

National Youth HIV/AIDS Awareness Day 30 Sec PSA

April 10th is National Youth HIV/AIDS Awareness Day. In 2018, youth aged 13 to 24 made up 21 percent of the 37,832 new HIV diagnoses in the United States. National Youth HIV/AIDS Awareness Day is a day to highlight the impact HIV/AIDS has on the youth and the importance of ensuring they have proper access to the information and tools for testing, getting treatment, and staying in care.
