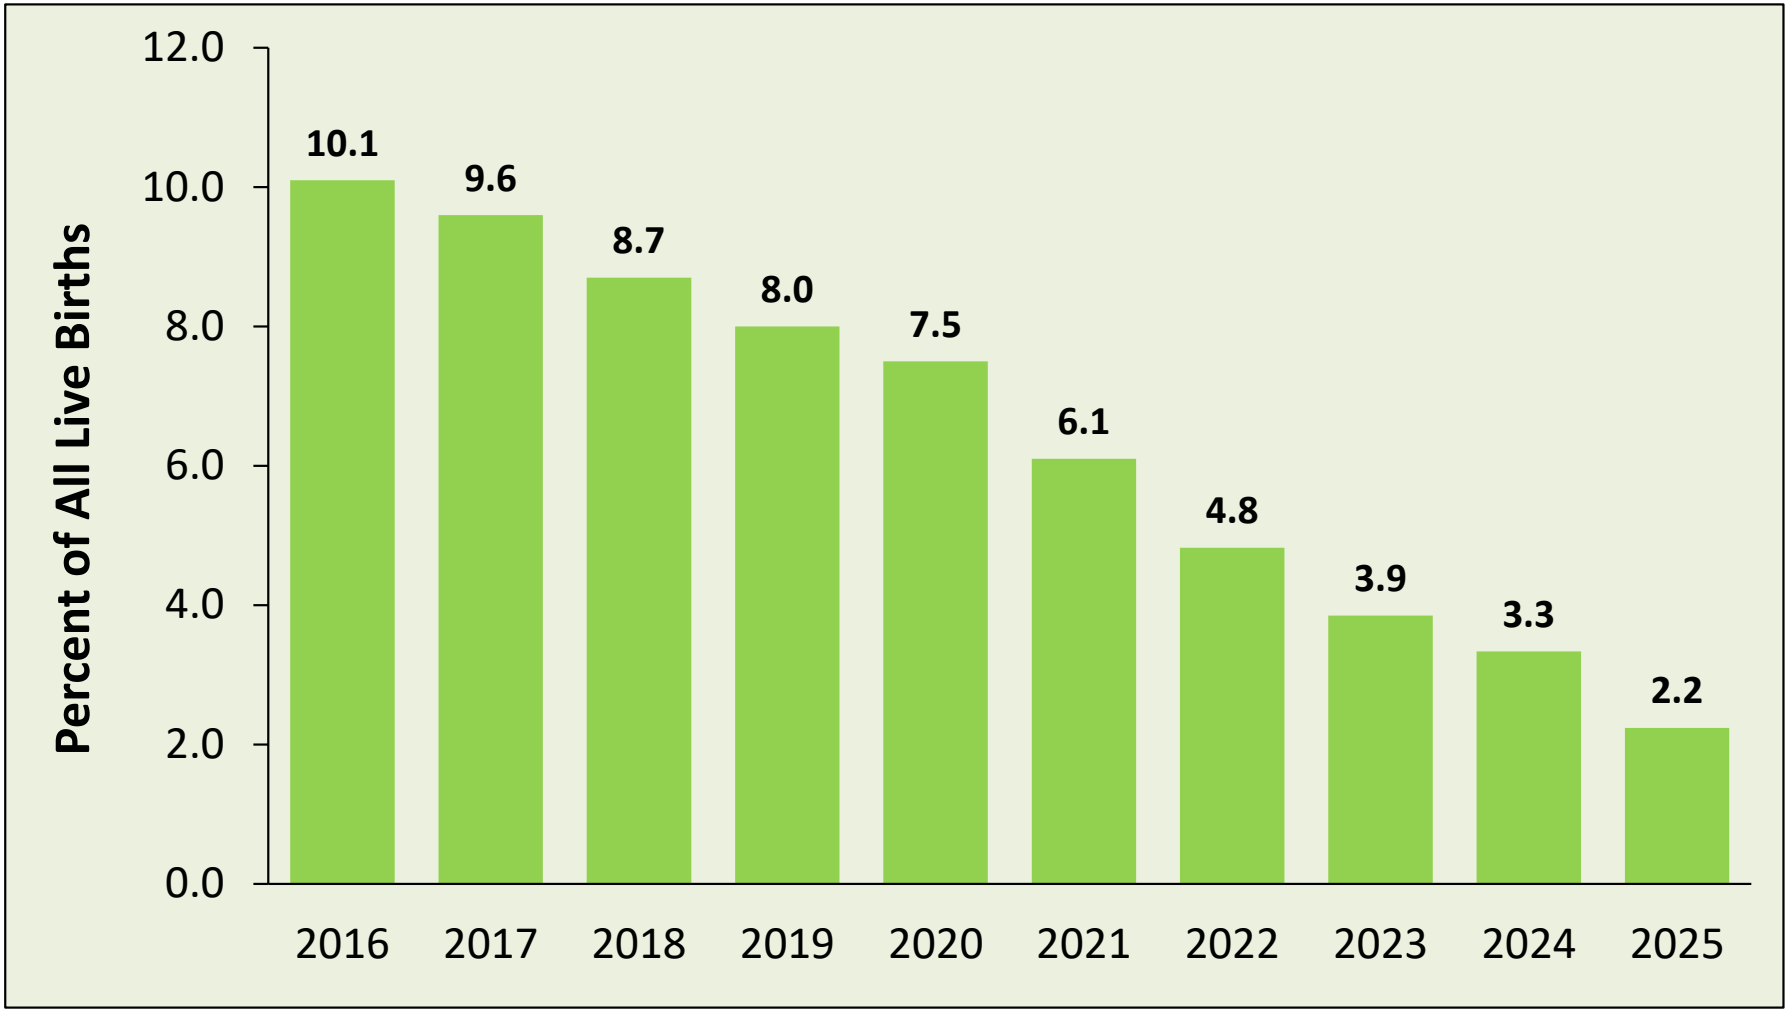

NUMBER OF BIRTHS BY ATTENDANT
ALABAMA, 2023-2025

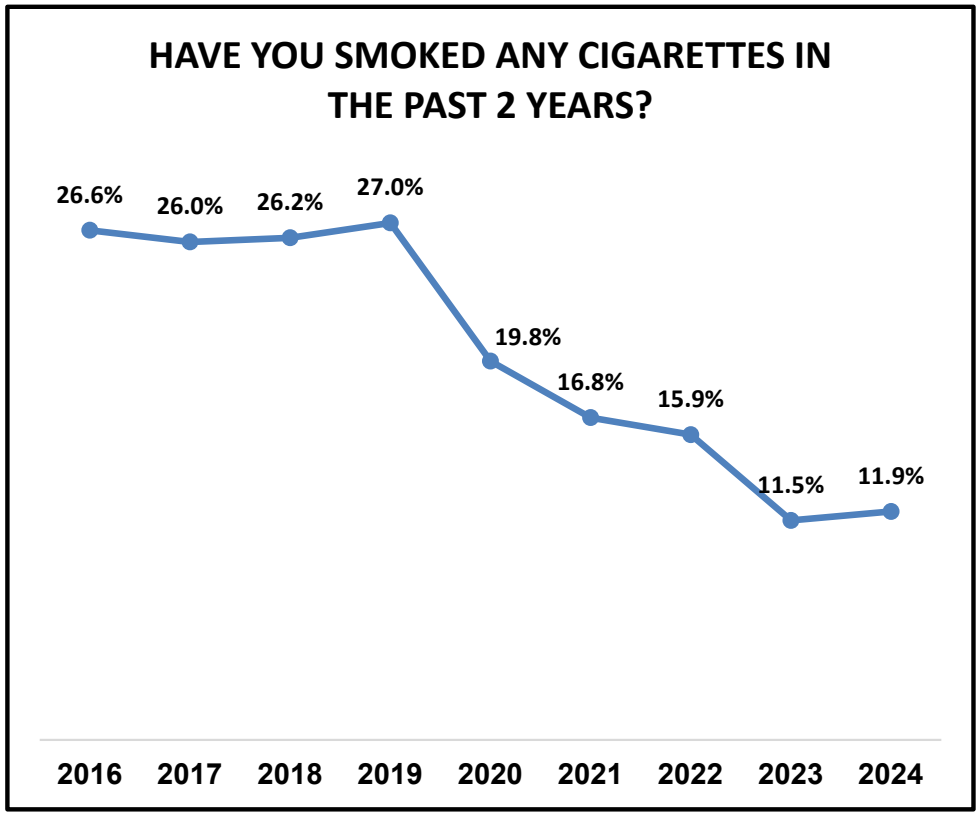

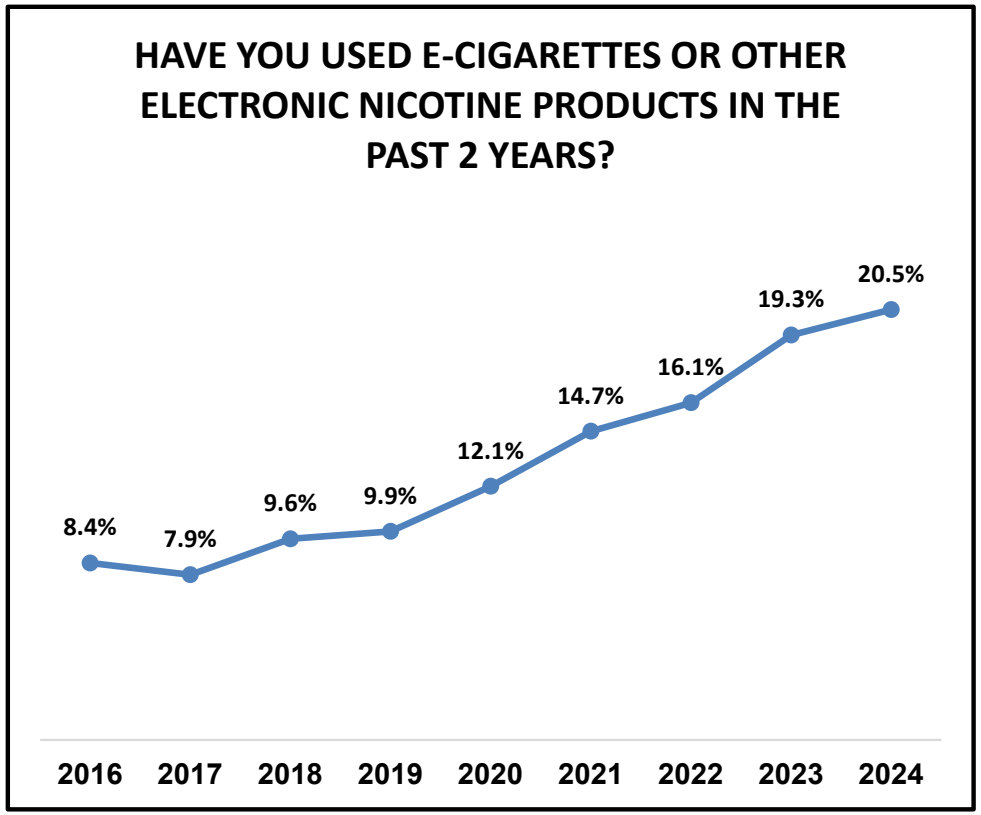

[1]Medical Doctor/Doctor of Osteopathy
[2]Certified Nurse Midwife
[3]Certified Professional Midwife

PERCENT OF BIRTHS WITH MATERNAL SMOKING ALABAMA, 2016-2025

CIGARETTE USE VS. E-CIGARETTE USE ALABAMA, 2016-2024

Source: Alabama Department of Public Health, Pregnancy Risk Assessment Monitoring System
Note: Interpret with caution with 2024 PRAMS findings. PRAMS survey operations were temporarily paused.

The projected statewide estimates for those reporting cigarette use within the past 2 years decreased from **26.6 percent (n=14,455/54,281)** in 2016 to **11.9 percent (n=4,737/39,700)** in 2024.

Meanwhile, the projected statewide estimates for those reporting E-cigarette or other electronic nicotine products within the past 2 years increased from **8.4 percent (n=4,590/54,416)** in 2016 to **20.5 percent (n=8,139/39,641)** in 2024.

