

## **Coronavirus 30 Sec PSA**

Chances are, you've probably heard a lot about Coronavirus lately. But do you know what it is, and can you recognize its symptoms?

Originating in China in December of last year, the 2019 Novel Coronavirus is said, by researchers, to appear as a mild to severe respiratory illness that's spread via person-to-person contact. Symptoms include fever, cough, and shortness of breath appearing anywhere from 2 days to 2 weeks following exposure.
