

Colon Cancer 30 Sec PSA

Let's take a moment to talk about colon cancer. Colon cancer is the second leading cause of cancer deaths in Alabama – but it doesn't have to be.

The disease starts with no symptoms, but through early screening, it can be treated and even cured. If you are 50 years of age or older, talk to your doctor about colon cancer screening.

For more information and resources related to colon cancer, visit our website at Alabama-Public-Health-dot-gov. That's Alabama-Public-Health-dot-gov.