INFANT MORTALITY RATES BY INFANT AGE
ALABAMA vs. UNITED STATES

Alabama

Change was not significant from 2024-2025 for the following indicators:

- Infant Mortality[1] (7.1 to 7.4)
- Neonatal Mortality[2] (4.4 to 4.5)
- Postneonatal Mortality[3] (2.7 to 2.9)

United States

Change was not significant when comparing final 2024 data and provisional 2025 data for the following indicators:

- Infant Mortality[1] (5.5 to 5.4)
- Neonatal Mortality[2] (3.7 to 3.6)
- Postneonatal Mortality[3] (2.0 to 2.0)

https://www.cdc.gov/nchs/nvss/vsrr/infant-mortality-dashboard.htm

[1] Infant Mortality Rate is the number of deaths of infants in the first year of life per 1,000 live births.
[2] Neonatal Mortality Rate is the number of deaths of infants aged 0 to 27 days of life per 1,000 live births.
[3] Postneonatal Mortality Rate is the number of deaths of infants aged 28 to 364 days of life per 1,000 live births.

CASE DEFINITIONS FOR LEADING CAUSES OF INFANT DEATH ALABAMA, 2025

1. Congenital malformations, deformations, and abnormalities (n=72)
   - Defined as the structural or functional differences that occur in a baby's body before birth
2. Preterm and Low Birth Weight (LBW) (n=64)
   - Preterm is defined as a baby born alive before 37 weeks of pregnancy
   - LBW is defined as a birth weight of less than 2,500 grams (5 pounds, 5 ounces)
3. Sudden Infant Death Syndrome (n=42)
   - A sudden, unexpected death occurring among infants under 1 year of age

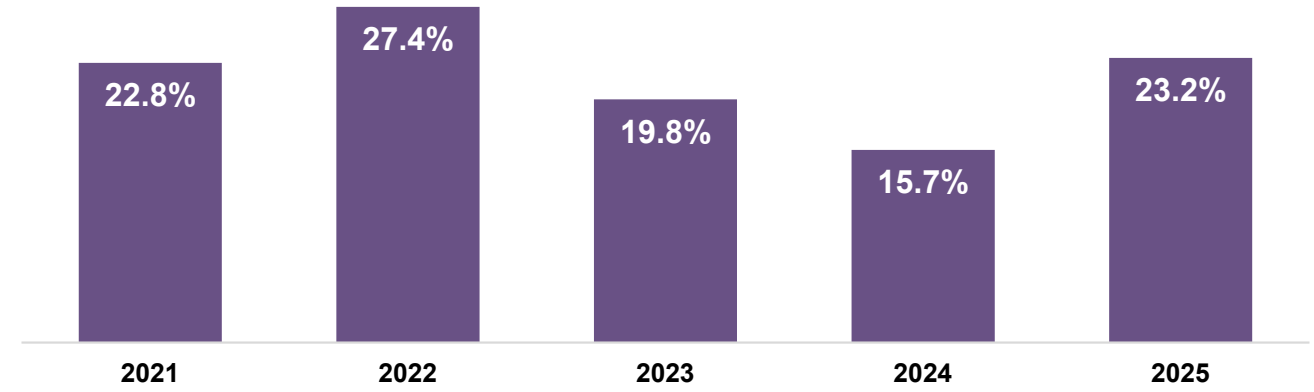

WHAT IS SUDDEN UNEXPECTED INFANT DEATH (SUID)?

A SUID refers to the death of an infant under 1 year of age, where the cause of death was identified as either sudden infant death syndrome (SIDS), accidental suffocation and strangulation, or an unknown cause. These deaths often occur while the infant is sleeping.

In 2025, unintentional injuries were ranked 4th statewide, with **over 80 percent (84.2 percent; n=16/19)** of these deaths being associated with either accidental suffocation and strangulation or an unknown cause.

In total, **23.2 percent (n=98/422)** of infant deaths for 2025 resulted from SUID. From 2020 to 2025, the 2024 SUID percent was the lowest.

