

National Faith HIV/AIDS Awareness Day 30 Sec PSA

National Faith HIV/AIDS Awareness Day is held annually on August 29 and stands to unite communities of faith with communities of persons with HIV/AIDS.

Many faith communities have been at the forefront of the response to HIV/AIDS and are a vital part of providing HIV/AIDS services, especially in rural areas. Collaborating with these trusted and influential faith leaders provides public health information and other resources to individuals that in the past have been difficult to reach.
