

Cervical Health 30 Sec PSA

January is Cervical Health Awareness Month...and it's a great time to talk to your doctor if you haven't been screened for cervical cancer.

Did you know, that with HPV vaccination and regular screening, cervical cancer can be eliminated?

For women who have no insurance and a low income, free cervical cancer screening may be available through the Alabama Breast and Cervical Cancer Early Detection Program. For more information about free screenings, contact your local county health department.

For more information about cervical cancer, visit our website at Alabama-Public-Health-dot-gov.
