

### **Pride Month/National HIV Testing Day 30 Sec PSA**

The entire month of June is Pride Month with National HIV Testing Day being observed June 27th. Of the 37,968 new HIV diagnoses in the United States and dependent areas in 2018, 69 percent were among gay and bisexual men. It is extremely important that we take pride in our LGBTQ+ communities and ensure they have proper access to HIV testing services, PrEP, and access to proper treatment if they have HIV. For more information, download our Know. Manage. Live. app from your Apple or Google Play store.