SUID Percentages by Year, 2021-2025

STATEWIDE SAFE SLEEP INITIATIVES

Through partnership with the National Cribs for Kids® Program, the Alabama Fetal and Infant Mortality Program (AL-FIMR) provided **1,420** Pack and Plays during FY 2025 (October 2024-September 2025).

Participated in Babypalooza Community Outreach Events being held in Huntsville, Birmingham, and Mobile.

Billboards were placed statewide to increase public awareness on the ABCs of safe sleep.

Community baby showers were completed across the perinatal regions to emphasize the importance of safe sleep.

Most of Alabama's delivering hospitals **(83.3 percent; n=35/42)** collaborated to distribute safe sleep baby books.

Collaborated with high schools, colleges, and hospitals to promote the Clear the Crib Challenge, which emphasizes the importance of a safe sleep environment.

HOW DOES THE ALABAMA PREGNANCY RISK ASSESSMENT MONITORING SYSTEM (AL-PRAMS) WORK?

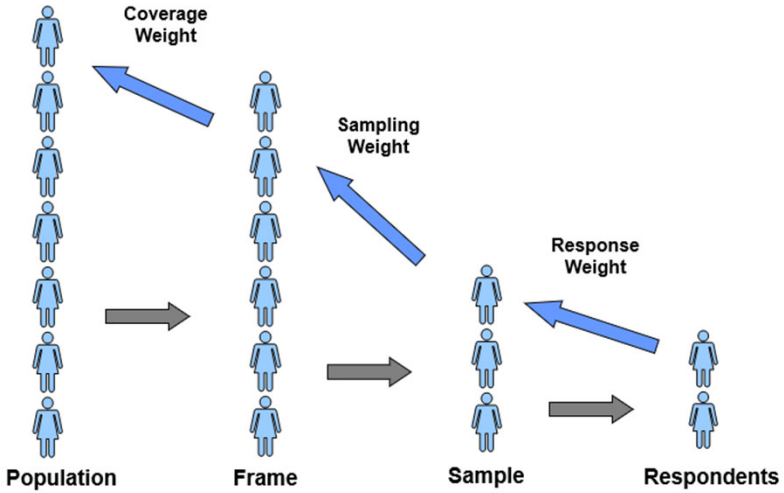

The Alabama Center for Health Statistics provides the AL-PRAMS Program with a randomized monthly sample of mothers who have had a recent delivery within the preceding 2 to 6 months, drawn from Alabama's birth certificate data.

The figure below visualizes how the Centers for Disease Control and Prevention used the completed surveys to accurately represent what the maternal population at the state level would select concerning topics such as vaping.

Please see link below to look at key survey findings from the AL-PRAMS Phase 8 (2016-2022) Report.

https://www.alabamapublichealth.gov/prams/assets/pramsphase8report2.pdf

PRAMS Logic Model

WELL WOMAN INITIATIVE

In FY 2025 (October 2024-September 2025), the Well Woman Program provided preconception, interconception, and postconception care to eligible women.

Eligibility Criteria

✓ Women of childbearing age (15 to 55 Years Old)
✓ Women residing in the 12 counties seen below

Well Woman Locations

How Well Woman Works

Screening
- CVD Risk Factors
- Vision Screening
- Oral Screening

Counseling
- Preconception, Interconception, and/or Postconception
- Health Coaching with a Social Worker
- Risk Reduction with a Nurse Practitioner

Support
- Nutrition Classes
- Support Groups
- Physical Activity Resources

COUNT THE KICKS

Funded by the Maternal and Child Health Title V Block Grant, Count the Kicks is an evidence-based program that educates expectant parents across a broad spectrum on the importance of tracking fetal movement during the third trimester to reduce the risk of mothers experiencing a stillbirth.

Alabama is the second state, behind the founding state of Iowa, in promoting Count the Kicks in the dental arena and closely collaborates on promotion with the AL-FIMR program.

The Benefits of the Count the Kicks App

Time

- Monitor the time it takes to feel at least 10 fetal movements.

Count

- Pick the same time each day when the most fetal activity is most noticeable.

Pattern

- Allows mothers to compare past sessions of fetal activity and seek medical care if needed.

In 2025, the Count the Kicks app was downloaded 2,835 times.
