

Lupus Awareness Month 30 Sec PSA

May is Lupus Awareness Month. Did you know that five million people across the world suffer from Lupus with about 16,000 new cases reported each year?

Lupus mostly affects women of childbearing age, but it can affect men, children, and teenagers as well. The autoimmune disease can affect the skin, joints, kidneys, and even the lungs.

With good medical care, most people with Lupus can live a full life. For more information, visit lupus.org.

This message brought to you by the Alabama Department of Public Health and this station.
